THE CITY OF
COLUMBUS
ANDREW J. GINTHER, MAYOR

DEPARTMENT OF
PUBLIC UTILITIES

City of Columbus

Stormwater NPDES Permit

January 1, 2016 – December 31, 2016
(Ohio EPA Permit Number: 4PI00000*CD)

ANNUAL REPORT

CITY OF COLUMBUS ANNUAL REPORT

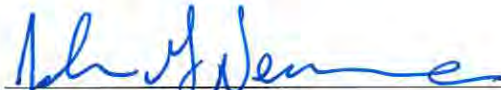

AUTHORIZATION TO DISCHARGE UNDER THE NPDES (NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM)

In compliance with the provisions of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et. seq.) and the Ohio Water Pollution Control Act (Ohio Revised Code Section 6111), the City of Columbus is authorized by the Ohio Environmental Protection Agency, to discharge from all portions of the City of Columbus municipal separate storm sewer system, to waters of the State in accordance with the approved Storm Water Management Program, monitoring requirements, and other conditions specified in the permit.

January 1, 2016 through December 31, 2016: Ohio EPA Permit No. 4PI00000*CD

CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

John Newsome, P.E.

Administrator

Division of Sewerage and Drainage

SECTION 1 – NARRATIVE SUMMARY

1.1 Annual Report Format and Content

On March 17, 2012, the Ohio EPA issued permit No. 4PI00000*CD to the City in which conditions for the City's Stormwater Management Program were defined. Permit No. 4PI00000*CD became effective on May 1, 2012 and will expire on April 30, 2017. Program activities conducted from January 1, 2016 through December 31, 2016 under permit No. 4PI00000*CD are summarized in the following report.

1.2 Overview

The City of Columbus (City) owns and operates the municipal separate storm sewer system (MS4) defined as a system of conveyances and controls designed or used for collecting, conveying, and controlling stormwater runoff. The MS4 has been constructed since the founding of the City with the primary purpose of conveying and controlling drainage from developed areas such that standing water or flooding does not result from frequent storm events. As the City has developed and regulatory requirements have changed, the MS4 has grown to consist of drainage related appurtenances including storm sewers, catch basins, curb inlets, junction chambers, manholes, culverts, headwalls and endwalls, stormwater pump stations, ditches, manmade channels, detention facilities and post-construction water quality capture facilities. The MS4 discharges to Big Walnut Creek, Alum Creek, the Olentangy River, the Scioto River, Hellbranch Run, Rocky Fork Creek, lesser named creeks, and unnamed tributaries to each.

A Table of Organization that summarizes the program elements and the responsible party for each element under the City's SWMP (Stormwater Management Program) is provided in Appendix A.

1.3 Description of Evaluation Process

The effectiveness of the City's stormwater management program is assessed primarily through tracking BMP implementation. The department verifies or tracks BMP implementation and determines how a management program is being implemented. It is the primary tool for developing most of the City's measurable goals.

In preparation of the Annual Report, the City compiles tracking information to provide quantitative evidence of the extent of implementation of the various program elements. Data analysis for this type of monitoring consists of an annual summary of the program data and evaluation of trends as appropriate.

1.4 Major Findings, Areas of Accomplishment, Areas Needing Improvement, and Future Direction

Table 1 summarizes the major findings, areas of accomplishment, areas of the stormwater program needing improvement and actions the City intends to take as part of its SWMP. More specific information about activities conducted during the 2016 reporting period is provided in Section 2.

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
Administrative	The City of Columbus annexed approximately 95 acres into the City's corporation limits in 2016.	<ol style="list-style-type: none"> 1. Approximately 133 acres of land were annexed into the City of Columbus in 2015. Evaluation of these areas identified two home septic treatment systems, no stormwater outfalls, no industrial facilities, and one post-construction BMP that were incorporated into the City's MS4 program. 2. The reapplication for the City's MS4 permit was submitted on October 26, 2016. 		Evaluation of areas annexed in 2016 to identify additional Home Septic Treatment Systems (HSTS), stormwater outfalls, post-construction BMPs, and industrial locations will be conducted in 2017.
Public Education and Public Involvement	<ol style="list-style-type: none"> 1. The City's partnerships with local agencies, watershed groups and businesses continue to contribute to the 	Residents learned about onsite stormwater management through the use of green infrastructure as outreach on Blueprint	The City continues to look for ways to measure the effectiveness of our stormwater education programs and the ways	<ol style="list-style-type: none"> 1. In 2017 the residential target themes / audiences will continue to be: pet waste / dog owners, yard

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	<p>success of our stormwater education program.</p> <p>2. Targeted campaigns and materials are aimed at specific stormwater quality issues and changing behaviors. In 2016, the PUP campaign continued to focus on informing pet owners on how pet waste can impact stormwater quality; the City partnered with Franklin Soil and Water Conservation District to implement a lawn care program; materials on proper power washing methods were distributed.</p>	<p>Columbus continued through 2016 with targeted outreach occurring in the Clintonville project area.</p>	<p>in which individual behaviors change as a result of outreach.</p>	<p>maintenance / homeowners, lawn care businesses, garden centers; methods of keeping stormwater onsite/homeowners, landscapers, garden centers.</p> <p>2. 2017 industrial target themes / audience will continue to be: methods of keeping stormwater onsite / water quality impacts associated with land development; Importance of good housekeeping / those who power wash, sweep surfaces and perform other outdoor cleanup activities; Fats Oil and Grease / Restaurants,</p>

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
				businesses and manufacturers whose byproduct or waste includes fats, oil or grease.
Illicit Discharge	<ol style="list-style-type: none"> 1. Columbus Public Health (CPH) took action to correct the 103 violations found during the HSTS characterization project performed in 2015 and was able to resolve 80 of them. 2. CPH issued 97 orders to owners of HSTSs to connect to an accessible sanitary sewer. 	<ol style="list-style-type: none"> 1. In 2016, six HSTSs connected to the sanitary sewer system via a loan from the Septic Tank Elimination Program (STEP). 2. The sewer extension prioritization project was completed. Six areas containing approximately 200 HSTSs were identified. The process to design the first project area was begun. 3. Conducted 60 half-day Food Service Programs to educate restaurant employees about prevention of 		<ol style="list-style-type: none"> 1. The City will continue to promote its STEP program in an effort to assist qualifying homeowners with abandonment of their HSTSs. 2. Columbus Public Health (CPH) will continue to issue tap orders to HSTS owners located near an accessible sanitary sewer. 3. Sanitary sewer extension projects in various phases of design and construction will provide access to approximately 300

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
		<p>illicit discharges during parking lot and dumpster cleaning, and conducted 23 full-day Food Service Program training sessions. These programs were attended by 1,871 restaurant employees.</p>		<p>properties with existing HSTSS by 2025.</p>
Construction		<ol style="list-style-type: none"> 1. Over the past ten years, total of 44,876 site specific sediment and erosion control construction inspections have been performed in the City of Columbus. The average number of SWP3 inspections per year has been 4,488. 2. The city hired one (replacement) 		<ol style="list-style-type: none"> 1. Pursue electronic data input devices, i.e., tablets, cloud-based applications, and storage options. 2. Erosion and Sediment Pollution Control Regulations will be revised.

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
Post Construction		<p>inspector in 2016.</p> <ol style="list-style-type: none"> 1. In 2016, 158 maintenance information packets were distributed to owners/management companies responsible for maintaining post-construction BMPs. 2. The City utilized a private vendor to perform maintenance work at 126 city-owned bioretention facilities. 	<p>Of 109 sites with BMPS that were constructed in 2016, the program was able to inspect 45 for maintenance of BMPs. Ownership of a site frequently changes shortly after construction, so the City continues to evaluate efficient methods for communicating maintenance responsibilities to new owners.</p>	<ol style="list-style-type: none"> 1. The Stormwater Drainage Manual will be revised.
Good Housekeeping/Pollution Prevention	<p>Using the Department of Public Utilities' Environmental Management System (EMS) as a template, the City's Division of Fleet Management continued to work with other City departments to develop an EMS targeted at fleet</p>	<p>Under this city-wide EMS initiative, the design of upgrades to City facilities with fueling stations was begun in 2015 to bring them into full compliance with stormwater regulations.</p>	<ol style="list-style-type: none"> 1. City facilities with SWPPPs based on an outdated version of the SWPPP template must be updated to incorporate the improvements in the current version. 2. Improvements needed in training; 	<p>Institute efforts to clarify roles and responsibilities for MS4 implementation across City departments.</p>

Table 1

Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	maintenance activities.		identifying roles and responsibilities in implementing SWPPP requirements; and consistently performing monthly and annual inspections. 3. Closing out items from the environmental audits conducted at facilities owned and operated by the departments of Finance and Management, Public Safety, Public Service, Recreation and Parks, Technology, and Public Health.	
Industrial and Related Facilities	1. The names of industries that have been identified and contacted by the City	360 No Exposure Certifications and 125 Industrial General Permits have been		1. The City will schedule appointments with Ohio EPA

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	<p>that have not shown proof of permit or No Exposure Certification coverage are listed in Appendix P as Category 1 industries.</p> <p>2. The number of Category 1 industries decreased this reporting period since 121 industries were removed from the City's inventory and one industry re-applied for coverage under OEPA General Permit No. OHR000005 along with 86 industries that applied for coverage under OEPA No Exposure Certification.</p> <p>3. Ten No Exposure Certification exemptions have</p>	<p>acquired to date.</p>		<p>throughout 2017 to retrieve copies of NOIs, General Permit confirmation numbers, and No Exposure application and confirmation letters for industries in its inventory.</p>

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	expired during this reporting period.			
Wet Weather Monitoring	The City found that the results of stormwater sampling performed since 2007 have remained consistent.	<ol style="list-style-type: none"> 1. The City conducted wet weather monitoring at three outfall locations during the four quarters of 2016. 2. The City entered into a contract with The Ohio State University (OSU) for services to perform wet weather monitoring during the next 5-year permit cycle. The monitoring to be performed under the OSU contract will focus on measuring the water quality improvements provided by green infrastructure BMPs constructed under the City's Blueprint 		<ol style="list-style-type: none"> 1. After the end of the first quarter in 2017 the City will cease collection of flow data and sampling at the three outfall locations that were monitored in 2016 and the City will begin performing monitoring under the new contract with OSU.

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
		program.		

SECTION 2 – ASSESSMENT OF BEST MANAGEMENT PRACTICES

The SWMP is an on-going effort to reduce pollutant discharges from the MS4 to the maximum extent practicable. BMPs developed and implemented by various city departments and divisions in response to requirements specified in past and current MS4 permits are evidence of this effort. Compliance tasks are conducted and coordinated by the Department of Public Utilities, Division of Sewerage and Drainage, Stormwater and Regulatory Management Section. Based upon specific SWMP goals, compliance activities are delegated to different departments or divisions including Department of Public Service, Department of Public Safety, and Department of Recreation and Parks. Each of these departments administers practices targeted at reducing pollution from stormwater runoff. The City of Columbus continues to work to develop and improve a comprehensive employee training program, increase public awareness, foster inter-governmental and inter-community cooperation, and promote the improvement of stormwater runoff in local watersheds.

Ohio EPA permit 4PI00000*CD requires the City to develop and report on the implementation of BMPs and measurable goals for each element of the City's SWMP. The objective of stormwater BMPs is to control the quality and/or quantity of stormwater runoff to reduce the adverse impact on local receiving waters. BMPs are generally described as activities, regulation of practices, maintenance, structural controls, and management practices and procedures used to prevent or reduce the release of pollutants or otherwise prevent adverse impacts to surface waters. The following tables outline the BMP and measurable goal implementation status for each program component in the SWMP.

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Identify Target Pollutants

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period¹:	Measurable Goals Achieved?		
		Yes	No	Other
1. Distribute educational materials to reach at least 20% of city residents each year.	Bill inserts containing stormwater messages were sent to over 280,000 ratepayers.	X		
2. Publicize at least 20 stormwater education messages annually using social media.	Messages were published on DPU and GreenSpot Facebook pages, and periodic messages were shared via Twitter.	X		
3. Review the list of targeted themes and audiences in Table 2-1 during preparation of the City’s annual compliance report to Ohio EPA.	The list of targeted themes was reviewed, and no changes were warranted.	X		
4. Continue pet waste campaign. Install and maintain signage and kiosks in parks.	621 residents pledged to pick up after their dog. Pet waste stations and bags were assembled and installed in 86 parks across the city and around the reservoirs.	X		
5. Develop yard maintenance program in 2015 and begin implementation in 2016.	The Franklin County Soil and Water Conservation District and the City of Columbus developed Get Grassy! with assistance from marketing professionals, local lawn care companies, the Turfgrass Science Extension Team at The Ohio State University, a focus group of central Ohio residents, and additional natural resource professionals and public agencies. The program’s primary goal is to	X		

¹ See Appendix B for detailed summary of Public Education and Outreach activities.

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period ¹ :	Measurable Goals Achieved?		
		Yes	No	Other
	increase outreach to residents, promoting good stormwater practices such as proper disposal of yard waste, mowing high, watering at the right time, keeping product off of hard surfaces and applying it correctly, and keeping rainwater on property to prevent polluted runoff.			
6. Continue GreenSpot Backyard Conservation and rain barrel cost share program.	110 Columbus residents attended a workshop and 836 completed an online course on causes and prevention of stormwater pollution. Each resident was eligible to receive a rebate on a rain barrel, compost bin, native plants, or a tree.	X		
7. Establish grant program for watershed organizations to promote green infrastructure credit and develop a mandatory training course as part of grant eligibility.	Following MORPC’s 2015 evaluation of the green infrastructure stormwater credit program, MORPC staff researched and provided information regarding the application processes, review and verification of operation for stormwater credits facilitated by other stormwater utilities.			X*
8. Continue public education through the Utility Update and GreenSpot application, outreach activities, webinars and social media.	GreenSpot recruited 2,040 new members in 2016 and participated in dozens of events where measures such as washing the car over grass (or at a commercial car wash), picking up pet waste, installing rain gardens/rain barrels and reducing the amount of fertilizers, pesticides, and herbicides used on the lawn were discussed. Sixty-four local businesses became GreenSpot members in 2016 and have committed to or	X		

BMP PE1– Targeted Public Education Themes

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period ¹ :	Measurable Goals Achieved?		
		Yes	No	Other
	<p>have already taken steps that have a positive influence on reducing stormwater runoff and/or allowing more natural filtering to take place. A list of local businesses who have committed to take action to reduce stormwater runoff is provided in Appendix D. GreenSpot worked with Columbia Gas of Ohio and Columbus Public Health to install 100 high efficiency spray nozzles at local restaurants.</p> <p>GreenSpot/Dept. of Utilities made the commitment to join the US EPA WaterSense program. As a signer we promote WaterSense through social media. As part of GreenSpot’s Corporate Sustainability Initiative, the City’s Wastewater Pretreatment Analyst presented information to nine large businesses on fats, oils and grease, stormwater pollution prevention, spill prevention control and counter control measures and green infrastructure. Participants learned about illicit connections, proper container storage, proper waste storage, proper vehicle parking/storage, and site pollution prevention actions.</p>			
9. Identify power washer companies and create/distribute educational information starting in 2015.	Information on outdoor cleaning was included in the Spring 2016 bill insert. Thirty-two power washing companies were contacted and provided educational information as part of the City’s outreach program.	X		

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period¹:	Measurable Goals Achieved?		
		Yes	No	Other
10. Continue working with Columbus Public Health’s (CPH) Food Protection Program to distribute FOG educational information.	The City conducted an annual FOG training for CPH employees. 3,579 FOG inspections were performed and 1,006 door hangers were distributed.	X		
Planned Activity for Next Reporting Period:				
Discussion:	* Based on MORPC’s research and findings, the stormwater credit program is currently under review by a subcommittee of the group currently reviewing the City’s Stormwater Drainage Manual.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Proper management and disposal of used oil and toxic materials

BMP PE2 – Educate Auto Repair Businesses and General Public about Vehicle Fluids and Tire Recyclers				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publicize locations of recyclers of used oil and tires through SWACO.	1. Instructions on how to properly dispose of used tires and motor oil are posted on the SWACO web site: http://www.swaco.org/Residents/disposal-information.aspx 2. Household hazardous waste (HHW) recyclers, dates and locations of HHW drop off events coordinated by SWACO are posted on the SWACO web page: http://www.swaco.org/Residents/HouseholdHazardousWaste.aspx 3. Information on HHW disposal and link to SWACO site available on Division of Refuse web page within the Columbus Public Service Department: http://www.columbus.gov/Templates/Detail.aspx?id=64642	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Inform individuals of proper disposal of household hazardous and toxic materials

BMP PE3/PI5 – Educate General Public about Household Hazardous Wastes and Drop Off/Collection				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publicize locations of collection and recyclers of household hazardous waste (HHW) through SWACO.	Publicized location of HHW drop off locations and times through the Solid Waste Authority of Central Ohio (SWACO), which coordinates HHW events in Franklin County. SWACO HHW web page is: http://www.swaco.org/Residents/HouseholdHazardousWaste.aspx . This page also is accessible through a link on the Division of Refuse web page within the Columbus Public Service Department http://www.columbus.gov/Templates/Detail.aspx?id=64642	X		
2. In cooperation with SWACO, conduct annual HHW drop off events each year.	1. One HHW drop-off event was conducted in 2016. 2. The City maintains a permanent HHW drop-off facility at 645 E. 8th Avenue.			
3. Track amount of HHW collected per year.	Collected 289 tons of HHW.			
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Residential Lawn Care Program

BMP PE4 – Educate Lawn Care Businesses and General Public About Lawn Chemicals and Yard Waste				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Include in the stormwater edition of the Utility Update distributed to 310,000 rate payers.	Spring 2016 stormwater edition included six tips on ways to care for yards in a way that prevents pollutants from entering waterways.		X*	
2. Develop yard maintenance nutrient management program in 2015 and begin implementation in 2016.	Through the Get Grassy! campaign, 237 Columbus residents pledged to maintain their yards and manage nutrients in a way that benefits water quality. Seven lawn care businesses of various sizes were part of developing this campaign and are distributing hot cards to their customers.	X		
3. Publicize City’s yard waste collection/recycling program offered through the Division of Refuse.	<ol style="list-style-type: none"> 1. Publicized recycling tips for homeowners through the Division of Refuse website at: http://www.columbus.gov/RecyColumbus/ while highlighting/promoting the city’s new curbside recycling program through our Facebook page. 2. Publicized yard waste residential collection program through the Division of Refuse website at: http://www.columbus.gov/yardwaste/ 3. Shared several social media reminders about the availability of yard waste collection as well as the benefits to stormwater quality. 	X		

BMP PE4 – Educate Lawn Care Businesses and General Public About Lawn Chemicals and Yard Waste

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Planned Activity for Next Reporting Period:	Continued program development includes: City contribution to an updated OSU Extension Fact Sheet(s) with guidance from The OSU Turfgrass Extension Team which provides science-based information and industry knowledge; further engagement of lawn care companies and program partners to ensure feedback and a continued commitment; relationships with industry and academic partners through exhibitions and attendance at seminars and conferences including local tradeshow by the Ohio Turfgrass Foundation and the Midwest Green Industry Experience; partnerships with Columbus Public Health to distribute information during their lawn mower exchange program at N. Broadway Lowes and look for opportunities for more outreach at this location.			
Discussion:	* Due to the batching process used to mail the utility bills, an exact count of the Spring 2016 insert was not available but it was sent to at least 280,000 customers.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Create opportunities for citizens to participate in the implementation of stormwater activities.

BMP PE5 – Develop and Implement Program Assessment Mechanisms				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Track the number, types and locations of new GreenSpot signups annually and evaluate trends over time.	New GreenSpot businesses fell into these types: 38 offices, education, nonprofits; 17 industrial and commercial; 9 restaurants, grocers, and retail stores. Trends continue: large businesses that participate in the GreenSpot Sustainability Initiative course tend to encourage their employees to become household GreenSpot members.	X		
2. Increase the number of GreenSpot households by 1,500 new signups annually.	2,040 households became GreenSpots.	X		
3. Increase the number of GreenSpot businesses by 10 percent annually.	GreenSpot Businesses increased by 5.2 percent.		X*	
Planned Activity for Next Reporting Period:	In 2017 DPU will re-establish its partnership with FSWCD’s Gardening for Clean Waters program, which DPU staff helped develop in 2012. Objectives include recruitment of nurseries, creation of training materials for garden centers, outreach, and ongoing support and education for nursery employees about stormwater pollution, an onsite store display, and rain garden plant tags. There is room for the program to expand its message to include responsible lawn care, gardening with native plants, and avoiding invasive species.			
Discussion:	* The City fell short of a 10% increase in GreenSpot businesses because resources were devoted to revamping the website which is a recruitment and retention tool that now includes a metrics tracking component for each of our members (i.e., a personalized dashboard). Many businesses that are amiable to sustainability have already signed up as GreenSpots, and any new businesses usually need more time to explore the program before joining. Moving forward, GreenSpot is contacting companies that do business with the city through purchasing and Building and Zoning, encouraging schools, and partnering with MORPC to encourage their members to join. The City will continue offering the business sustainability classes and encouraging existing GreenSpot members to recruit a			

BMP PE5 – Develop and Implement Program Assessment Mechanisms						
Status: Ongoing						
Measurable Goals		Summary of Activity During Reporting Period:		Measurable Goals Achieved?		
				Yes	No	Other
		neighboring business.				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI1 – Opportunity for Public Involvement, Storm Drain Marking Project</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Solicit 150,000 homes for participation into the program via brochure distribution and/or bill inserts.	Distributed bill inserts to more than 280,000 residents.	X		
2. Distribute 300 storm drain markers to volunteer groups per year.	Distributed 635 storm drain markers.*	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* This total includes 350 distributed in November 2015 for an Eagle Scout project completed in 2016. Participation in the program this year was hindered due to a significant delay in acquiring new markers that was caused by a change in the purchasing software used by the City. The new supply finally arrived in late summer, leaving little time for participation in the Fall.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

BMP PI2 – Central Ohio River Pride and Other Waterway Litter Cleanups				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Organize at least one stream or river cleanup per year.	The City organized two cleanups and publicized several others organized by partner organizations.	X		
2. River Pride cleanups will be promoted to at least 150,000 Columbus households to encourage public participation.	Five events were promoted via social media and within the Spring bill insert that was sent to over 280,000 residents. River Pride cleanups were also publicized on the DPU Web site and 614-645-STREAM line.*	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* Publicity of the River Pride program through the billing insert program has become a challenge because local partner agencies are reluctant to commit to cleanup events several months in advance, which is necessary in order to meet the publishing schedule of the Spring bill insert. The City has instead turned to sharing these events and others (including an Earth Day event by Adena Brook and a stream quality monitoring workshop by FLOW) almost exclusively through social media.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

<u>BMP PI3 – Onsite Stormwater Retention</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publicize and provide opportunity for onsite residential stormwater retention activities.	The GreenSpot Backyards program was publicized in the Utility Update, GreenSpot e-newsletter, Franklin Soil and Water newsletters and on DPU, FSWCD, GreenSpot, MORPC and watershed groups' social media outlets.	X		
2. Track number of rain barrels sold through the rain barrel cost share program and rain gardens installed through the GreenSpot Backyards program.	Through the GreenSpot Backyards program, residents received rebates for 182 rain barrels, 65 compost bins, 77 native plants, and 122 native trees.	X		
Planned Activity for Next Reporting Period:	In an effort to regionalize stormwater messaging and other activities, FSWCD's scope of service for 2017 includes reaching-out to developers, contractors and stormwater professionals with education on stormwater management on developing lands and construction sites as well as long-term management of post-construction BMPs.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

<u>BMP PI4 – Pet Waste Collection Bags</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Establish and maintain kiosks in city parks with pet waste bags.	1. 108 pet waste stations were installed in 86 city parks. 2. Nine new pet waste stations were installed at city reservoir park areas, for a total of 15 stations.	X		
2. Distribute pet waste bags for use at city parks.	1. 22,000 pet waste bags were distributed at city reservoir parks. 2. 216,000 pet waste bags were used at city parks.	X		
Planned Activity for Next Reporting Period:	Columbus Recreation and Parks will maintain and service bag dispensers in the 86 city parks.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

<u>BMP PI6 – Watershed and Land Stewardship</u>				
Status: Ongoing, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Perform 400 inspections per year of reservoir landowner properties in the Land Stewardship Program.	297 inspections of reservoir landowner properties under the Land Stewardship Program were conducted.		X*	
2. Make 250 contacts per year to provide information and assistance to reservoir landowners in preparing or complying with a Land Stewardship Agreement.	306 contacts were made to contiguous neighbors regarding the maintenance of City of Columbus reservoir property and the land stewardship program.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	*The number of inspections performed was decreased from previous years due to multiple vacancies throughout 2016.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI7 – Public Hearings and Presentations</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publish public meeting dates and locations on the City’s web site and/or by email/mail subscriber notification.	All Columbus City Council meeting dates are published on the City’s website. Special Council meetings directly involving Public Utilities are also shared via social media. ²	X		
2. Hold at least one public hearing per year or meeting where residents can comment on stormwater services. This may include City Council’s annual hearing on stormwater, sanitary and water rates or meetings between DPU and the Central Ohio Watershed Council to keep information current and answer any questions about water quality concerns.	1. Conducted six public meetings/hearings (one special rate hearing at City Council and five Sewer and Water Advisory Board meetings). 2. DPU director, deputy director, assistant director for sustainability and division administrators met quarterly with members of Central Ohio Watershed Council to share information and answer any questions and concerns.	X		
3. Make available public comment opportunities at City Council meetings.	Public comment opportunities are available at all Columbus City Council meetings, as well as during Council’s annual rates hearing. Public comment is also invited at all Sewer and Water Advisory Board meetings, held at DPU throughout the year.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			

² See Appendix E for list of City Council meeting/hearing dates for 2016.

BMP PI7 – Public Hearings and Presentations

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI8 – GreenSpot</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Inspire and educate residents, businesses and non-profit/community groups on how to live greener, more sustainable lives, including tips on water quality protection, through various outreach efforts.	The GreenSpot outreach/publicity materials included two features in Franklin Soil and Water Conservation District’s newsletter to teachers, direct teacher contact to 100 educators, SWACO’s home page banner slot, tabling and/or presenting at 31 events, and GreenSpotLight awards. 10 classrooms adopted the GreenSpot Kids program. The program distributed more than 500 GreenSpot Kids books (which include water conservation) to first, second, and third graders at events such as Earth Day, FamJam, Neighborhood Pride, and Columbus City Schools Literacy Fair. GreenSpotKids brings sustainability into everyday classroom life for first graders. Posted more than 30 posts on Facebook and Twitter about conserving and protecting water. Created individual dashboards for GreenSpot members to track their water conservation efforts (ex. number of gallons their rain barrel collects, installing water efficient showerheads and aerators).	X		
2. Track the number, types, and locations of new GreenSpot signups annually and evaluate trends over time.	New GreenSpot businesses fell into these types: 38 offices, education, nonprofits; 17 industrial and commercial; 9 restaurants, grocers, and	X		

<u>BMP PI8 – GreenSpot</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
	retail stores. Trends include: large businesses that participate in the GreenSpot Sustainability Initiative course tend to encourage their employees to become household GreenSpot members.			
3. Increase the number of GreenSpot households by 1,500 new signups annually.	2,040 households became GreenSpots.	X		
4. Increase the number of GreenSpot businesses by 10 percent annually.	GreenSpot Businesses increased by 5.2%.		X*	
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* The City fell short of a 10% increase in GreenSpot businesses because resources were devoted to revamping the website which is a recruitment and retention tool that now includes a metrics tracking component for each of our members (i.e., a personalized dashboard). Many businesses that are amiable to sustainability have already signed up as GreenSpots, and any new business usually needs more time to explore the program before joining. Moving forward, GreenSpot is contacting businesses that do business with the city through purchasing and Building and Zoning, encouraging schools, and partnering with MORPC to encourage their members to join. The City will continue offering the business sustainability classes and encouraging existing GreenSpot members to recruit a neighboring business.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI9 – Central Ohio Children’s Water Festival and Other School Programs</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Provide opportunities for children to participate in events annually.	The Central Ohio Children’s Water Festival was held on May 10, 2016.	X		
2. Track the estimated number of participants in children’s events annually.	500 third-graders attended the water festival.	X		
Planned Activity for Next Reporting Period:	The 2017 Central Ohio Children’s Water Festival is scheduled for May 9, 2017.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION
SWMP Component: Hotline

<u>BMP PI10 – 614.645.STREAM Hotline</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Establish a hotline for residents to call to report illicit discharges.	Made hotline available to city residents to report illicit discharges. The hotline phone number is 614.645.STREAM (7873).	X		
2. Publicize hotline in at least one publication each year.	1. Distributed bill inserts in which the hotline number was provided. 2. Publicized hotline number on DPU website and the DPU Facebook page. 3. Storm drain markers applied on inlets bear this hotline number. 4. Information cards and a door hanger educate residents and new City employees on stormwater pollution and prominently display the 614.645.STREAM hotline.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	Informational materials were updated and new storm drain markers purchased to include the area code as mandatory 10-digit dialing became effective in January 2016.			

ILLCIT DISCHARGE

Required SWMP Component: Prohibit Non-Stormwater Discharges

<u>BMP ID1 – Enact and Enforce City Code to Prohibit Non-Stormwater Discharges</u>				
Status: Completed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Review City Code at the beginning of each five-year permit cycle, comparing the codes to EPA permit regulations, and the City will revise the codes as necessary.	Columbus City Code Chapter 1145 currently provides the legal authority to prohibit illicit discharges to the MS4 as well as spills and the dumping or disposing of materials other than stormwater into the MS4; to require compliance with conditions in ordinances, permits, contracts or orders; to inspect operators of construction sites and industrial and commercial activities and to receive and collect necessary information such as stormwater plans and operating procedures, and to effectively respond to violations.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

ILLCIT DISCHARGE
SWMP Component: Mapping

<u>BMP ID2 – Storm Sewer Mapping</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Annually review and update mapping of existing MS4 infrastructure and outfalls.	1. 19 outfalls were added to the City’s inventory during this reporting period. 2. New elements of the City’s storm sewer system were continually added throughout the year as new development and redevelopment plans were reviewed and approved by the City. Refer to the City’s Stormwater Management Plan for more information on the City’s mapping process.	X		
2. Annually review and update, if necessary, the list of HSTSs that have been found to discharge to the City’s MS4.	Field investigations and records research identified 109 HSTSs that discharge to the City’s MS4. ³	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

³ See Appendix F for addresses of known HSTSs that discharge to the City’s MS4.

ILLICIT DISCHARGE

SWMP Component: Illicit Discharge Detection Program

<u>BMP ID3 – Dry Weather Field Screening Procedures and Activities</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update written dry weather field screening procedures.	No changes were warranted to the written dry weather field screening procedures included in the City’s Stormwater Management Plan.	X		
2. Field crews will receive annual training in dry weather field screening procedures.	Stormwater sampling field crews attended three training sessions to review proper screening procedures ⁴ .	X		
3. Dry weather field screen 20% of MS4 outfalls each year.	1. 1,786 outfalls, or 55% of MS4 outfalls, were field screened during this reporting period ⁵ . 2. 292 outfalls exhibited measurable flow during dry weather screening	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	Seven instances of illicit discharges were identified through field screening activities ⁶ .			

⁴ See Appendix G for training summary of City personnel.

⁵ See Appendix H for major outfall dry weather screening results.

⁶ See Section 3.2 for description of illicit discharges identified through dry weather outfall screening.

ILLCIT DISCHARGE

SWMP Component: Illicit Discharge Detection Program

<u>BMP ID4 – Illicit Discharge Investigations</u>				
Status: Ongoing, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review for update, written procedures that describe how to identify and trace illicit discharges and who should be notified in the instance of an illicit discharge, spill, or illegal dumping.	Illicit discharge investigation and reporting procedures were reviewed during this reporting period ⁷ . No changes were warranted this period.	X		
2. Train investigators annually on established procedures for illicit discharge investigation, response, and notification.	Field crews attended five training sessions to review illicit discharge detection and notification procedures ⁸ .	X		
3. Investigate each illicit discharge detected during dry weather field screening.	Seven illicit discharges were found during dry weather screening and all 7 of the illicit discharges were investigated ⁹ .	X		
4. Respond, when notified, to each instance of a spill, illegal dumping, sanitary discharge, failing HSTS discharge, or industrial release per the established procedures.	1. Received 196 reports of illicit discharge from general public.* 2. Responded to 196 reports of illicit discharge as reported by the general public ¹⁰ .	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	*Of the 203 documented reports of illicit discharges, 170 investigations resulted in the identification of an illicit discharge.			

⁷ Written investigation procedures are included in the City's current Stormwater Management Plan.

⁸ See Appendix G for training summary of City personnel.

⁹ See Section 3.2 for more information about these investigations.

¹⁰ See Appendix I for summary of illicit discharge reports and investigations.

ILLCIT DISCHARGE

SWMP Component: Illicit Discharge Detection Program

<u>BMP ID5 – Management of Home Septic Treatment Systems</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Maintain a list of HSTS addresses that can be feasibly connected to the City’s central sanitary sewer system through service lateral installation.	The City utilized the list to issue 97 orders to connect to the sanitary sewer. Twenty-one Notices of Violation were issued to property owners who failed to comply with an order.	X		
2. Inspect all known, off-lot discharging HSTSs annually.	All known, off-lot discharging HSTSs were inspected.	X		
3. Track properties that connect to the City’s central sanitary sewer system.	Thirty-three properties connected to the sanitary sewer system.	X		
4. Track properties that participate in the City’s STEP program.	Twenty-seven applicants received loans through the Septic Tank Elimination Program (STEP) to abandon their HSTS and tie into the City’s sanitary sewer system.	X		
5. Develop a process to identify and prioritize for future sanitary sewer extension areas.	The City completed the prioritization process and developed a list of the top 6 areas. The contract for design of the first area has been awarded.	X		
Planned Activity for Next Reporting Period:	Continue issuing orders to connect (to the central sanitary sewer system) to the owners of properties that are located near an accessible sanitary sewer.			
Discussion:				

ILLCIT DISCHARGE

Required SWMP Component: Illicit Discharge Training, Tracking and Elimination Program

<u>BMP ID6 – Illicit Discharge Tracking and Elimination</u>				
Status: Ongoing, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Train upon hire all new employees on the identification of illicit discharges and proper reporting procedures to the City’s IDDE section.	392 new city employees were presented with information on illicit discharge identification and reporting.	X		
2. Enter results of illicit discharge investigations into tracking database for each illicit discharge investigated.	Added 203 reports of illicit discharge to the City’s tracking databases.	X		
3. Close out/document elimination of illicit discharges in tracking database.	194 instances of illicit discharge reported by the general public and six illicit discharges discovered during dry weather monitoring were closed out documenting that the illicit discharge was eliminated.*		X*	
4. Review annually for update an enforcement action schedule that documents enforcement actions the City will take to eliminate illicit discharges into the City’s MS4.	No changes to the enforcement action schedule were warranted this reporting period.	X		
5. Apply appropriate enforcement actions to eliminate each identified illicit discharge ¹¹ .	1. 35 Notices of Violation were issued. 2. \$7,000 in Administrative Fines were assessed. 3. Other agencies were notified of illicit discharges on 34 occasions.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			

¹¹ See Section 5.1.1 for summary of illicit discharge enforcement actions taken during reporting period.

BMP ID6 – Illicit Discharge Tracking and Elimination

Status:

Ongoing, as needed

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Discussion:	<p>* The City of Columbus and the Ohio EPA are continuing to work with Dicks Cold Storage at 3080 Valleyview Drive to mitigate the sources of illicit discharges for which an NOV was issued in January 2017.</p> <p>The City of Columbus and the Ohio EPA are continuing to work with Birchwood Foods at 1821 Dividend Drive to mitigate the sources of illicit discharges for which an NOV and fine was issued in February 2017.</p> <p>The City of Columbus is continuing to work with Alum Creek Topsoil at 2480 Alum Creek Drive to mitigate the sources of illicit discharges for which an NOV and fine was issued in May 2016.</p>			

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP1 – Construction Site Pollution Prevention Regulation</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Annually review, and revise as needed, the Stormwater Drainage Manual and Erosion and Sediment Pollution Control Regulations.	The City’s Stormwater Drainage Manual (SWDM) requires that all construction activity within the city complies with the requirements of Ohio EPA’s current Construction General Permit or the Erosion and Sediment Pollution Control (ESPC) Regulations, whichever is more restrictive. After an internal review in 2015 identified an opportunity to improve the clarity of its regulations, in 2016 the City began the process to update both the SWDM and ESPC Regulations.			X*
Planned Activity for Next Reporting Period:	The City will continue the process of updating the SWDM and Erosion and Sediment Pollution Control Regulations.			
Discussion:	* The City has selected a consultant to assist with the update of the SWDM and the ESPC Regulations.			

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP2 - Construction Site Pollution Prevention Plan Review and Approval Process</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
The City will review and comment on all submitted construction site pollution prevention plans ¹² .	<ol style="list-style-type: none"> 350 new construction site pollution prevention plans were submitted to the City for review/approval. 350 new construction site pollution prevention plans were reviewed and approved. 	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	Due to multiple reviews of the same plans, the total number of plans reviewed was 527.			

¹² See Appendix J for a list of Construction Site Pollution Prevention Plans that were reviewed.

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP3 – Construction Site Inspection</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update, written procedures that describe how construction inspections are prioritized and performed.	Written construction inspection procedures are presented in the City’s Stormwater Management Plan.	X		
2. Train inspectors annually on established procedures for construction site inspection.	Four construction inspectors attended the 2016 Central Ohio Stormwater and Erosion Control Expo and three attended another training event ¹³ .	X		
3. Perform an inspection at each construction site at least once every four weeks on average. ¹⁴	1. 4,747 construction site inspections were performed. 2. Responded to 31 various storm/SWPPP related reports from the general public. 3. The average number of active construction site inspections per month was 396.	X		
4. Perform a follow-up inspection within 10 days from the date a Construction Inspection Report or formal Request for Voluntary Compliance is issued.	There were 237 construction sites in non-compliant status; 230 were resolved within 10 days.	X		
5. Maintain 85% of construction sites in compliance with the City’s Construction Site Pollution Prevention Regulations.	Over 95% of construction sites inspected were in compliance.	X		
Planned Activity for Next	Meet or exceed measurable goals.			

¹³ See Appendix G for training summary of City personnel.

¹⁴ See Appendix K for construction site visit summary.

BMP CP3 – Construction Site Inspection

Status:

Ongoing, annually

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Reporting Period:				
Discussion:				

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP4 – Tracking and Enforcement</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Update site tracking spreadsheet to include new and active construction sites and add inspection dates, recommended actions, priority, and compliance history for each inspection.	1. 350 construction sites were added to the City’s construction site inventory this reporting period. 2. The total number of new construction sites inventoried as of the end of this reporting period is 350. 3. Added 4,747 inspection results into the City’s tracking spreadsheet.	X		
2. Review annually for update an enforcement action schedule that documents enforcement actions the City will take to ensure construction site compliance with the City’s Erosion and Sediment Pollution Control Regulations.	No changes to the enforcement action schedule were warranted this reporting period.	X		
3. Apply appropriate enforcement actions to achieve compliance with the City’s Erosion and Sediment Pollution Control Regulation ¹⁵ .	1. Seven Notices of Violation were issued. 2. Seven Administrative Fines were assessed for a total of \$6,250.00.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

¹⁵ See Section 5.1.2 for summary of construction enforcement actions taken during reporting period.

POST CONSTRUCTION

SWMP Component: Post-Construction Regulations

<u>BMP PC1 – Post-Construction BMP Requirements</u>				
Status: Ongoing, annually, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review the City’s Stormwater Drainage Manual (SWDM) when necessary based upon comments and regulatory changes received throughout the year. Revise, if necessary, to reflect accepted standard practices in stormwater management and stormwater regulation.	After an internal review in 2015 identified an opportunity to improve the clarity of its regulations, in 2016 the City began the process to update the SWDM.			X*
Planned Activity for Next Reporting Period:	The City will continue the process of updating the SWDM.			
Discussion:	* The City has selected a consultant to assist with the update of the SWDM.			

POST CONSTRUCTION

SWMP Component: Stormwater Pollution Prevention Plan Reviews

<u>BMP PC2 – Stormwater Post-Construction Plan Review and Approval Process</u>				
Status: Complete, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review construction plans and Stormwater Management Reports for all new development or redevelopment projects to ensure implementation of post-construction stormwater BMPs as required by the SWDM.	1. 205 stormwater construction plans were approved, and of those 167 included post-construction BMPs. ¹⁶	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

¹⁶ See Appendix L for a list of approved plans containing post-construction BMPs.

POST CONSTRUCTION

SWMP Component: Long Term Operation and Maintenance of BMPs

<u>BMP PC3 – BMP Maintenance Requirements and Inspection</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Contact and advise the BMP owner of maintenance and reporting responsibilities for each new BMP added to the City’s BMP inventory.	Maintenance and reporting responsibilities are required to be clearly indicated on all plans approved for construction.	X		
2. Inspect each post-construction water quality BMP in the City’s BMP inventory at least once during each permit cycle.	<ol style="list-style-type: none"> 1. 1,833 post-construction water quality BMPs have been constructed to date. 2. Inspected 206 post-construction water quality BMPs for proper maintenance and operation during this reporting period¹⁷. 3. A total of 664 post-construction water quality BMPs have been inspected since the effective date of the current permit. 			In process**
Planned Activity for Next Reporting Period:	Continue work to meet established goals.			
Discussion:	* The City hired a full-time inspector to inspect maintenance of post-construction BMPs in May of 2015. With over a year’s worth of inspection data, the City re-evaluated the post-construction inspection program in December 2016. The data demonstrated that re-inspection, to ensure that noted deficiencies with the BMPs had been satisfactorily addressed, was taking more resources than anticipated. With approximately 100 new water quality BMPs being added each year, projections indicate that additional resources must be applied in order to achieve the measurable goal for inspection of post-construction BMPs.			

¹⁷ Sites where post-construction BMPs were inspected are listed in Appendix M.

POST CONSTRUCTION

SWMP Component: Long Term Operation and Maintenance of BMPs

<u>BMP PC4 – BMP Maintenance Tracking and Enforcement</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Update post-construction BMP database monthly to include new BMPs that are planned and constructed as part of new and redevelopment projects.	1. 431 (planned and constructed) post construction water quality BMPs were added to the post-construction BMP database this reporting period. 2. 2,343 post-construction water quality BMPs that are either planned or constructed have been inventoried as of the end of this reporting period.	X		
2. Enter results of post-construction BMP inspections into tracking database for each BMP inspected.	The post-construction BMP database was updated to include inspection reports for 206 post construction water quality BMPs inspected.	X		
3. Review annually for update an enforcement action schedule that documents enforcement actions the City will take to ensure compliance with the City’s post-construction BMP maintenance requirements.	No changes to the enforcement action schedule were warranted this reporting period.	X		
4. Apply appropriate enforcement actions to ensure post-construction BMP maintenance compliance.	1. 158 inspection reports were sent to BMP owners. 2. No Notices of Violation were issued. 3. No Administrative Fines were issued.	X		
Planned Activity for Next Reporting Period:	Continue work to meet established goals.			
Discussion:				

POLLUTION PREVENTION/GOOD HOUSEKEEPING
Required SWMP Component: List of Municipal Operations

<u>BMP GH1 – Maintain Inventory of Facilities Owned/Operated and Activities Conducted by the City Having Potential to Generate Stormwater Pollution</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Review and update the inventory and GIS coverage annually.	Total number of City O&M facilities currently stands at 82 ¹⁸ .	X		
Compare inventoried facilities to applicability requirements of the Ohio EPA’s Industrial Stormwater Permit upon each 5-year permit renewal period.	Six facilities have been identified as requiring industrial permit coverage.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	<ol style="list-style-type: none"> 1. The Facilities Management facility at 640 Nationwide Boulevard was abandoned in 2016 and has been removed from the City’s O&M inventory. 2. During review by an outside consultant, the Police Helipad facility at 2130 West Broad Street was identified as having operations that require coverage under the MSGP. Work to obtain coverage will be performed in 2017. 			

¹⁸ See Appendix N for current list of City facilities that conduct activities having stormwater pollution potential.

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH2 - Develop and Implement Pollution Prevention Practices for City Facilities/Activities</u>				
Status: Complete, ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Submit Notices of Intent and prepare Stormwater Pollution Prevention Plans (SWPPPs) or submit No Exposure Applications to OEPA for Tier I city facilities ¹⁹ that require coverage under OEPA’s Industrial Stormwater Permit Program.	General permit confirmation letters were issued to six city-operated facilities by Ohio EPA during the 2012 reporting period ²⁰ .	X		
2. Maintain and distribute written pollution prevention practices and materials online to representative of operating City departments.	The online repository of written pollution prevention practices and materials was reviewed and no changes were warranted.	X		
3. Incorporate written pollution prevention practices into SWPPPs for Tier II city facilities ²¹ .	SWPPPs have been prepared for 74 of the 76* Tier II facilities as of the end of this reporting period.			In Process**
4. Continue to implement pollution prevention practices at City-owned and operated O&M facilities that include maintenance of spill kits at City refueling facilities and covering of materials stored outdoors where warranted.	The City continued to implement pollution prevention practices at its O&M facilities. The inspections performed at 36 facilities indicated that practices are being performed.		X***	
Planned Activity for Next	Prepare and submit NOI for one Tier II facility that has been identified as needing coverage under			

¹⁹ Tier I facilities are defined as those facilities that require coverage under an Industrial Stormwater NPDES permit or No Exposure Certification.

²⁰ See Appendix N for industrial permit numbers for regulated City facilities.

²¹ Tier II facilities are defined as those facilities that do not require coverage under an Industrial Stormwater NPDES permit or No Exposure Certification but still have the potential to generate stormwater pollution.

BMP GH2 - Develop and Implement Pollution Prevention Practices for City Facilities/Activities

Status:

Complete, ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Reporting Period:	the NPDES program. Continue evaluation of facilities and develop SWPPPs for those that require them.			
Discussion:	<p>* During review by an outside consultant, the Police Helipad facility was identified as having operations that require coverage under the MSGP. Work to obtain coverage will be performed in 2017.</p> <p>** Using the Department of Public Utilities' EMS as a template, the Division of Fleet Management continues to work with other City departments to develop an EMS targeted at fleet maintenance operations. Development of new SWPPPs and updates to existing SWPPPs are part of the EMS initiative. The City remains committed to enhancing protection of water resources through compliance with stormwater regulations and improvement of the maintenance and operation of City facilities.</p> <p>*** The City did not perform annual inspections at each O&M facility this reporting period due to personnel turnover. The City continues to evaluate methods to ensure that the responsibilities for stormwater pollution prevention practices are met by each city department.</p>			

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH3 – Street Cleaning</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Continue to incorporate high efficiency sweepers (PM-10 street sweeping equipment) into the City’s street sweeping inventory.	No new sweepers were purchased during this reporting period. ²²			N/A
2. Sweep each curbed city street at least twice per year. Track and report total lane miles sweep annually.	1. Each curbed street was swept at least twice. 2. 17,281 miles of streets were swept.	X		
3. Collect and dispose of all debris and litter collected from street sweeping and roadside litter pick up operations at a sanitary landfill. Track and report total tonnage of material collected and disposed each year.	56,659 ²³ tons of debris and litter were collected and disposed.	X		
4. Continue to implement existing practices to reduce stormwater pollution from storage of materials collected during street sweeping operations and incorporate permanent structural controls when and where feasible.	The Transportation Division hauls debris to the transfer stations (Morse Road and Jackson Pike) or directly to the landfill. Debris that must be temporarily stored at each outpost is kept to a minimum and within a containment area prior to final disposal on a weekly basis.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

²² See Appendix O for the list of the City’s current street sweeper inventory.

²³ The 2015 Annual Report reported that 11,020 tons of debris and litter was collected and disposed. The actual amount of debris and litter collected in 2015 was 38,304 tons.

POLLUTION PREVENTION/GOOD HOUSEKEEPING
Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH4 – Deicing and Snow Removal</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Continue to store all de-icing material stockpiles under roof or otherwise to prevent materials from entering stormwater runoff.	City stored all deicing materials in six salt barns.	X		
2. Annually calibrate salt spreaders to meter the minimum amount of material for public safety.	All 87 trucks used for de-icing operations and snow removal were calibrated for minimum salt application.	X		
3. Provide training annually to city staff performing de-icing operations to ensure that the established BMP procedures are followed and the minimum amount of de-icing materials is applied to ensure public safety.	266 city employees were trained on proper salt application techniques at City’s Snow Warriors training session.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH5 – Refuse Collection</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Collect and dispose of refuse weekly and recycled materials biweekly from household within the city.	1. 306,315 tons of refuse was collected and disposed of through the City’s curbside collection program. 2. 32,924 tons of recycling was collected and disposed of from residents through the City’s curbside collection program.	X		
2. Coordinate at least one neighborhood refuse collection campaign per year.	1. 425 neighborhood litter cleanups were conducted. 2. 367,622 pounds of refuse was collected and disposed.	X		
3. Collect yard waste from single-family residential households biweekly.	21,066 tons of yard waste from city residents was collected and composted.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Stormwater Facility Maintenance

<u>BMP GH6 – Stormwater Infrastructure Inspection, Tracking, and Maintenance</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Inspect 10,000 catch basins/inlets annually for cleaning.	1. 10,120 catch basins/inlets were inspected 2. 4,631 catch basins/inlets were cleaned	X		
2. Televis 15,000 lineal feet storm sewer annually.	26,316 lineal feet of storm sewers were televised.	X		
3. Clean 50,000 feet of storm sewer pipe per year.	130,930 feet of storm sewer pipe was cleaned.	X		
4. Inspect all stormwater pump stations at least once quarterly.	1. Each pump station was inspected 38 times during the reporting period. 2. Seven storm water pump stations were cleaned this reporting period.	X		
5. Inspect, clean, mow, or otherwise maintain all DOSD stormwater detention/retention basins at least once annually.	All 28 stormwater detention/retention basins are being maintained. Preventative maintenance routes for trash rack and/or sluice gate maintenance/inspection have been established. Mowing contract also in place.	X		
6. Inspect/clean all DOSD maintained trash racks at least twice annually.	1,406 trash rack inspections were conducted. 66 trash rack cleanings were performed.	X		
7. Clean 30,000 lineal feet of drainage ditches annually.	31,644 feet of drainage ditches were cleaned.	X		
8. Maintain and update a database to track regular stormwater facility inspection and maintenance.	1. Sewer Maintenance Operations (SMOC) used the Oracle Utilities Work and Asset Management application to track maintenance and inspection activities	X		

BMP GH6 – Stormwater Infrastructure Inspection, Tracking, and Maintenance

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
	involving the collection system. 2. The City tracked the completion of over 9,043 storm, sanitary, and combined collection system maintenance activities in the Oracle application.			
9. Follow written pollution prevention (P2) practices for stormwater system maintenance activities.	The written P2 practices for stormwater maintenance included in the SWPPP for the City’s Sewer Maintenance Operations facility are followed when performing maintenance activities.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

POLLUTION PREVENTION/GOOD HOUSEKEEPING
Required SWMP Component: Training and Education

<u>BMP GH7 - Employee Stormwater Pollution Awareness Training</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period²⁴:	Measurable Goals Achieved?		
		Yes	No	Other
1. All new City employees undergoing orientation will receive information on stormwater pollution awareness.	392 new city employees were presented with information on stormwater pollution.	X		
2. All new city employees undergoing orientation will be informed of the need and phone number to report illicit discharges.	392 new city employees were presented with information on illicit discharge identification and reporting.	X		
3. City employees that conduct activities at city Tier I and Tier II sites will be trained on elements of their respective stormwater pollution prevention plans annually.	1. 339 employees were trained at Tier I facilities. 2. 696 employees were trained at Tier II facilities.		X*	
4. Conduct updated training refresher once every permit term for personnel responsible for overseeing the implementation of P2 practices at City Tier I and Tier II sites.	Training was provided to responsible persons when the City's written P2 practices were updated in 2013.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* The City expects to provide training to employees at all facilities in 2017.			

²⁴ See Appendix G for summary of City training sessions conducted this reporting period.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Inventory of Industrial Facilities

<u>BMP IF1 – Prepare Inventory of Industrial Facilities</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Maintain a list of industries that have the potential for meeting the definition of 40 CFR 122.26(b)(14).	The City continued to maintain its database of industries.	X		
2. Update the City’s inventory annually based on: <ul style="list-style-type: none"> a. NOIs submitted as part of Stormwater Management Plans, b. New industries identified within the Daily Reporter publication, c. Industries identified through recent illicit discharge and detection investigations d. New industries identified under the Industrial Waste Pretreatment Group, and e. Review of lists of permitted/no exposure qualifying industries maintained by Ohio EPA. 	Inventory updated this period. Current total number of industrial sites in the City’s inventory is 868.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	The total number of industries in the City’s inventory decreased due to a large number of facility closures.			

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspection Schedule and Inspection Form

<u>BMP IF2 – Acquisition, Review, and Tracking of Permit Information, Stormwater Pollution Prevention Plans, and Industrial Monitoring Data</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Contact Ohio EPA and newly identified industries at least once each year to request: <ul style="list-style-type: none"> a. OEPA NPDES permit numbers or Notices of Intent forms, b. OEPA No Exposure Certification numbers, c. Stormwater Pollution Prevention Plans (SWPPPs), d. Stormwater monitoring data. 	1. In response to contacts made by the city to date, the City has the following documents actively on file: <ul style="list-style-type: none"> a. 125 Notices of Intent and 125 OEPA NPDES permit numbers b. 360 No Exposure Certifications 2. 25 SWPPP plans were reviewed during this reporting period. 3. Monitoring data for 5 industries was received this reporting period 4. Procured copy of list of industrial permit holders from Ohio EPA; incorporated data into the industry list.	X		
2. Update classifications of Category 1 and Category 2 industries annually. ²⁵	1. 361 Category 1 industries have been identified ²⁶ . 2. 507 Category 2 industries have been identified ²⁷ .	X		

²⁵ Industries that cannot show proof of NPDES permit coverage or No Exposure Certification by Ohio EPA or the industrial operator will be classified as Category 1 industries. Industries will be classified as Category 2 industries if Ohio EPA or the industrial operator can show proof of coverage under an industrial NPDES permit or no exposure certification by Ohio EPA and discharge to the City’s MS4. Once a Category 1 industry obtains permit coverage, the industry will be reclassified as Category 2.

²⁶ See Appendix P for list of Category 1 Industries.

²⁷ See Appendix Q for list of Category 2 Industries.

BMP IF2 – Acquisition, Review, and Tracking of Permit Information, Stormwater Pollution Prevention Plans, and Industrial Monitoring Data

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
3. Maintain a hard copy file for SWPPPs and monitoring data received for each Category 2 industrial facility.	Hard copy files are available and located at the City's Division of Sewerage and Drainage, 1250 Fairwood Ave., Columbus, Ohio.	X		
Planned Activity for Next Reporting Period:	<ol style="list-style-type: none"> 1. Meet or exceed measurable goals. 2. Follow-up with Ohio to acquire NOI's, General Permit confirmation numbers, and No Exposure application and certification letters during the 2017 reporting period. 3. Acquire monitoring data for Category 2 industries during the 2017 reporting period. 			
Discussion:	The lists of Category 1 and Category 2 facilities includes some that are believed to be closed and no longer in operation but additional review is required to verify before these facilities are removed from the inventory. As verification of closure is made the facility will no longer be included in the Category lists.			

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspection Schedule and Form

<u>BMP IF3 – Establish Industrial Facility Inspection Schedule</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Evaluate and prioritize industries for inspections annually.	<ol style="list-style-type: none"> 1. 107 Category 1 and 179 Category 2 industries have been prioritized based on a “High” rating of illicit discharge potential²⁸. 2. 67 Category 1 and 86 Category 2 industries have been prioritized based on a “Medium” rating of illicit discharge potential. 3. 180 Category 1 and 232 Category 2 industries have been prioritized based on a “Low” rating of illicit discharge potential. 4. 7 Category 1 and 10 Category 2 industries could not be prioritized since SIC numbers are unknown. 	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

²⁸ High, low, and medium illicit discharge potentials are assigned to each industry based on information provided in Appendix A of the Illicit Discharge and Detection and Elimination, A Guidance Manual for Program Development and Technical Assessments, developed in cooperation with the Center for Watershed Protection and Robert Pitt with the University of Alabama.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspection Schedule and Form

<u>BMP IF4 –Industrial Facility Inspection Form</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Review annually for update, the Stormwater Industrial Site Inspection form.	The Stormwater Industrial Site Inspection form was reviewed and no changes were made.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspections

<u>BMP IF5 – Staff Training</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Implement routine training programs for employees that perform industrial site inspections.	The City’s industrial stormwater inspectors participated in 5 training opportunities related to industrial activities this reporting period. ²⁹	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:	Training taken in 2016 represented more in-depth analysis of commonly encountered site issues that built upon past training that provided a foundation for the inspectors.			

²⁹ See Appendix G for details of City training sessions conducted this reporting period.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspections

<u>BMP IF6 – Industrial Facility Inspections</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update, written procedures that describe how industrial inspections are performed.	The written industrial inspection procedures contained in the City’s Stormwater Management Plan were reviewed and found to be up-to-date.	X		
2. Review the SWPPPs of each permitted industry inspected.	The SWPPPs for 25 permitted industries were reviewed as part of an inspection. ³⁰	X		
3. Inspect each Category 1 and Category 2 industry at least once within the City’s MS4 5-year permit cycle.	1. 158 inspections were conducted at Category 1 industrial facilities ³¹ . 2. 138 inspections were conducted at Category 2 industrial facilities ³² .			X*
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* The City is on pace to inspect each Category 1 and Category 2 industry during the current permit cycle which ends April 30, 2017.			

³⁰ Not all industries are required to obtain permit coverage.

³¹ See Appendix P for Category 1 industrial inspection dates.

³² See Appendix Q for Category 2 industrial inspection dates.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspections

<u>BMP IF7 – Industrial Facility Inspection Tracking and Enforcement</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Enter results of industrial inspections into the tracking database for each industry inspected.	Inspection information for 296 industrial inspections were added to the City’s tracking database.	X		
2. Apply appropriate enforcement actions to eliminate potential pollution problems identified at industrial sites.	1. Five instances of suspected illicit discharge to the MS4 were observed during industrial inspections. ³³	X		
3. Document and forward to Ohio EPA observed violations of Ohio EPA’s industrial stormwater permit.	1. 296 inspection reports were issued to industry operators during this reporting period. 2. 20 reports of suspected violation of an operator’s permit were submitted to the Ohio EPA.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	The number of inspections performed in 2016 was down slightly (15%) from the previous year due to the loss of one inspector for one-third of the year.			

³³ See Appendix I for summary of illicit discharge reports and investigations.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Monitoring Industrial Sites

<u>BMP IF8 – Monitoring and Sampling of Industrial Sites</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update, written procedures that identify constituents of concern and when industrial facilities are required to monitor stormwater discharges.	The written procedures outlining industrial monitoring strategies included in City’s Stormwater Management Plan were reviewed and found to be up-to-date.	X		
2. Respond, when notified, to each instance of an industrial release per established procedures.	The City responded to 8 notifications of a suspected industrial release.	X		
3. Review and file stormwater monitoring and sampling reports submitted by industrial operators.	Monitoring reports from 5 Category 2 industries were reviewed by the City.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

SECTION 3 – SUMMARY AND ANALYSIS OF COLLECTED INFORMATION

Information provided in this section was generated by the wet weather and dry weather outfall monitoring programs that were conducted from January 1, 2016 to December 31, 2016. A summary of activities and findings associated with development and implementation of the city-wide wet weather monitoring program is provided in Section 3.1. A summary and elimination status for illicit discharges detected under the City's dry weather outfall monitoring program is summarized in Section 3.2.

3.1 Summary of City-Wide Wet Weather Monitoring Activities

The goal of the City's wet weather sampling program was to collect samples at three locations throughout the City of Columbus during each quarter of 2016. The three locations selected for sampling were outfalls that are located downstream of land uses representing residential, commercial and industrial development. Analysis of the samples obtained from all three locations was performed by MASI Environmental Laboratories (MASI) and the Columbus Surveillance Laboratory. A full report on the City's wet weather monitoring activities and findings this reporting period can be found in city-wide monitoring report located in Appendix R.

Five sampling locations throughout the City representing medium density residential, high density residential, multi-family residential, commercial, and industrial land uses were monitored under permit No. 4PI00000*BD. The wet weather water quality data from these sites were thoroughly analyzed and reviewed. In an effort to further characterize overall water quality of the City's MS4, the City identified the three new sampling locations referenced above. In 2013 the City began monitoring the three new sampling locations in lieu of the previous five locations that were monitored in past years.

The City was able to collect samples at each of the three outfalls during all four quarters of 2016. The samples were analyzed by MASI and city laboratories for the following parameters:

MASI parameters

- Fecal coliform (#/100 ml)
- E. coli (#/100 ml)
- Nitrite (NO₂) (mg/l)
- Total Phosphorous (mg/l)
- Orthophosphate (mg/l)
- Carbonaceous biochemical oxygen demand (CBOD₅) (mg/l)
- Biochemical oxygen demand (BOD₅) (mg/l)
- Chemical oxygen demand (COD) (mg/l)

The Columbus Surveillance Laboratory parameters

- Total suspended solids (TSS) (mg/l)
- Ammonia (NH₃) (mg/l)
- Alkalinity (mg/l)
- Oil & grease (mg/l)
- Total cyanide (µg/l)

- Hardness (mg/l)
- Total recoverable cadmium (Cd) (µg/l)
- Total recoverable chromium (Cr) (µg/l)
- Total recoverable copper (Cu) (µg/l)
- Total recoverable lead (Pb) (µg/l)
- Total recoverable nickel (Ni) (µg/l)
- Total recoverable zinc (Zn) (µg/l)

3.1.1 Findings Summary

2016 sample results were compared to values provided in the National Stormwater Quality Database (NSQD) to determine how concentrations of constituents at Columbus outfalls compared to national datasets. 2016 results were also compared with sampling results obtained from 2007 through 2015 to determine if sample results collected across similar land uses from other parts of the City are different. A summary of these comparisons is presented below.

Comparison of Outfall Monitoring Data to NSQD Data

With the following exceptions, the 2016 City sampling values at the three sampling locations are generally consistent with national datasets. The following is a summary of notable differences between the NSQD and sample results collected at the three outfall locations:

- Fourth quarter Ammonia levels were higher than NSQD 75th percentile for all sites sampled.
- BOD levels in residential areas were higher than the NSQD 75th percentile.
- Analyte values for lead and nickel are consistently lower than the median and 25th percentile values of the NSQD data for each sampling site.
- Bacteria levels were significantly higher than the NSQD 75th percentile during the second, third, and fourth quarters at each sampling location.

CBOD5, alkalinity, and nitrite were not included in the comparisons because less than 100 events were available within the NSQD.

Comparison of Outfall Monitoring Data to 2007 through 2015 Sampling Results

Comparison with the average event mean concentrations for years 2007 through 2015 reveals the following observations:

- The comparisons of 2016 data for Fecal Coliform and E. Coli bacteria parameters, both, are significantly higher than previous years. These results are attributed to antecedent rainfall periods that are 50 to 100 percent longer than in the previous three years.
- Residential areas exhibit higher levels of CBOD5 and BOD5 in 2016 than previous years.

3.2 Illicit Discharge Detection and Elimination/Dry Weather Monitoring

As part of its Illicit Discharge Detection and Elimination (IDDE) program, the City conducted dry weather monitoring at stormwater outfalls during the January 1, 2016, to December 31, 2016, reporting period to identify the presence of illicit discharges in the City's storm sewer system. The City also investigated reports of illicit discharges into the City's storm sewer system received from the community. A full description of the activities conducted under the IDDE programs during the reporting period is provided in Section 2. The results of the dry weather outfall monitoring program are located in Appendix H, whereas a summary of illicit discharges confirmed as a result of dry weather outfall monitoring during the January 1, 2016, to December 31, 2016, reporting period are provided below.

- An illicit discharge was detected during this reporting period at city outfall No. 0080T0230. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline in Upper Arlington. The discharge was reported to the City of Upper Arlington Division of Water for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0660T0498. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline. The discharge was reported to the City of Columbus Division of Water for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0072T0857. The discharge had high levels of detergents and ammonia. Investigation revealed that the discharge was caused by a residents sump pump located in Franklin County. The discharge was reported to the Franklin County Health Department for resolution.
- An illicit discharge was detected during this reporting period at city open channel No. OL 169. The discharge had high levels of ammonia and detergents. Investigation revealed that the discharge was caused by a failing septic system that was located in Franklin County. The discharge was reported to the Franklin County Health Department for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0301T0210. The discharge was cloudy. The investigation was unable to reveal the source of discharge.
- An illicit discharge was detected during this reporting period at city outfall No. 0078T0387. The discharge showed high levels of ammonia. Investigation revealed that the source of discharge was from Dick Cold Storage. The discharge was reported to the Ohio Environmental Protection Agency and an NOV was issued in January 2017. The City is working with Dick Cold Storage as they continue their investigation of the source of the illicit constituents.
- An illicit discharge was detected during this reporting period at city outfall No. 0250T0734. The discharge was cloudy with silt from a water line replacement project. Investigation revealed that the source of discharge was from Underground Utilities, Inc. A Notice of Violation was issued.

SECTION 4 – REVISIONS TO ASSESSMENT OF CONTROLS AND FISCAL ANALYSIS

There are no revisions necessary to the assessment of controls as implemented under the present permit.

Funds generated by the City of Columbus Stormwater Utility are used to cover all costs for Compliance with the NPDES permit and the City’s stormwater Capital Improvements Program. The utility fee is collected from residential and non-residential customers. In 2016, a residential customer was charged one Equivalent Residential Unit (1 ERU = 2000 sq. ft) equal to \$0.1515 (effective 01/01/2016) per day for an average annual cost (365 days x \$0.1515) of \$55.30. Non-residential customers pay the same ERU rate based on their total impervious area. The following table contains expenditures for the NPDES program during the reporting period.

Category	Cost
Personnel	\$1,617,489.49
Materials & Supplies	\$12,464.28
Services	\$10,134,974.49
Street Cleaning	\$8,863,116.90
Pro Rata Charges	\$1,827,448.75
Debt Principal	\$9,660,800.00
Other Expenditures	\$61,545.87
Capital Outlay	\$0.00
Interest on Debt	\$3,977,989.15
Total Costs:	\$36,155,820.93

SECTION 5 – SUMMARY OF ENFORCEMENT, INSPECTIONS, PUBLIC EDUCATION, AND EMPLOYEE TRAINING

In addition to many other requests for service, SRMS and SMOC personnel made 203 investigations of reported or suspected illicit discharges and spills to the MS4 during the January 1, 2016 to December 31, 2016 reporting period. There were thirteen cases where SRMS notified the Ohio EPA of an active illicit discharge to Waters of the State. The appropriate Health Department (City or County) was notified in fourteen cases involving discharges from a home sewage disposal system. There were nineteen cases where SRMS notified the City of Columbus Division of Water about active water leaks discharging to Waters of the State. There were four investigations that were forwarded to the Franklin County Environmental Sheriff's Office for criminal prosecution. SRMS also conducted a total of 4,747 construction site inspections, 296 industrial inspections, and 158 site inspections for post-construction BMP maintenance during the January 1, 2016, to December 31, 2016, reporting period.

5.1 Summary of Enforcement Actions

Enforcement action was taken by the City if a violation is observed and a responsible party is identified. Typically the responsible party is notified, the violation is stated and a request is made that immediate steps be taken to cease, prevent, control, and clean up pollutant sources that are, or may, be discharged into stormwater runoff. The SRMS issued 42 Notices of Violation (NOV) during the last reporting period. When a Notice of Violation is sent to the responsible party, an explanation of discharge and a Remedial Action Plan to prevent future occurrences is required. Requests for Voluntary Compliance are issued either verbally or written when the discharge or potential discharge is considered minor in nature and is immediately ceased.

5.1.1 Notices of Violation, Illicit Discharge

Summaries of the City's 35 Notices of Violation for illicit discharges during the January 1, 2016, to December 31, 2016, reporting period are provided below. Discharges from industrial facilities subject to 40 CFR 122.26(b)(14) are noted.

- | | |
|---------|--|
| 1/21/16 | Notice of Violation issued to Steiner for allowing grease from the trash compactor to enter the storm sewer. |
| 1/22/16 | Notice of Violation issued to MCSP, Inc. for washing equipment and allowing the wastewater to enter into the storm sewer system. |
| 2/9/16 | Notice of Violation issued to McDonalds at 1661 Morse Road for discharging wastewater from power washing to enter into the storm sewer system. |
| 3/23/16 | Notice of Violation issued to Greater Columbus Convention Center for dumping floor scrubbing machine wastewater into the City's MS4. |
| 3/31/16 | Notice of Violation issued to Underground Utilities Inc. for allowing silt to enter into the City's MS4. |
| 4/22/16 | Notice of Violation issued to Ernst Concrete for performing a concrete washout and allowing wash water to enter the City's MS4. |

- 4/26/16 Notice of Violation issued to Elford Asset Management for allowing wastewater from outdoor power washing activities to enter into the City's MS4.
- 5/5/16 Notice of Violation issued and Administrative Fine (\$1,000) to Alum Creek and 104 Topsoil for allowing mud from vehicle tracking to enter into the City's MS4.
- 5/9/16 Notice of Violation issued to Tom House for allowing wastewater from tool washing activities to enter into the City's MS4.
- 5/10/16 Notice of Violation issued to Southeastern Industrial Painting and Supply for discharging wastewater from power washing activities into the storm sewer.
- 5/11/16 Notice of Violation issued to New Victorians Property Management for allowing silt/dirt from a construction site to enter into the storm sewer.
- 5/17/16 Notice of Violation issued to Old Skool Construction for performing a concrete washout and allowing wash water to enter the City's MS4.
- 5/17/16 Notice of Violation issued to Perfectscapes LLC for washing vehicles without inlet protection and allowing wash water to enter the City's MS4.
- 5/20/16 Notice of Violation issued to Jim Oxley Concrete for performing a concrete washout and allowing wash water to enter the City's MS4.
- 6/7/16 Notice of Violation issued to John Rumph for allowing wastewater and sewage to discharge into the City's MS4.
- 6/16/16 Notice of Violation issued to William Benson for allowing wastewater from a washing machine and kitchen sink to discharge into the City's MS4.
- 6/21/16 Notice of Violation issued to Two Brothers Wine and Spirits for dumping grout into the storm sewer system.
- 8/25/16 Notice of Violation issued and Administrative Fine (\$2,000) to S & ME Inc. for performing drilling activities on two occasions without inlet protection and allowing wastewater to enter the City's MS4.
- 7/21/16 Notice of Violation issued to Scioto Ready Mix for allowing wastewater from concrete activities to enter into the storm sewer.
- 8/10/16 Notice of Violation issued to #1 Plumbing Repair for allowing wastewater from concrete activities to enter into the City's MS4.

- 8/25/16 Notice of Violation issued and Administrative Fine (\$1,000) to Ohio Concrete Sawing and Drilling for performing saw cutting activities and allowing wastewater to enter the storm sewer.
- 8/27/16 Notice of Violation issued to CAZ Cleaning Service for outdoor power washing activities without inlet protection and allowing wash water to enter the City's MS4.
- 9/1/16 Notice of Violation issued to Los Guachos Taqueria at 5221 Godown Road for washing grease and wastewater into the storm sewer.
- 9/1/16 Notice of Violation issued to Tuyo Y Mio at 3408 East Main Street for dumping grease and wastewater into the storm sewer.
- 9/1/16 Notice of Violation issued to Brotherly Love Ent, LLC for dumping grease and wash water into the MS4.
- 9/9/16 Notice of Violation and Administrative Fine (\$1,000) issued to Quality Masonry for outdoor washing activities and allowing wash water to enter the City's MS4.
- 9/9/16 Notice of Violation issued to The Kroger Company for pumping septic water into the City's MS4.
- 9/29/16 Notice of Violation issued to Ginos Concrete for performing a concrete washout and allowing wash water to enter the City's MS4.
- 10/27/16 Notice of Violation issued to Janardhan N. Banglalore at 1017 Joos Avenue for allowing silt to enter into the City's MS4.
- 11/18/16 Notice of Violation issued and Administrative Fine (\$1,000) to Birchwood Foods for allowing grease to enter into the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 12/1/16 Notice of Violation and Administrative Fine (\$1,000) issued to Custom Sign Center Inc. at 3200 Vallview Drive for discharging wastewater from water jet process into the storm sewer. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 12/1/16 Notice of Violation issued to University Village Apartments at 2981 Olentangy River Road for washing vehicles without inlet protection and allowing wash water to enter the City's MS4.
- 12/5/16 Notice of Violation issued to Ernst Concrete Plant for allowing slurry to enter into the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14).

12/5/16 Notice of Violation issued to Peking Dynasty at 1773 West Fifth Avenue for pumping wastewater from a sump pump into the City's MS4.

5.1.2 Notices of Violation, Erosion and Sediment Pollution Control

Seven Notices of Violation were issued to property owners and/or contractors for non-compliance with the City of Columbus construction site pollution prevention requirements during the January 1, 2016, to December 31, 2016, reporting period. Summaries of these Notices of Violation are provided below:

- July 18, 2016 NOV and Administrative Fine (\$1,000) to Romanelli & Hughes Building Company for failure to maintain construction best management practices on two separate occasions and locations; along Denbigh Drive between Francisco Glenn Drive and Denbigh Court and along Denbigh Drive between Denbigh Court and Bradshire Drive.
- August 29, 2016 NOV and Administrative Fine (\$250) to Terrace Place, LLC for non-compliance and failure to maintain construction best management practices at CHN Terrace Place Construction site (CC-17123)
- September 29, 2016 NOV and Administrative Fine (\$1,000) to Spires Holdings, LLC (Buckeye Nissan) for pumping turbid (muddy) water at Growcar, 1260 Auto Mall Drive, CC-17309.
- December 9, 2016 NOV and Administrative Fine (\$1,000) to Romanelli & Hughes Building Company for illicit pumping activity at Francisco Glen, 2299-E.
- December 12, 2016 NOV and Administrative Fine (\$1,000) to Maronda Homes for illicit pumping activity at Hunter's Glen (Section 1) to the City's MS4.
- December 20, 2016 NOV and Administrative Fine (\$1,000) to Romanelli & Hughes Building Company for illicit discharge and continued violation for failure to submit a Remedial Action Plan for concrete pumping activities to the MS4. The violations were: November 30, 2016 at east curb line of Denbigh Court near the entrance of Lot #48 where evidence of concrete disposal was observed; and on July 18, 2016 a NOV was written for a violation observed May 4 and June 26, 2016 for illicit concrete discharges into the City's MS4.
- January 6, 2017 NOV and Administrative Fine (\$1,000) to Freedom Utilities for illicit pumping activity at 5080 Sinclair Road (occurred November 29, 2016).

5.1.3 Notices of Violation, Post-Construction BMP Maintenance

No Notices of Violation were issued to property owners for non-compliance with the post construction BMP maintenance requirements during the January 1, 2016, to December 31, 2016, reporting period.

5.2 Summary of Public Education and Employee Training Programs

The City of Columbus recognizes that public education and participation and employee education programs that provide information, resources and engagement opportunities to residents, business owners, and city employees can result in improved water quality. The following summarizes stormwater public and employee education opportunities that were provided in 2016.

5.2.1 Public Education and Outreach Summary

The City's stormwater public education and outreach programs are focused on the following topics:

1. Residential: pet waste; yard maintenance; and methods of keeping stormwater onsite.
2. Industrial/commercial: water quality impacts associated with land development; the importance of good housekeeping; and fats, oil, and grease.

In 2016, the PUP campaign emphasized proper disposal of pet waste. A pet waste bag dispenser that attaches to a leash was given to those who pledged to pick up after their dog. PUP outreach included the department's website and Facebook page, the GreenSpot Facebook page, and the Utility Update bill insert. Signage was installed in early 2016 at 86 City parks and in the park land around our three reservoirs.

Get Grassy!, the City's yard maintenance program, was implemented in 2016. Seven lawn care companies with a total customer base of nearly 36,000 helped distribute messaging that meets residents where they are and encourages them to take the next step in managing lawns in a way that will protect water quality.

Stormwater investigators created magnets for distribution with the KNOW (Keeping Near Our Waters) message that directs residents to call 614.645.STREAM to report water pollution. Other City agencies were educated on the KNOW program.

The 2016 stormwater edition of the Utility Update bill insert publicized 614.645.STREAM and contained information on lawn care, outdoor cleaning, pet waste disposal, river clean-ups, storm drain marking and other volunteer activities as well as programs that offer tools to help protect stormwater such as PUP, Get Grassy! GreenSpot Backyards and Branch Out Columbus, the City's effort to plant 300,000 trees by 2020.

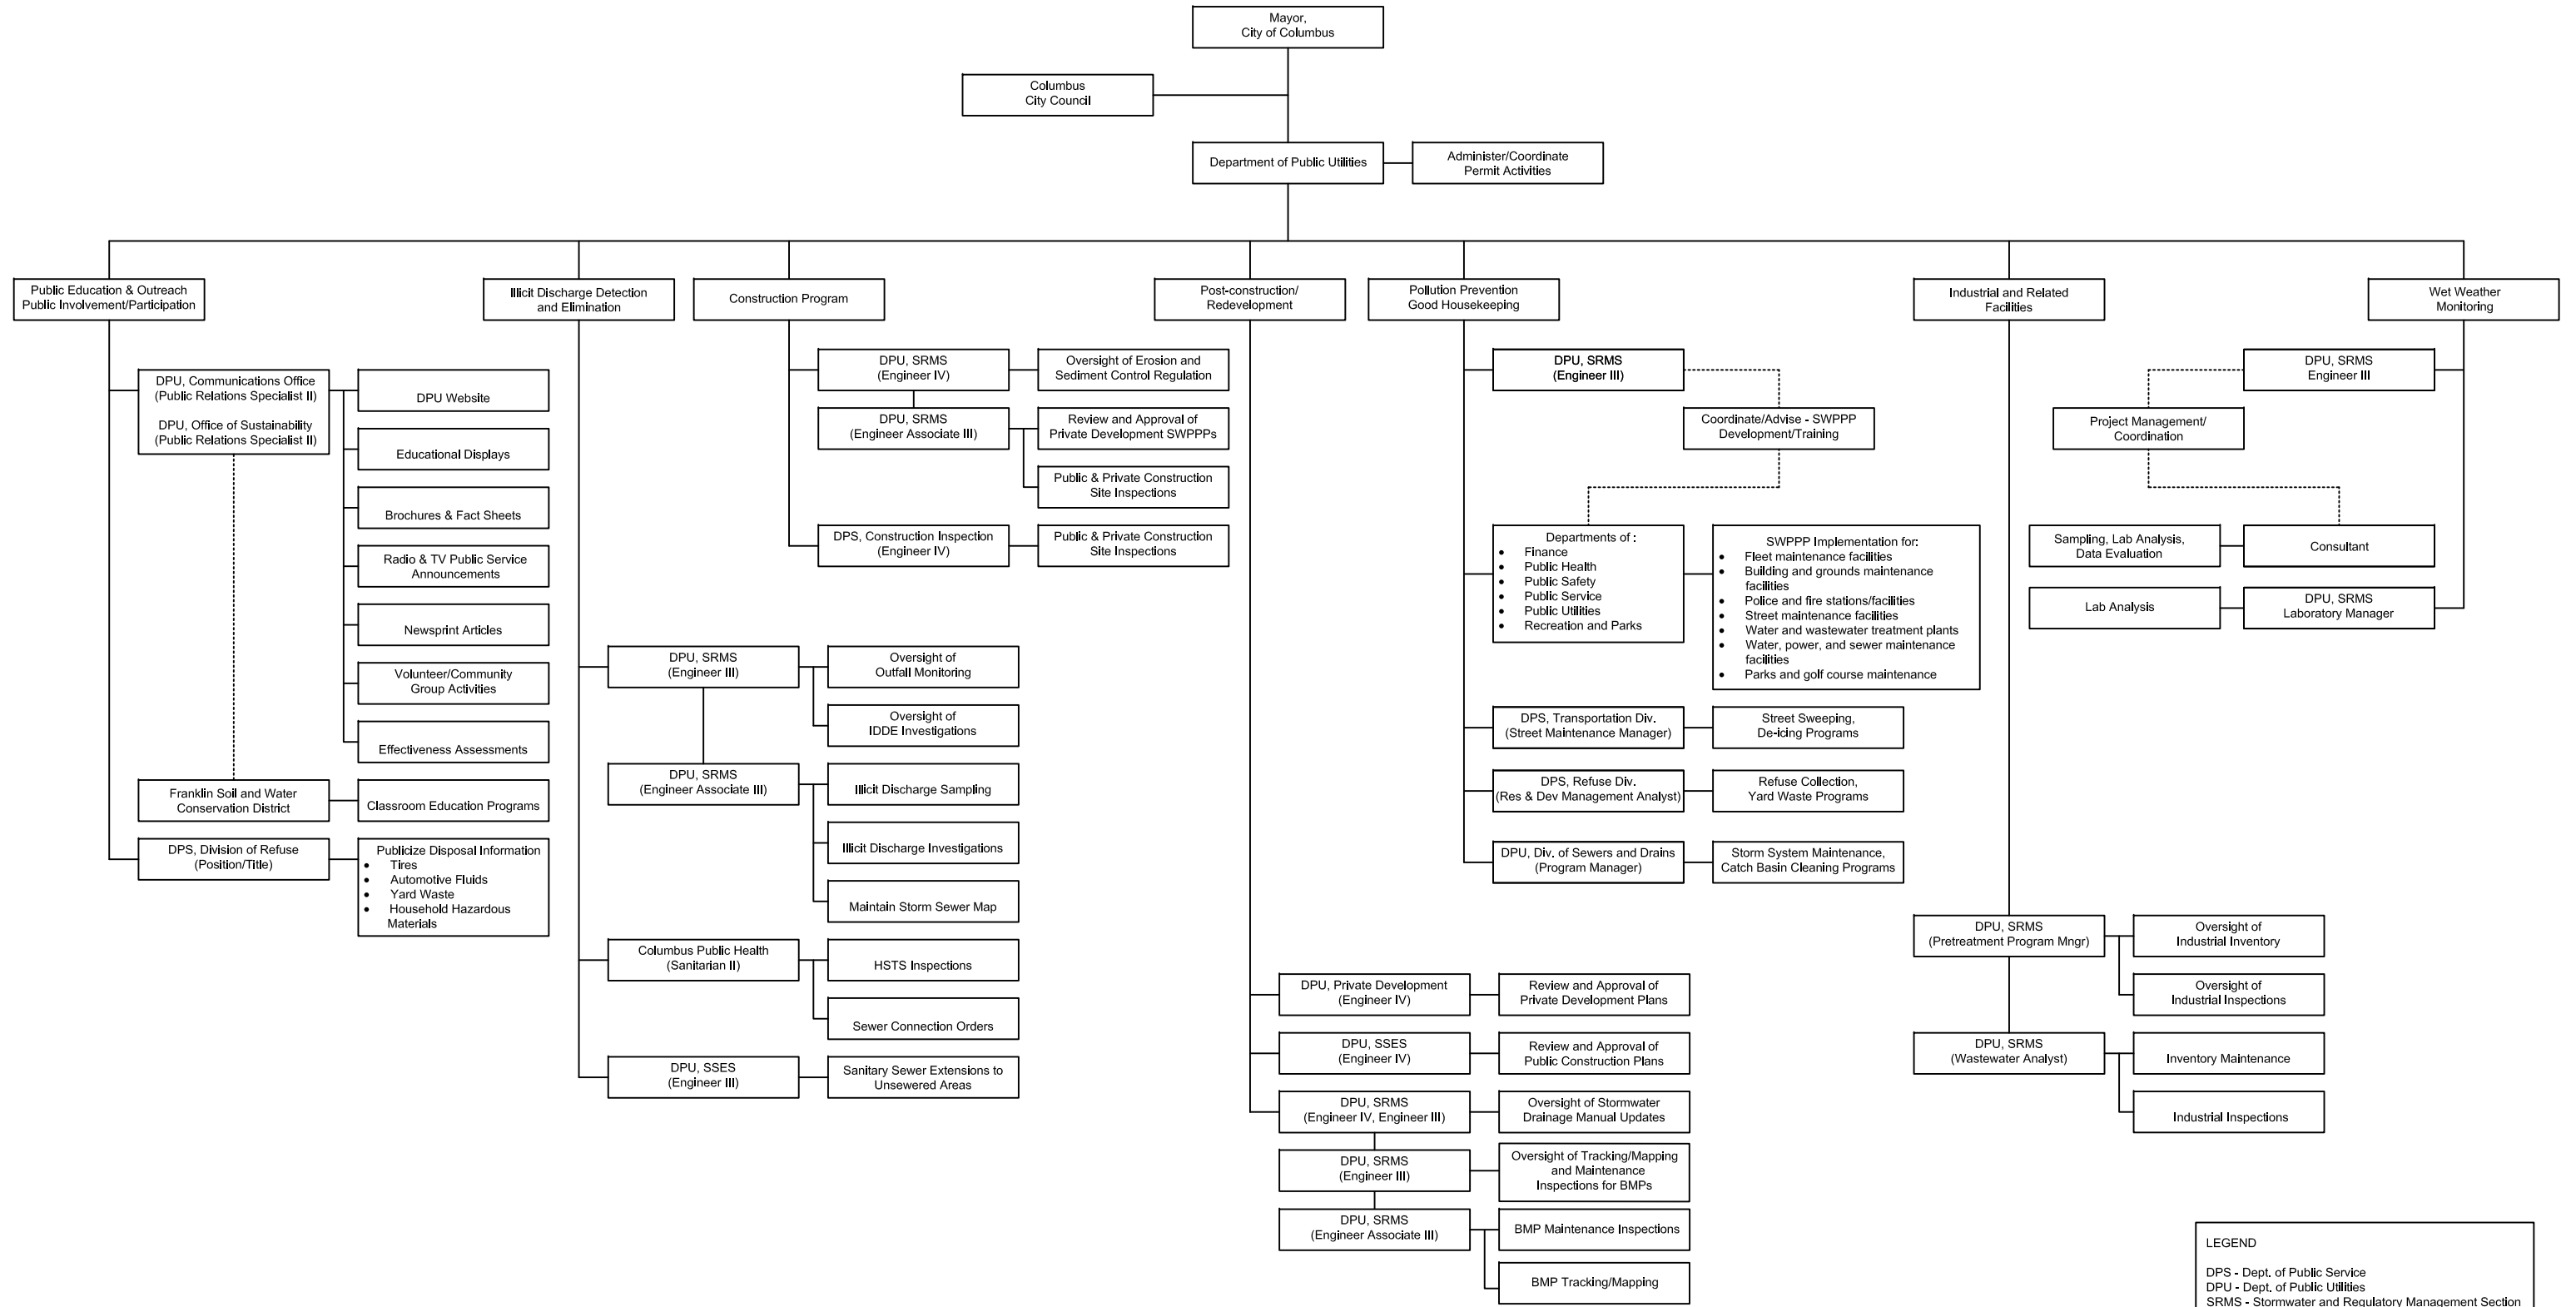

The City conducted one Greenspot presentation on Fats, Oils, and Greases (FOG); Spill Prevention Control, and Countermeasure; and Stormwater Pollution Prevention Plans that reached 12 members of the public. A FOG presentation that included associated stormwater BMPs reached 15 employees of the City of Worthington, Ohio.

5.2.2 Employee Education Summary

The City continues to increase stormwater pollution awareness amongst its employees by providing information on stormwater pollution prevention at new employee orientations and during training conducted to familiarize staff with Stormwater Pollution Prevention Plan contents. Under its EMS, the Department of Public Utilities (DPU) has developed on-line training modules that cover BMPs for various DPU activities such as vehicle washing. The City conducted or participated in numerous training opportunities during the 2016 reporting period. The City will continue to provide training on stormwater pollution practices to personnel that work at operations and maintenance facilities. See Appendix G for a summary of employee training activities.

Public Education and Outreach
2016 Activity Summary

Notes:

- * - Denotes 350 storm drain markers handed out for Eagle Scout project in November 2015 but applied in 2016 (**not** included in 2015 total).
- ++ - Denotes ordering and shipment period for resupply of storm drain markers, delayed by new ordering software/system.
- ** - Denotes official number submitted by Customer Service indicating 0 bill inserts were mailed during the first week of November to account for smaller total mailing number of summer inserts vs. spring.

Columbus Public Utilities shared Friends of the Hilltop's post. April 5, 2016

We are grateful for the time invested by neighborhood groups like Friends of the Hilltop - volunteer cleanup projects like the one they're planning this Saturday morning (April 9) not only beautify the area, but also keep debris out of the stormwater system, ultimately resulting in cleaner streams and rivers.

Columbus Public Utilities shared **Columbus Department of Public Service's** photo.
February 25, 2016 · 🌐

Picking up litter - and not littering in the first place - helps keep our waterways clean because much of it washes into them.

Highway Ramp Cleanup Event
KICK BUTT Columbus
March 19
 9:30 a.m. - 2:00 p.m.
www.keeptocolumbusbeautiful.org

Register your team at:
www.kickbuttcolumbus.eventbrite.com

Over the course of 7 annual Kick Butt Columbus events, 5,690 bags of litter were collected, weighing in at 52.3 tons or 104,600 lbs

An estimated 642,637 cigarette butts have been removed. Laid end-to-end, these butts would stretch for more than 914,324 feet of ramps and roadways have been cleaned through volunteer efforts. This is 173 miles, enough clean roadway to stretch from Columbus to Indianapolis.

Columbus Public Utilities added 6 new photos to the album: Engineer for a Day 2016 — at Columbus City Hall. February 24, 2016 · 🌟

The City of Columbus departments of Public Utilities and Public Service once again teamed up to present Engineer for a Day, an opportunity for local high school students who aspire to a career in engineering - particularly public engineering - to spend time with current engineers in the field. The annual event is held in conjunction with National Engineers Week and doubles as an opportunity to recognize the city's Engineer of the Year and Outstanding Young Engineer.

Columbus Public Utilities February 12, 2016

Water main breaks have been low this season, and can happen year round. If you see one, please report to Customer Service at (614) 645-8276, which connects to a 24/7 desk after hours that can also be direct dialed at 645-7788. If you see water/ice collecting by a sump pump curb outlet like this, it is usually not a break but rather from a private property, which may freeze before getting a chance to drain. If a blue city sign was posted, that means a break has already been reported, is on the list, and should be repaired within two weeks or sooner. Breaks from the curb box to the home are the owner's responsibility.

February 1, 2016 · 🌟

Correction to this article: Columbus' water mains are NOT made of lead pipe; they are cast/ductile iron. We have a corrosion protection program to prevent lead from leaching through home service lines, not city mains.

Much went wrong to delay public notice of lead in Sebring water

In both Sebring, Ohio, and Flint, Michigan, local water systems and state agencies that are supposed to protect people and the environment have been criticized...

Columbus Public Utilities
January 25, 2016 ·

A few customers have wondered if a Flint, MI kind of lead issue could happen here? No, because we add zinc orthophosphate to our treated water to prevent corrosion and pay careful attention to pH, hardness and alkalinity. Please see our lead fact sheet on our web site, link below. We report results of lead testing in our annual Consumer Confidence Report, mailed to customers and is on our web site in our document library. If you have any water quality questions, please call our lab at 645-7691. <https://www.columbus.gov/WorkArea/DownloadAsset.aspx...>

Columbus Public Utilities shared Public Utilities Commission of Ohio's photo.

January 25, 2016

This change will mean a few more numbers to dial to reach our Customer Service Call Center directly: 614-645-8276, which connects to our 24/7 maintenance desks after hours.

Don't forget, beginning Jan. 30, 2016, to dial 10 or 11 digits in the 614 area code.

Public Utilities Commission of Ohio

January 25, 2016

Changes to the 614 area code in central Ohio begin this Saturday. What does it mean for making local calls? http://www.puco.ohio.gov/.../puco-reminds-you-to-dial-10-di.../...

Blueprint Columbus was the subject of a thoughtful, thorough editorial in today's Dispatch:
<http://www.dispatch.com/.../edi.../2016/01/19/1-ground-zero.html>

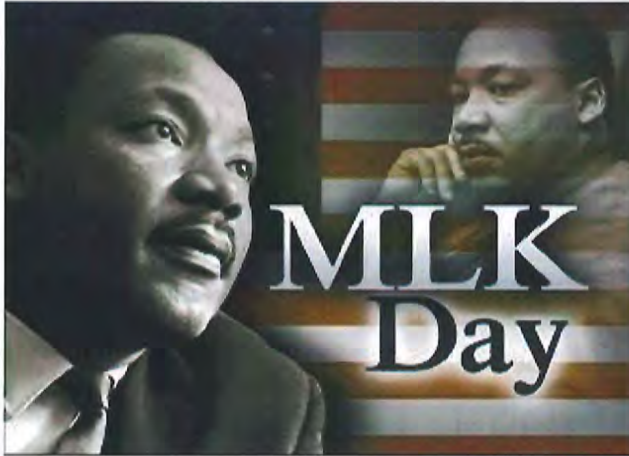

Ground zero
 No Columbus neighborhood probably does a better job of advocating for its needs or fighting City Hall than Clintonville, and this civic activism and pride shows in a desirable community. This makes Clintonville the perfect place to pioneer a bold plan

challenges of running a water utility in a city the size of Columbus. <http://digital.waterefficiency.net/publication/...>

After proposing a climate change plan for her community's wastewater treatment plant, Carol Murray, interim director for the Manchester Department of Public Works in Manchester by the Sea, MA, says if she would have done anything differently, she would have started working on the

climate change. Some work with EPA, others are acting independently. The term "climate ready" more reflects a process than any specific end state—a process resulting in the utility's ability to withstand, respond, and recover effectively and efficiently from climate impacts, notes EPA spokesperson Robert Dagalland.

January 2011 report to EPA Administrator End Jackson (the full report can be found at <http://www.epa.gov/1810700>). The findings and recommendations became the foundation of EPA's voluntary Climate Ready Water Utilities (CRWU) initiative. Extreme weather events, sea level rise, shifting precipitation patterns and

Water Efficiency January/February 2016 Page 32

Re: these scams, be advised we never make collection calls. If customers are behind on a city power or water/sewer bill, they will receive late bill reminders and then a shut-off notice if the bill remains unpaid.

Consumer alert: Scammers demand power-bill payments
If you get a call from someone saying you owe a big electric bill and need to pay up right now to avoid a shutoff, just hang up. It's a scam. Electricity...

If you live in the Hague/Mound area and experienced sewer issues following a storm last night, please call Sewer Maintenance to report it, (614) 645-7102. This was related to contracted sewer rehabilitation work and the contractor has added additional bypass pumps. If in the affected area, assistance information for cleanup and claims will be provided when you call.

Beating the heat should never involve illegal opening of a fire hydrant, which is dangerous and can break one needed in the event of a fire. Unless you know your neighborhood hydrants are being flushed (which ends today in Columbus), please report any open hydrants to (614) 645-7788, 24/7 #: <https://www.columbus.gov/HydrantFlush/>

Our Water Quality Assurance Lab manager and Dr. Long from Columbus Public Health discussed water quality on All Sides with Ann Fisher on WOSU this AM.

Water quality: from nitrate warnings in northwest Columbus to the lead debacle in Flint

10 a.m. Last week the Columbus Division of Water announced that rains and showers have driven contaminants into the Scioto River, raising nitrate levels in

 To report street flooding, call 311 or to reach our 24-hour Sewer Maintenance Center direct, (614) 645-7102. Crews are dispatched to see if anything can be done, like removing trash from a storm drain inlet. However, with the intensity of last night's storm as an example, sometimes it is simply that a sudden downpour temporarily overwhelms the stormwater system capacity. Some areas saw 50-100 year storm levels of heavy rain over a short time. There are limits to what modern engineering can do, and it takes time for water to recede in low lying areas prone to flooding. Flooding on private property is the responsibility of the property owner to correct, usually by regrading.

Columbus Public Utilities shared EPA WaterSense's photo. June 22, 2016

WaterSense partners helped...

...consumers save **\$32.6 billion** in water and energy bills

WaterSense epa.gov/watersense

EPA WaterSense June 22, 2016 Like Page

Who says WaterSense doesn't pay?! One of the simplest ways to save both water and energy is to install water-efficient products. WaterSense labeled products not only save \$ for water, but can help reduce your energy bills too.

Mark your calendars for Riverfest, a celebration of our region's water resources. This year's event will take place in conjunction with the Columbus Arts Festival on June 11th and 12th from 12pm-4pm.

<http://www.morpc.org/.../cal.../signature-events/riverfest/index>

Riverfest

Riverfest is a celebration of water, Ohio's greatest resource. The purpose of Riverfest is to educate the public about the vital role waterways play in the region. By interacting with waterways and offering canoe and kayak paddles, people of...

Columbus Public Utilities shared Your Wild Ohio Educator's post.

May 11, 2016 · 🌟

How do you know if a baby wild animal?

- If it's a mammal, it should have its mother with it.
- If it's a bird, it should be able to fly or at least flap its wings.
- If it's a reptile, it should be able to move its tongue.
- If it's a fish, it should be able to swim.

IS THE ANIMAL REALLY A KITTEN?

- Kittens are born with their eyes closed and are very dependent on their mother.
- Kittens are born with their ears closed and are very dependent on their mother.
- Kittens are born with their whiskers and are very dependent on their mother.

WHAT ABOUT IF A BIRD/OWL IS ONLY APPROXIMATELY 10 DAYS OLD?

- Birds and owls are born with their eyes open and are able to fly or at least flap their wings.
- Birds and owls are born with their ears open and are able to hear.
- Birds and owls are born with their whiskers and are very dependent on their mother.

I AM NOT SURE

- If you are not sure, please call the Columbus Department of Public Utilities at 614-462-3333.
- If you are not sure, please call the Columbus Department of Public Utilities at 614-462-3333.

I AM NOT A PET

- Wild animals are not pets and should not be kept as pets.
- Wild animals are not pets and should not be kept as pets.

WHAT LEADERS FOR PUPPY TRAINING WERE SELECTED?

- The Columbus Department of Public Utilities selected the following leaders for puppy training.
- The Columbus Department of Public Utilities selected the following leaders for puppy training.

Columbus Public Utilities shared Ohio Division of Wildlife's photo.

May 11, 2016 · 🌟

This is good advice for wildlife often found around our drinking water reservoirs as well (Griggs, O'Shaughnessy and Hoover).

I found a baby deer (fawn), what do I do?

Leave it alone if:

- It is seemingly healthy. The mother is likely nearby. Leave the area. Do not repeatedly check on the fawn. The more time you spend in the area the more likely you are to attract predators to the location. Also, the doe will not return while you are present.
If the fawn is in a dangerous location, move it to a safer location. Although you should limit touching the animal, it is a myth that the doe will reject a fawn with human scent on it. When moving a fawn, the young deer may try to follow you as you leave. To prevent the fawn from following you, face it away from the direction in which you plan to leave so it cannot watch you. Tap the fawn once or twice firmly between the shoulder blades (this mimics how the mother taps the fawn with her nose to communicate "stay here and wait until I come back"). Quickly leave the area. Do not linger. The baby may move around somewhat. Keep going and it should lie back down. If possible, you can monitor from afar with binoculars.

Contact a licensed wildlife rehabilitator if:

- If you find a female deer that is struck by car and a fawn is waiting beside her
The fawn appears to be sick, cold, weak, injured, or covered in parasites

Never keep a fawn as a pet!

- Fawns are wild animals that belong in the wild. Once they grow, they are active and independent, which could easily make them dangerous and destructive.
Take a moment to understand that your good intentions in picking up a fawn could actually cause harm to you AND the animal. Understand that wild animals are born to live their lives in the wild.
Raising a wild animal in captivity is illegal unless you have a state permit.

How can I help prevent orphaned fawns?

- Always keep your pets under control and watch them when they are outdoors, especially in the spring and summer when they could easily find baby wildlife.

Good, clean fun! Volunteers are needed Saturday, May 7 for a litter cleanup at Griggs Reservoir, 9-11 AM. Meet at the first shelter house north of the dam on the east side of the Scioto River. Bags and gloves provided. A new fishing waste collection station will be dedicated at 11:30 AM just south of the dam. For questions, call Watershed Management, 645-1721.

Here is a great opportunity to properly dispose of old electronic equipment, including computers, DVD players, printers, etc.; a complete list can be found via the link below (they are not accepting TVs or large appliances). The e-Waste Collection Event runs from 9:00 a.m. to noon tomorrow (Saturday) at Huntington Park downtown; thanks to Franklin County Commissioners and Goodwill Columbus.

http://commissioners.franklincountyohio.gov/ewaste/

e-Waste Collection Event
Not only do you help protect the environment, but you'll also assist us in providing services to those in our community with developmental disabilities.

Congrats to employee Jason Funk (left) who received the Patriot Award recently at a Columbus City Council meeting, the highest recognition given by the U.S. government to employers for outstanding support of employees serving in the guard and reserve. The award recognizes supervisors who provide direct support to those in uniform through a wide-range of measures including flexible schedules, time off prior to and after deployment, caring for families, and granting leaves of absence if needed. Jason was joined by Councilmember Mitch Brown (center), chair of the Veterans' Affairs Committee, and Randy Gasser, Ombudsman for Employer Support of the National Guard and Reserve.

Columbus Public Utilities shared **Columbus Department of Public Service's** photo.
October 26, 2016 · 🌟

Our storm sewers work better when not clogged up with leaves too 😊 and proper disposal helps with water quality by not adding additional nutrients.

Recycling is Blooming!

Every season brings a reason to recycle – do it right with a few easy steps.

1

Gather grass clippings, leaves, twigs, branches and shrubbery.

2

Place yard waste in paper bags or rigid containers marked "yard waste."

3

Put yard waste at least three feet from mailboxes and cars.

What is NOT recyclable yard waste?
⊗ Rocks, concrete and gravel ⊗ Dirt and soil ⊗ Plastic bags and pots ⊗ Food waste

RECYCOLUMBUS

We were meant for each other.

Columbus Department of Public Service
October 26, 2016 · 🌟

It's that time of the year for falling leaves! Here's a few steps to show you how to recycle your yard waste!

Columbus Public Utilities
October 25, 2016 · 🌟

Some are noticing that Hoover Reservoir's water level has dropped and more shoreline is exposed. It is down about 11 feet. This is a normal process that usually happens in the fall, particularly after a hot summer where a lot of water was pumped through the downstream Hap Cremean Water Plant due to increased demand. No worries - with the weather cooling, demand drops and water consumption returns to normal. It will fill back up with rain and snow over the next several months.

The next prescription drug take back day is Saturday. Please do not flush pills down the toilet; this is to prevent them from entering water supplies. If you can't make it to a take-back event, dispose of them in the trash, buried in used coffee grounds or kitty litter.

SWACO - National Drug Take Back Day_2016

Communities and individuals can get involved with SWACO through the Environmental Crimes Task Force and Adopt-A-Roadway Gift Program.

Columbus Public Utilities shared Columbus Business First's post.

October 12, 2016

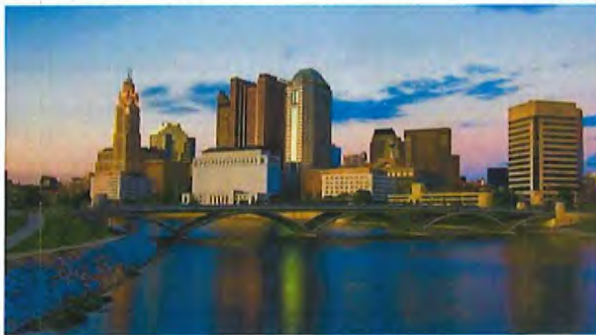

From a water supply standpoint, this is what our engineers planned for and why we have a 4th reservoir upstream in Delaware County, the John Douth Upground Reservoir, in addition to Griggs, O'Shaughnessy and Hoover Reservoirs. Our treatment capability is being upgraded for current and future demands, and to meet increased water quality regulations.

September 27, 2016 · 🌐

We are happy to report that the odor around the Hoover Reservoir Dam is gone because the reservoir has done its seasonal "turning over," which raw water samples confirmed. This means that the water layers are now mixed instead of being stratified as they usually are in the summer (please see our Friday post for more on the science). This was probably due to the cooler days and nights we are having. If it warms up, the situation could return but heading into October that isn't likely. Thanks, Mother Nature!

Sometimes erroneous info ends up in the news. Always fact check a topic and remember your drinking water is regulated by state and federal agencies. For questions, the most recent testing results are found here, or please call our Water Quality Assurance Lab at 614-645-7691. <https://www.columbus.gov/WorkArea/DownloadAsset.aspx...>

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
1/5/2016	Steiner 160 Easton Town Center, Columbus, OH 43219	Seals on trash compactor are faulty and caused oils and grease to leak into storm drain. We ordered Steiner to repair or replace the compactor and to have the storm line professionally cleaned.	We followed up on 1/8/16 and found the trash compactor seals were replaced and storm line was cleaned. NOV-RAP 1/29/2016
1/7/2016	Homeowners 2123 Woodward Avenue, Columbus, OH 43219	Concerns of water in basement led a complaints crew to find sewage in the storm sewer. The sewer was not flowing and the sewage was backed up.	2123 Woodward is unoccupied and not a source, but several homes have septic connections to the storm sewer. Several homes were visited with the Columbus Health Department.
1/8/2016	Unknown 454 Walhalla Road, Columbus ,OH 43202	A muddy discharge had occurred at the beginning of Walhalla ravine.	Discharge had stopped by the time we received the report. Unable to trace source. Follow-up confirmed that the discharge has stopped.
1/13/2016	McDonalds 1661 Morse Road, Columbus, OH 43229	Manager admitted the standard cleaning operation for the dumpster area involved using a hose or power washer to clean the area to the private catch basin, where the flow entered the sewer.	Explained City Code 1145.86, gave Manager educational materials. Contractor cleaned the water quality device, nothing made it to the MS4. NOV-RAP 2/18/2016
1/21/2016	Unknown 2300 Oakland Park Avenue, Columbus, OH 43224	Evidence of paint dumped directly onto the grate of the inlet since our last visit to this location in summer 2015. No witnesses and the apartment management said they didn't know anything.	Spoke to Ms. Jackie Lake, apartment complex manager about reducing illegal use of the dumpster area. We scraped the dried paint off of the inlet grate.
1/22/2016	Unknown 238 Edgevale Road, Columbus, OH 43209	Complaint of a pumpout of raw sewage from the house basement to the street at night. This is reported to have occurred on 01/21/16 and one other time during the past week.	No evidence seen of the recent discharge. Residents nearby stated that they will get pictures at the time of the next occurrence and call 645-STREAM immediately.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
1/26/2016	Imagine Academy at Sullivan 3435 Sullivan Avenue, Columbus, OH 43204	Private sanitary sewer line backed up at the cleanout which caused sewage to overflow into the MS4.	Gave the school a copy of City Code 1145.86 and "Do you know?" Chuck's septic was called on site to clear the sanitary blockage and clean. Follow up on 1/29, site was cleaned up.
1/28/2016	Unknown 454 Walhalla Avenue, Columbus, OH 43202	A muddy discharge had occurred at the beginning of Walhalla ravine.	Discharge occurred prior to our arrival and has stopped. Unable to trace source. Follow-up confirmed that the discharge has stopped.
2/1/2016	Mr. William Kirk 238 Edgevale Road, Columbus, OH 43209	Complaint of sewage being pumped out of the basement. No evidence was seen, but the Complaints section saw evidence on private property. We gained access on 02/04 and found sewage pooled due to a lateral backup. We arranged a visit by multiple agencies.	Code Enforcement handled the violation and compliance. The emergency repairs were completed on 02/16/16.
2/2/2016	Unknown 445 Vine Street, Columbus, OH 43215	Mr. Kelly reported seeing a pile of dirt in the street at Front and Vine.	Upon arrival, all of the dirt had been scraped up. No entry to the MS4.
2/4/2016	Unknown 454 Walhalla Road, Columbus, OH 43202	A muddy discharge had occurred at the beginning of Walhalla Ravine.	Discharge occurred prior to our arrival and has stopped. Unable to trace source. Follow-up confirmed discharge has stopped.
2/18/2016	George J. Igel & Company 2040 Alum Creek Drive, Columbus, OH 43207	Source appeared to be an uncovered catch basin near the construction trailer. However, Mr. Henwood denied that this was a direct route to the storm sewer, saying the flow went through two underground BMPs before entering the MS4.	Turned over to Norm Black and Allen Hankins in the Stormwater Construction Inspection group for further investigation and enforcement. Contractor swept the streets.
2/22/2016	Greater Columbus Convention Center 400 North High Street, Columbus, OH 43215	A maintenance worker emptied a floor scrubbing machine into an outside storm drain.	We explained the violation and City Code 1145.86 and distributed educational materials. NOV-RAP 4/28/2016

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
2/24/2016	Crete Carrier Corporation 5400 Crosswind Drive, Columbus, OH 43228	Multiple semi truck fire ignited saddle tanks and caused fuel to leak. Fire was hot enough to burn off fuel, no fuel entered the private storm system.	O.E.P.A. handled cleanup of parking lot. Assisted O.E.P.A. and checked private storm system to make sure no fuel made it into the sewer. E.E.I. on site and cleaned parking lot area.
2/24/2016	Team Fishel 1366 Dublin Road, Columbus, OH 43215	Communication cable installation along Morse Road with multiple sites of disturbance. No inlet protection or BMPs to prevent migration of sediment.	Turned over to the Gahanna and Franklin Soil and Water since the disturbance was on the South side of Morse Road in the Gahanna corporation limit.
2/24/2016	Unknown 5870 Sawmill Road, Columbus, OH 43017	Follow-up from an O.E.P.A. complaint about an employee that possibly dumped something into the catch basin.	Spoke with the Manager at Sam's Club Tire Center and informed him of City Code 1145.86. Nothing found in the catch basin.
3/4/2016	Woodward Excavating Company 7340 Tussing Road, Reynoldsburg, OH 43068	Unknown. Owner said that a subcontractor dropped off muddy equipment close to a parking lot catch basin, causing a discharge when rain occurred.	We were refused entry onto the property on the day of the event. The owner later contacted us by email and apologized. We visited the site on 03-09 and distributed educational material.
3/7/2016	Unknown 6138 Michaelkenny Lane, Columbus, OH 43017	Complaint notes that oil and other auto fluids are being spilled onto a graveled lot at the end of Michaelkenny Lane.	No oils or other fluids have entered the MS4. Educational material distributed to eight residences near the affected lot on 03/11/2016.
3/8/2016	Blueline Rental 2020 Integrity Drive South, Columbus, OH 43209	Dirt tracked from equipment storage area to street curb line. Poor housekeeping. Branch Manager took a skidsteer with a broom attachment and cleaned the curb and private approach.	Gave Manager a copy of City Code 1145.86 and "Do You Know?". Multiple companies contributed to the problem.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
3/8/2016	Underground Utilities Inc. 416 West Monroe Street, Monroeville, OH 44847	Water lines in this area are being replaced and silt was found in storm sewers. Failure to maintain BMPs and lack of any BMPs at many inlets caused silt to enter the MS4.	Division of Water was called and we requested all flushing be terminated until the curbs and work area was cleaned. NOV-RAP 4/18/2016
3/10/2016	Explore Transport 16W520 Lake Drive #207, Willowbrook, IL 60527	Truck accident on 315 South bound, South of 3rd Avenue, tore side of fuel tank which caused fuel to enter into the MS4.	Boomed outfall at river, Explore Transport called E.E.I. to come out and take care of the environmental cleanup of storm sewer and fuel.
3/15/2016	Columbus Stone Center 1736 McKinley Avenue, Columbus, OH 43222	An overflow pipe from saw cutting operations was constructed to drain the slurry outside to a low spot in the Northeast corner of the property.	No violation. The slurry is collecting in a gravel area where there are no storm sewers.
3/17/2016	Unknown 628 Minck Drive, Columbus, OH 43219	Caller stated that 628 Minck Drive floods during rainfall and there are pools of sewage with dead rodents in the pools.	Visited the area on 03/18 but found no pooled water or any evidence of flooding. Called the complainant and got no answer, left a voicemail.
3/17/2016	Michoacana Mexican Market 3160 South Hamilton Road, Columbus, OH 43232	Poor housekeeping along South side of building. Grease container has spilled material around it and food waste not making it to dumpster. This area is dirt and mud. Did not reach the MS4.	Gave them a copy of City Code 1145.86, Restaurant and Small Business Guidelines and Do You Know Where Your Storm sewers Go.
3/21/2016	Ernst Concrete 3361 Successful Way, Dayton, OH 45414	Ernst Concrete truck did a concrete washout in the grass next to the curb. The washout material entered the storm drain.	The company hired a contractor to clean out the catch basin, completed 03/25. NOV-RAP 5/2/2016
3/21/2016	Bruce P. Morgan PO Box 44146, Columbus, OH 43204	Landlord pumped some water from the basement that flowed across the yard and onto the adjacent property. Sampled the water, detergents 0.5 ppm and ammonia 4 ppm.	None of the water entered the MS4. Notified Sewer Permits, Code Enforcement, Building Inspection, and the Health Department for further investigation.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
3/23/2016	Northstar Café 4241 North High Street, Columbus, OH 43214	Report of mop water being dumped outside near the rear door of the building.	No evidence of dumping. We made the manager aware of City Code 1145.86 and the Outdoor Cleaning Memo.
3/23/2016	Unknown 1700 East 17th Avenue, Columbus, OH 43216	Oily sheen reported on the surface of the water laying in the ditch.	The sheen was the by-product of iron bacteria, this is a naturally occurring substance. No further action needed.
3/24/2016	Asli Child Care Learning Center 4303 Cleveland Avenue, Columbus, OH 43224	Painting renovations at the business, a trail of paint residue was seen from the sump pump discharge to the inlet and nearby stormwater outfall.	Mr. Hirsi insisted that the brushes were only cleaned out in the first floor bathroom. We dye tested this tank and checked several times for any discharge from the sump pump. Saw no discharge.
3/29/2016	Right Price Tree 4949 Majestic Drive East, Columbus, OH 43232	Landlord of 1276 Idlewild hired a contractor to remove some fence around the property. Contractor dumped the fence in the City's stormwater wetland BMP.	Environmental crimes unit will proceed and conduct enforcement. Follow-up on 4/4/2016, fence has been removed from the wetland.
3/30/2016	Unknown 2577 Ferris Road, Columbus, OH 43224	Received a call about oil entering Sale Ditch from structure number 0236T0122	Our investigation upstream of the outfall failed to pinpoint the source of the oil entry into our MS4. We contained the oil.
3/31/2016	Unknown 3434 Maple Shade Court, Columbus, OH 43228	Franklin County ICID Group thought the pipe was part of the City MS4. It is an unmarked clay tile from Franklin County which is connected to other septic tanks in the County.	Called Franklin County ICID Group and notified them of findings. Franklin County will complete an investigation.
4/1/2016	Emery's Maintenance 13375 Pickerington Road Northwest, Pickerington, OH 43147	A break in the private force main line which serves 1380 Dublin Road caused sewage to emerge out of the ground and onto the parking lot. Flow entered the MS4.	Emery's called a sewer cleaning and repair company to fix broken line and clean parking lot and storm sewer. Follow-up on 4/4/16, line and lot has been cleaned and the repair process is underway. Repair complete on 4/5/16.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
4/6/2016	Unknown 2622 Hingham Lane, Columbus, OH 43224	Two separate instances of dumping have occurred in 2 different inlets on the cul-de-sac. Both have entered the MS4.	Applied curb markers and distributed City Code 1145.86 and KNOW cards. E.E.I. cleaned the motor oil and SMOC cleaned the grease. Follow-up on 4/7/16, both inlets were clean.
4/7/2016	Elford Asset Management 20 East Hubbard Avenue, Columbus, OH 43215	Sewer maintenance workers observed powerwashing of an indoor garage area used for trash dumpster storage. The Elford maintenance director admitted there was some discharge to the street.	Explained City Code 1145.86 and the Outdoor Cleaning Memo and gave copies of the same. NOV-RAP 5/17/2016
4/8/2016	Unknown 543 Yaronia Drive, Columbus, OH 43221	Naturally occurring Iron Bacteria has seeped from the shale banks of Adena Brook, causing an orange, oily discharge.	Ran Field test on water in area came back with normal results. Notified O.E.P.A. of our findings. Distributed Iron Bacteria fact sheet to the neighborhood which described the current situation.
4/11/2016	Unknown 454 Walhalla Road, Columbus, OH 43202	A complaint came in to the City about a muddy discharge in the headwaters of the Walhalla Ravine.	It rained over 1 inch the day of the reported discharge. No evidence of discharge in the ravine, unable to trace source. Notified Anita Musser of our findings.
4/11/2016	John Dupler 1277 East Broad Street, Columbus, OH 43205	Broken private lateral from house bubbling up in yard. Dye test from kitchen sink confirmed break. Sewage contained in yard.	Gave our findings to Sewer Permits Office. Contractor getting permit for repair. Follow up on 04/18/2016. Repair was made and sewage gone from yard.
4/14/2016	Alum Creek Topsoil 2480 Alum Creek Drive, Columbus, OH 43207	Poor BMPs and or lack of BMPs at facility caused dirt to be tracked onto the roadway.	Spoke with the owner and explained City Code 1145.86. Owner had a crew clean the street with a skidsteer and broom. NOV-RAP 6/27/2016

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
4/14/2016	Preferred Living 470 Olde Worthington Road, Westerville, OH 43082	Reported a dark substance in the stormwater basin with a similar color to the paint being applied to a nearby boundary fence.	No violation. The water did not have any paint in it.
4/18/2016	Unknown 4480 Bridgeway Avenue, Columbus, OH 43219	Stagnation of the water due to low gradient in the stormwater pipe, this is caused by the design of the stormwater system.	No violation. Water was backed up for 300 yards in the pipe.
4/19/2016	Tom House 945 Franklin Avenue, Columbus, OH 43205	A can of paint fell out of the truck and spilled on to the roadway, and some tile grout was dumped in the curb from cleaning of tools.	Spoke with the Foreman and crew about City Code 1145.86. Crew swept up grout from the curb line and scraped the paint up from the street. NOV-RAP 5/18/2016
4/20/2016	William Benson 182 South James Road, Columbus, OH 43213	Kitchen sink and washing machine were both plumbed to the sump.	Notified homeowner of City Code 1145.86, told resident to stop the discharge and disconnect from sump and tie into sanitary. NOV-RAP 6/17/2016
4/22/2016	Texas Roadhouse 8440 Lyra Drive, Columbus, OH 43240	A report of grease running across the ground and towards the catch basin from the back door/dumpster area.	Upon investigation, no grease was found in the MS4 but there was evidence of poor house keeping in and around the dumpster area. Informed Manager of City Code 1145.86 and outdoor cleaning.
4/25/2016	Unknown 624 Richards Road, Columbus, OH 43214	Concrete washout from a job completed at 624 Richards Road. Dumping material was cured in place.	Unable to determine responsible party.
4/27/2016	Blue Land Recycling Incorporated 1593 Shawnee Avenue, Columbus, OH 43211	A fifty gallon drum storing grease and oil tipped over and spilled contents which were washed out into the alley.	Dye test confirmed that flow from the spill entered the sanitary and not the MS4. Returned on 04/28/2016, cleanup completed. Pre-Treatment to handle enforcement.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
4/27/2016	Southeastern Industrial Painting and Supply PO Box 1108, Cary, NC 27512	Contractor was powerwashing the block walls on the building which caused runoff to enter the private collection system.	Notified contractor of City Code 1145.86. Told Contractor to clean up runoff and install BMPs to contain washwater. NOV-RAP 5/23/2016
4/28/2016	New Victorians Property Management 453 West Third Avenue, Columbus, OH 43201	Condo Construction with no sediment controls allowed a discharge to the curbs and storm sewer. This followed a previous request to clean up on 04/07-04/08.	Nobody was onsite so we called New Victorians and explained the violation. NOV-RAP 5/19/2016
5/3/2016	Al Castle Incorporated 506 St Clair Avenue, Columbus, OH 43203	Outside discharge pipe for a three compartment kitchen sink was broken by a lawnmower. The discharge emptied into a grassy area near the building for at least a month.	The discharge never left private property or entered any City assets.
5/6/2016	Romanelli and Hughes 2233 North Bank Road, Columbus, OH 43220	Cutting the curb for drive aprons and tracking off of empty parcels has caused slurry and sediment to enter the curb line. Erosion and Sediment Control Program site.	Spoke with the contractor, informed him of City Code 1145.86. Contractor cleaned curbs and the installed BMPs.
5/6/2016	Old Skool Construction P.O. Box 1616, Westerville, OH 43035	Contractor dumped concrete washout in curb and broomed it into curb inlet.	Called contractor, told him this was a violation of City Code 1145.86. Contractor cleaned curb. Follow up on 05/09/2016 confirmed. NOV-RAP 6/17/2016
5/9/2016	Perfectscapes LLC 5816 Heirship Court, Hilliard, OH 43026	Washout of a company dump truck using power washer; no inlet protection used on the nearby stormwater inlet.	Informed Mr. Serraga of the violation and gave copies of City Code 1145.86 and the Outdoor Cleaning guidelines. Checked on 05/11/16, inlet was cleaned. NOV-RAP 5/18/2016
5/11/2016	Mr. Paul Ollam 545 Catherine Street, Columbus, OH 43223	After a waterline break at the home, the owner dug the trench himself for a waterline replacement. The dirt was piled in the street and curbs. A rainstorm occurred that flushed some of the mud towards the inlet.	Mr. Ollam acknowledged the violation and began to clean up curbs. We placed inlet protection over the drain. Checked on 05/13 and area was cleaned up.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
5/12/2016	Jim Oxley Concrete Contractors 10599 Liberty Road, Powell, OH 43065	Concrete was washed out into a dumpster which leaked and the slurry entered the MS4. The dumpster was located near the inlet and no inlet protection was in use.	Mr. Oxley was informed he needed to clean the line and install inlet protection. We returned on 05/13/16 and verified that the cleaning was indeed done. NOV-RAP 6/3/2016
5/12/2016	Patrice Colvin 386 Midland Avenue, Columbus, OH 43223	Internal plumbing or service lateral malfunction caused sewage to back up into basement. Owner used a sump pump to remove sewage from the basement discharge it into a pit that was dug in the back yard.	Spoke with the homeowner and called the Health Department, City Code Enforcement, and Sewer Permits for enforcement and resolution. No entry into MS4.
5/17/2016	John Rumph 1659 Marina Drive, Columbus, OH 43219	Washwater/sewage has entered the sump pump.	Resident was told he could not have anything plumbed to the sump or dump anything in there. NOV-RAP 6/30/2016
5/18/2016	The Gilbert Group 209 East Broad Street, Columbus, OH 43215	Customers in the shopping plaza have dumped motor oil and cooking grease into the private catch basin behind the building.	Called The Gilbert Group for cleanup of the storm lines; called The Health Department, Pretreatment, Code Enforcement, and The Environmental Crimes unit for inspections and assistance. Cleanup of the storm sewer completed on 5/20/2016.
5/19/2016	Mwangi Automotive 934 East Hudson Street, Columbus, OH 43211	Washing machine discharge connected to inlet by garden hose.	Informed Mr. Mwangi of City Code 1145.86. Asked Mr. Mwangi to disconnect hose from inlet. Follow-up on 5/20/16, washer has been disconnected.
5/23/2016	Unknown 29 West Park Avenue, Columbus, OH 43222	Caller stated that there was trash on the street.	Applied curb markers on the inlets on West Park from Broad Street, South to Sullivant Avenue. Called the Street Department to sweep the roadway. No entry into the inlets.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
5/24/2016	Franklin County Engineer's Office 970 Dublin Road, Columbus, OH 42315	County crew was scrubbing and pressure washing the deck of the Lane Avenue bridge prior to sealing. Sediment from the washing entered the drains on the bridge that lead to the MS4.	Explained our concerns about City Code 1145.86/O.E.P.A. violations. We demonstrated use of filter fabrics to remove sediments from the washwater and recommended this as a minimum step.
5/24/2016	Reina Commercial Cleaning, LLC 332 Muskingum Drive, Gahanna, OH 43230	Contractor was seen by the O.E.P.A. discharging mopwater into the street. O.E.P.A issued violation.	We did not notice any violation at the time of visit. The maintenance personnel stated that the cleaning company has changed that practice. Distributed educational material and KNOW cards. No entry into MS4.
5/26/2016	Metrolina Greenhouses 16400 Huntersville-Concord Road, Huntersville, NC 28078	Diesel fuel tank on trailer was struck by debris in roadway that caused it to leak.	Fuel was isolated in the ditch adjacent to the road and was contained. E.E.I. was called by the responsible party to clean up the site.
6/3/2016	Unknown 875 Harrison Avenue, Columbus, OH 43215	Report of a concrete washout. Found a small amount of dried concrete in the curb line and some small piles in the grass median nearby.	The material did not appear to have been recently discharged. Talked to concrete contractors at Village West Apartments and they denied responsibility. Distributed handouts to the apartment manager.
6/3/2016	Gary Perry 1204 East 19th Avenue, Columbus, OH 43211	Mr. Perry (tenant) was pumping water to the alley. Phil Cutting, (landlord) asked him to stop pumping and padlocked the basement door to keep the tenants from doing any further pumping.	No sewage entered the MS4. This complaint was sent to The Health Department and Code Enforcement.
6/6/2016	The Kroger Company 4111 Executive Parkway, Westerville, OH 43081	A grease trap overflowed onto the pavement and the discharge entered the MS4.	Emergency Plumbing Service was already on site to open blockage. The City later cleaned the storm line.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
6/7/2016	Unknown 1678 Duxberry Avenue, Columbus, OH 43219	A new sump pump has been installed at the home and has discharged groundwater to the street.	No Violation as it was an allowable discharge. The discharge was tested and found to have 0 ppm Detergents and 0.2 ppm Ammonia.
6/10/2016	Unknown 100 South 3rd Street, Columbus, OH 43215	Caller assumed the fresh road paint was washing off the street and entering the MS4.	Upon investigation, paint being used was "hot melt/plastic." What the caller saw was surfactants coming off the fresh pavement after the first rain storm. No violation.
6/10/2016	Two Brothers Wine and Spirits 8380 North High Street, Columbus, OH 43235	Contractor/Employees working inside building have dumped and washed out tile grout into the private catch basin.	5 Star Plumbing was called clean the catch basin and the storm sewer pipe. Follow up on 06/14/2016, area was clean. NOV-RAP 7/29/2016
6/20/2016	Tetrault Home Improvement 433 South Oakley Avenue, Columbus, OH 43204	Business was cutting stone with a wet saw and was not capturing slurry. Did not reach the MS4.	Business installed a capturing device for the slurry and cleaned up the area. Area was clean on 06/20/2016. Gave them a copy of City Code 1145.86 and Do You Know.
6/22/2016	Andy Kramer Painting 1619 Flatrock Court, Columbus, OH 43235	Mr. Krammer admitted he had put a 5 gallon bucket of paint in his trash receptacle. Refuse collection pickup caused the bucket to fall onto the street.	Code Enforcement was notified. Mr. Kramer cleaned the paint from the curb. No paint entered the curb inlet.
7/6/2016	Blueline Rental 2020 Integrity Drive South, Columbus, OH 43209	Complaint of equipment being powerwashed outside; flow entering storm sewer. Upon investigation, no powerwashing was being done.	Distributed copies of handouts. Had Blueline sweep dirt and rocks from the asphalt pavement, clean the private storm inlets and had Blueline install BMPs. 09/13/2016, verified inlet protection.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
7/7/2016	Shropshire's Auto Sales LLC 2095 Lockbourne Road, Columbus, OH 43207	Owner of the car lot had a car catch on fire that was extinguished by The Columbus Fire Department.	Fire Fighting activities are a permissible discharge. Asked the owner to sweep up the lot for leftover debris.
7/8/2016	Waffle House 8303 North High Street, Columbus, OH 43235	Health inspector reported the cleaning of waffle irons on the pavement outside of the back door.	Onsite manager said the irons are cleaned outside with a degreaser and water. However there was no evidence of a discharge to the storm sewer at the time of our visit.
7/11/2016	Two B's Excavating 11887 Laurel Hill Road, Thornville, OH 43076	While installing a new water tap the old service split. This caused water to fill up the trench and pushed dirt and mud into the curb line. Water was shut off at time of investigation.	Contractors were already cleaning the curb line. Gave supervisor a copy of City Code 1145.86 and Do You Know. Told them to finish cleaning curb line.
7/12/2016	Janardhan N. Bangalore 1017 Joos Avenue, Columbus, OH 43229	Homeowner regularly sprays his yard with Ground Clear to kill the vegetation. The exposed soil runs off into the curbline during rainstorms.	Asked the homeowner to control the erosion coming off of the parcel and into the street. Follow-up on 7/18/2016, homeowner has installed jute fabric in the curb lawn to control runoff.
7/13/2016	S & ME Inc. 6190 Enterprise Court, Dublin, OH 43016	S & ME personnel were drilling and installing testing wells. The byproduct of this activity entered the storm sewer systems; no inlet protection was used.	Mr. Justus was informed that he had to clean the affected storm sewers. Distributed educational materials and told him that inlet protection must be used. NOV-RAP 8/30/2016
7/14/2016	S & ME Inc. 6190 Enterprise Court, Dublin, OH 43016	Drilling without proper sediment BMPs caused a discharge into the storm sewers.	Notified Mr. Justus of the continued violation of City Code 1145.86. Inlet protection was purchased and placed on the inlets and sewer lines cleaned, completed 07/15. NOV-RAP 8/30/2016

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
7/14/2016	Scioto Ready Mix 6214 Taylor Road Southwest, Pataskala, OH 43062	Concrete was being poured and the concrete in the chute started to harden, driver added water to the mix in the drum and went to feed more concrete. The watered-down concrete splashed over the top of the harder concrete in the chute, causing an overflow.	Homeowner and contractor on site shoveled up the concrete in roadway upon the incident occurring. Distributed educational materials in the neighborhood. NOV-RAP 7/29/2016
7/16/2016	Champion Track 3690 Vira Road, Stow, OH 44224	Acts of vandalism during a multi-day paint job at Whetstone High School caused a large amount of paint and sealer to enter the storm drain and the Olentangy River.	No discharge was seen when we arrived. The contractor cleaned the catch basin on 07/17, but he was later directed to reclean it to remove more paint.
7/19/2016	The Ohio State University 590 Woody Hayes Drive, Columbus, OH 43210	Hydrostatic line broke on a Hi-Boy fertilizer spreader operated by OSU. Oil was sprayed for several blocks on North bound lane of High Street. Spreader came to a halt at Rich and High.	C.F.D. had called for city trucks to spread sand and sweep along High Street. O.S.U called E.E.I. to vac and jet inlet and segments of line where oil entered.
7/20/2016	Unknown 3813 Astor Avenue, Columbus, OH, 43227	Unknown persons threw trash into the curb inlet.	Trash was removed and educational material was distributed in the area.
7/20/2016	Unknown 2270 South High Street, Columbus, OH 43207	Caller stated that a Capital Resin truck was dumping stuff in a ditch at High Street and Route 104.	Saw no evidence of dumping. Stopped in Capital Resin at 324 Dering Road. Spoke to John Gabreck, Environmental Manager and told him about the callout. He let me walk his facility.
7/25/2016	Unknown 4980 Blendon Pond Drive, Columbus, OH 43081	Caller was concerned about upstream flow that entered into the retention pond potentially harming aquatic life, which caused new algae growth.	Sampled both the pond and the outfall, found normal conditions and healthy aquatic life. No discharge, no violation.
7/25/2016	Edwards Community Development 495 South High Street, Columbus, OH 43215	Complaint was initially "paint being discharged to the private storm sewer." Mud, rocks, dirt, etc. were all being allowed to enter the curbline and both City and private assets. Also, improper concrete washouts had occurred onsite as well.	No paint being discharged. Informed Project Manager of City Code 1145.86. Had him clean and install new BMPs on the site.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
7/29/2016	#1 Plumbing Repair 877 North 19th Street, Columbus, OH 43219	Concrete was being poured at 3225 Hawkbury Court using a concrete buggy. Buggy was washed out in curblin. Neighbors complained and contractor came back and powerwashed the concrete into inlet.	Explained City Code 1145.86 to the contractor and issued educational materials. NOV-RAP 9/14/2016
8/5/2016	CAZ Cleaning Service LLC 1457 Stonewall Court, Galloway, OH 43119	Pressure washing the restaurant drive thru lanes without using any inlet protection.	Explained the violation and the outdoor cleaning policies of the City of Columbus. Employees were able to block the storm drain and used a vacuum to remove the discharged water. NOV-RAP 9/7/2016
8/8/2016	Los Guachos Taqueria 5221 Godown Road, Columbus, OH 43235	The business cleaned the floor by spraying it out of the back door, which then flowed across the lot to the private inlet.	Explained City Code 1145.86 and other educational materials. Business called a sewer contractor to jet and vac the private storm sewer in the parking lot. NOV-RAP 9/13/2016
8/8/2016	Unknown 217 North Chase Avenue, Columbus, OH 43204	Bags of yard waste dumped into the creek from the alley between Roys and Chase Avenues.	Removed waste from the creek, did not find any evidence indicating a responsible party. Put out door hangers on the nearby streets and spoke with several residents.
8/8/2016	Unknown 2439 West Dublin Granville Road, Columbus, OH 43235	Unknown person had worked on a truck and leaked oil onto the asphalt. Staining was observed from the location of the repair to a grated inlet. A Frybag was in the inlet but it had not been serviced. Dirt and sediment on the asphalt had contained the residual oil.	Talked to the General Contractor of the project. Gave him a copy of City Code 1145.86.
8/10/2016	Unknown 799 Ficus Drive, Columbus, OH 43085	Someone spilled paint in the parking lot and the rain mixed it up in a puddle which stayed onsite.	Called E.R.C. to clean up the watered-down paint. No further action, no discharge to the storm sewer. Clean-up completed on 8/10/2016.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
8/11/2016	Ohio Concrete Sawing and Drilling 2935 East 14th Avenue, Columbus, OH 43219	Sawing sidewalk for a commercial gas service line replacement, no inlet protection or BMPs used to contain the slurry.	A company representative admitted fault; we explained the violation and City Code 1145.86. A private contractor cleaned out the inlet and the company employees cleaned the curbs. NOV-RAP 9/7/2016
8/12/2016	Tuyo Y Mio Tacontigo 3362 Livmoor Drive, Columbus, OH 43227	Cleanup of flat grill and other kitchen cooking items, food scrapings and washwater dumped into the storm drain. This was seen by witnesses and admitted by Ms. Ramos and other employees.	Explained the violation and City Code 1145.86 and gave a Spanish version of the Restaurant Guide to onsite employees. Restaurant hired a contractor to clean the storm sewer inlet on 08/15/16. NOV-RAP 10/25/2016
8/15/2016	Unknown 1322 South 17th Street, Columbus, OH 43206	A car was being cut up on the side of the road.	No discharge of oil or antifreeze found. We had the car towed from the right of way.
8/18/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	Large water leak caused turbid water in Millikin Ditch.	Division of Water knew about the leak. OUPS had been out in morning to mark utilities. Repair was complete on 08/19/2016.
8/19/2016	Brotherly Love Ent. 1410 East Blake Avenue, Columbus, OH 43211	Dumped gray water container into private catch basin.	Spoke with owner about City Code 1145.86. Property owner called Ace out to clean the lines and catch basins. Follow up on 08/22/2016, sewers were clean. NOV-RAP 9/28/2016
8/22/2016	Uknown 3003 Cortona Road, Columbus, OH 43204	Complaint of dumping into the storm sewer in the back yard at 3003 Cortona Road.	No storm sewers were found at the site, only a covered sanitary manhole. No evidence of dumping found.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
8/22/2016	Quality Masonry Company 1001 South Prospect Street, Suite 101, Marion, OH 43302	Complaint of a gray, cloudy liquid with a fuel/chemical smell flowing into a storm inlet.	Quality Masonry was found spraying solvent and water onto the brick pavers to remove tar residue. Discharge entered curb line and a catch basin. NOV-RAP 10/20/2016
8/23/2016	Unknown 1585 Frebis Lane, Columbus, OH 43206	Complaint of someone dumping car fluids into a sewer at the business.	Found no evidence of dumping in any sewers onsite. No violation.
8/24/2016	Arcelor Mittal Columbus, LLC 1800 Watkins Road, Columbus, OH 43207	MPW Industrial was seen discharging City water from their cleaning truck onto the pavement where motor oil had leaked onto the asphalt, causing an oily discharge.	No entry to private or City storm assets. Discharge on pavement and grassy area. Cleanup complete on 8/25/2016.
8/25/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	Strong turbid discharge to the Scioto River that began during dry weather sampling.	Called Upper Arlington and they located a leak near 1981 Malvern Road. Called O.E.P.A. and let them know about the discharge to the river. Checked 08/26/16, all fixed and no discharge at the outfall.
8/29/2016	Eldin S. Rector 5126 Thornhill Court, Grove City, OH 43123	Failure to maintain aerator treatment unit at the house caused raw sewage to enter the storm sewers.	This house is located outside of Columbus in the Franklin County jurisdiction. Called Franklin County Public Health. They confirmed on 09-14 that repair was completed.
8/30/2016	The Kroger Company 4111 Executive Parkway, Westerville, OH 43081	Private trench drain plugged with plastic bags and debris caused water to pond in loading dock area. Responsible party started pumping septic water into the street for a short time then stopped. Material reached the MS4.	Not pumping when we arrived. Talked to Assistant Manager Travis and Kaylee. Told them they needed to remove the ponded water in dock area and along street. NOV-RAP 9/23/2016

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
8/30/2016	Vitale Poultry Company 800 East Cooke Road, Columbus, OH 43214	Water was running off of the property.	Talked to Kenny Teske, Supervisor at Vitale Poultry. He told me that they have a mister on their refrigeration units, which is a permissible discharge.
9/9/2016	Unknown 90 West Broad Street, Columbus, OH 43215	An accumulation of trash and debris, bubbles, and a light oil sheen in the river on the East bank, South of the Broad Street bridge.	Upon investigation, we found no pipes discharging anything abnormal for about one mile up river. The accumulation of flotsam appears to be a general collection from everywhere up river.
9/12/2016	Unknown 4819 Moreland Drive West, Columbus, OH 43220	Trash from trash can fell out onto curb. Checked 0295T0118 and 0295T0119; both were open and flowing.	Picked up trash in curb and put in trash can. No other work needed.
9/14/2016	Unknown 4146 Maize Road, Columbus, OH 43224	Dry weather sample exceeded threshold for detergents and ammonia and had sewage type smell. The drainage from OL169 is from several houses southward along the East side of Maize Road.	Turned over to Columbus Public Health for inspection of four homes. Isaak Khozin will be handling the investigation.
9/15/2016	Ogden Construction Services 929 Eastwind Drive Suite 207, Westerville, OH 43081	Pumping of muck and sediment laden water without adequate controls during expansion of a detention basin.	This is a project with a Stormwater Pollution Prevention Plan. The Sediment/Erosion Program is handling the NOV and enforcement.
9/15/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	A water main break occurred in the road near 650 Yaronia Drive North, the Division of Water was making the repair and the line broke a second time further down the line near 620 Yaronia Drive North.	Division of Water repaired both breaks in the main and the discharge stopped. Permissible discharge.
9/16/2016	Unknown 8681 Olenbrook Drive, Lewis Center, OH 43035	Homeowner reported a red discharge into Flint Run, we found a discharge from outfall 1106T0199, traced it to the corner of Olenbrook and Meadow Ashe Drive.	The substance smelled like a sugary drink mix. No evidence was seen upstream. We checked again on 09-19, outfall was flowing clear and no red substance was in the stream.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
9/16/2016	Unknown 3990 East Broad Street, Whitehall, OH 43213	An unknown party dyed a sewer in Columbus which discharged to Turkey Run and entered the DSCC in Whitehall. The DSCC environmental office called to see if it was the City of Columbus performing the test.	DSCC contained the water and notified the O.E.P.A. Both DSCC's fire department and the City of Columbus Hazmat 6 responded for containment. No further action.
9/19/2016	Columbus Pool Management 8185 Green Meadows Drive North, Suite T, Lewis Center, OH 43035	David Burwell claimed that muratic acid and chlorinated pool water were being discharged onto the street and entering the storm sewer.	Columbus Pool Management was pumping the dechlorinated pool down for the winter. 0 ppm chlorine, 0 ppm copper, 7.4 pH. No violation, permissible discharge.
9/19/2016	Mr. Shane Haner 1220 Simpson Drive, Columbus, OH 43227	Sewage collected in the basement sump pump and then was pumped out into the yard and drained across the sidewalk.	The sewage never made it to the MS4. Called Code Enforcement and requested orders to remedy. The homeowner called a sewer contractor, we confirmed on 9/26 that problem was fixed.
9/20/2016	Ginos Concrete 543 Cumberland Drive, Columbus, OH 43213	Washing out concrete finishing equipment, material pooled up in curb line. Did not reach the inlets.	Called Anthony Zillella and told him this was a violation of City Code 1145.86 and advised him to clean the curb line. Followed up on 09/21/2016, verified that curb line was clean. NOV-RAP 10/25/2016
9/20/2016	Unknown 3601 Olentangy Boulevard, Columbus, OH 43214	Kayakers on the Olentangy River reported seeing a strange condition of gobs of flocculant in mass floating down the river.	Found that the channel of the river had a lot of dislodged algae floating in it. Appeared to be a natural process, no discharge/no violation.
9/22/2016	Unknown 60 Rose Hill Road, Columbus, OH 43068	A large development of iron floc bacteria has grown in the creek going under Rose Hill Road.	No MS4 entry or discharge has occurred. Iron floc naturally grows in the water. No violation.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
9/23/2016	Janardhan N. Bangalore 1017 Joos Avenue, Columbus, OH 43229	Homeowner continues to spray his yard with a weed killer to kill the grass. The exposed soil continues to run off into the curb line during rain storms.	Asked the homeowner to control the erosion coming off of the parcel and into the roadway. Called the Street Department for sweeping. NOV-RAP 11/9/2016
9/28/2016	Unknown 1175 West Goodale Boulevard, Grandview Heights, OH 43212	The roof has recently been coated with an elastomeric coating that was not completely dry when a rain storm blew in. This caused the coating to wash off of the roof and flow across the parking lot to the street.	Notified the City of Grandview's Stormwater Management Section. Discharge not in the City of Columbus storm sewers.
10/5/2016	Unknown 2260 Parkwood Avenue, Columbus OH 43211	Detergent discharge at outfall 0089T0487 was traced to the area of Parkwood and Loretta Avenue.	This area is in the Franklin County jurisdiction. Notified James May of the Franklin County Health Department and completed an "aerator and sewage" complaint form at the county website on 10-06-16.
10/7/2016	Bruce Renard 148 Blenheim Road, Columbus, OH 43214	A sump pump was recently installed at 148 Blenheim, the ground water now being discharged has caused iron floc to grow in the curblines.	No violation, naturally occurring iron bacterial growth. Distributed KNOW cards and Iron Flocc Fact Sheet.
10/7/2016	Unknown 777 River Street, Columbus, OH 43222	Complaint came in stating that there was steam coming out of the storm inlets under the railroad bridge.	Checked inlets under railroad bridge and other inlets in the area. No steam was found coming out of the inlets.
10/11/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	Water main break on Karl Road, North of Pauline. Discharge entered curblines and flowed South to an inlet which discharges to Adena Brook.	Permissible discharge. Division of Water repaired the leak and the discharge stopped.
10/13/2016	Super Deal Cars 1209 North 4th Street, Columbus, OH 43201	Wet sanding of cars inside a building The drainage flowed out the garage bay door and crossed the parking lot and sidewalk areas.	The product did not ever reach the street or curb inlet. No violation. A cleanup of the sidewalk area was requested; checked 10/14/16, all cleaned up.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
10/13/2016	Roger and Zelda Gibson 2179 Harrisburg Pike, Grove City, OH 43123	Sump pump discharge in county storm sewer which flows North to the City's MS4 and discharges to Big Run. Ammonia was at 10 + ppm and detergents were at 1.5 ppm.	Turned findings over to Franklin County Public Health for resolution. Filled out Franklin County investigation form online and submitted on 10/14/2016.
10/14/2016	Patricia Barron and May Beverly 611 Yaronia Drive North, Columbus, OH 43214	A protection dam which covers the service lateral in the stream for 611 Yaronia Drive North is failing which is allowing for sewage to leak out and enter Adena Brook.	Turned findings over to Sewer Permits Office for Notice of Violation and resolution on 10/17/2016.
10/17/2016	Ms. Nan Burns 235 Overbrook Drive, Columbus, OH 43214	A collapsed sewer lateral was overflowing from two sewer cleanouts that are downhill from the house. The sewage flowed into a channel that flows to Adena Brook, but did not reach the stream.	A private contractor was attempting to clear the line at the time of our arrival. He replaced a portion of the sewer lateral and installed new cleanouts. Checked 10/20/2016, problem resolved.
10/18/2016	Unknown 4076 Fisher Road, Columbus, OH 43228	Witness noticed turbid water coming out of 0164T0582 outfall.	When I arrived discharge from 0164T0582 was clear. Ran dry weather screening, all tests passed. Water was clear.
10/24/2016	Unknown 3365 Farm View Street, Columbus, OH 43232	A report of oil being dumped in and on two different inlets and on the ground in the neighborhood.	Pooled oil on the ground was cleaned up with Oil-Dri. Both inlets had residual oil on the grates, no pooled oil in the catch basins. Distributed educational material in the neighborhood.
10/31/2016	Unknown 2700 Airport Drive, Columbus, OH 43219	ICID of 2.5 ppm ammonia at outfall 0057T0387. Traced through unmapped sewers to 10+ ppm about 1000 feet to the East of the outfall.	The source was narrowed to two properties within the Mifflin Township and Franklin County jurisdiction. Turned over via web report form to Franklin County Public Health, returned on 01/09 and outfall 0057T0387 passed the sampling.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
11/1/2016	Birchwood Foods 1821 Dividend Drive, Columbus, OH 43228	Contractor doing directional boring hit power to pretreatment building which caused the sanitary system to back up and overflow to the storm sewer.	Hansel on site to clean City assets and Birchwood assets to the stream. Hansel also cleaning grease that entered stream. NOV-RAP 11/28/2016
11/2/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	Water main break at 200 East Campus View Boulevard entered the MS4 and discharged to a pond which was treated with a blue/green dye.	Permissible discharge, no violation. Water main will be repaired on 11/5/2016.
11/8/2016	Unknown 327 East Hudson Street, Columbus, OH 43202	Complaint that businesses have dumped gray water into grated manhole.	Talked to three businesses around the manhole (Exotic Latino Grill, 14-0 Carryout and United Dairy Farmers). No admissions of guilt or evidence obtained. Gave them all copies of City Code 1145.86 and Do You Know.
11/8/2016	Unknown 3912 Snowshoe Avenue, Grove City, OH 43123	Complaints called to have sump pump discharge tested. Had orange staining in curb.	Iron bacteria is in the discharge from the sump. Ran dry weather screening and passed all tests. Home is a new build, discharge is permitted.
11/8/2016	AMG Studio 6344 Nicholas Drive, Columbus, OH 43235	The Environmental Crimes Unit asked us to assist with a complaint they received regarding the improper disposal of UV printer ink.	The ink was being disposed of in the interior sink and toilet which flows to the sanitary. The Pretreatment group will do a follow-up investigation. Company was notified of City Code 1145.86.
11/16/2016	Ernst Concrete Plant #402 3361 Successful Way, Dayton, OH 45413	Poor housekeeping at the plant has caused the BMPs to not work properly, which has therefore caused an illicit discharge of slurry to enter the MS4 from their permitted outfall.	Spoke with Bob Sturwold and issued City Code 1145.86. Asked Bob to clean the site and BMPs as well. NOV-RAP 12/2/2016
11/16/2016	Custom Sign Center Inc. 3200 Valleyview Drive, Columbus, OH 43204	Water jet process water was plumbed to the storm sewer. The company had been ordered to immediately disconnect on 11/03/16 per Rick Blackmore.	We requested immediate disconnection of the plumbing and Mr. Petee used a saw to cut the discharge pipe. NOV-RAP 12/8/2016

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
11/16/2016	Dick Cold Storage 3080 Valleyview Drive, Columbus, OH 43204	Discharge from the facility tested high for copper, phenols, detergents and ammonia. We noted that the cooling tower area runs off into this drainage and also a strong odor of propylene glycol was noted and tested positive in the sample.	Company is investigating the entry point of glycol into the storm sewer. NOV to be issued.
11/17/2016	University Village Apartments 2981 Olentangy River Road, Columbus, OH 43202	Complaint was called in stating University Village washes their busses outside in the summer and less frequently in the fall. Activity was not going on at the time.	Talked to Todd Jessup with University Village. He admitted doing this practice for their busses. Gave him a copy of City Code 1145.86 and Do You Know. NOV-RAP 12/1/2016
11/18/2016	Unknown 3277 Roswell Drive, Columbus, OH 43227	Complaint about leaves being shoved into catch basin at 3277 Roswell. All catch basins in area were clean.	Put yard waste info and City Code 1145.86 on doors in neighborhood. S.M.O.C. was out on 11/17/2016 and also found that catch basins were clean.
11/22/2016	Peking Dynasty 1773 West 5th Avenue, Columbus, OH 43212	Washwater somehow has entered into their sump pump and water is being pumped out to the curb. Tested pump 10+ppm NH3 and 3+ Detergents.	Explained City Code 1145.86 to Manager. Explained that the issue needs to be addressed. Manager said she would take care of the plumbing issues. NOV-RAP 12/22/2016
11/22/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	A 6 inch water main break has occurred in front of 4833 Ridgerun Drive. The turbid discharge flows through the MS4 and discharges behind 4289 Maize Road, which is the start of Adena Brook.	Permissible discharge, no violation. Water main break emergency repair was underway.
11/22/2016	Unknown 1560 Union Avenue, Columbus, OH 43223	Diesel fuel was spilled in the alley behind 1560 Union Avenue. Fuel stayed in the alley and did not reach the curbline or the MS4.	Tried making contact with someone at 1560 Union Avenue. Called Street Maintenance to clean fuel in alley. Follow up on 11/23/2016. Fuel was cleaned up. Left a business card, copy of City Code 1145.86 and Do You Know.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
11/23/2016	Columbus Division of Water 910 Dublin Road, Columbus, OH 43215	Complaint was a white substance in the creek. We found the light grey color in this section to be most likely the after-effects of the water leak and subsequent repair on 11/22 on Ridge Run Drive.	The slug of silt from the leak and repair had reached this area. Checked upstream and down, no other source. Creek clear upstream at 4309 Maize Road.
11/25/2016	Birchwood Foods 1821 Dividend Drive, Columbus, OH 43228	Pressure washing roof to remove oils and grease with no containment to prevent discharge from roof downspouts.	Cleanup had been underway for several hours before we were notified. We advised company representatives of what further cleanup was needed. NOV to be issued.
11/29/2016	Unknown 2012 Agler Road, Columbus, OH 43224	Complaint Section requested testing of ponded water for indications of sewage.	Passed dry weather test.
12/6/2016	Jack Gibson Sr. 1696 Bostwick Road, Columbus, OH 43227	Homeowner has blown leaves from the yard out to the curblin. Homeowner had intended on finishing the cleanup, but had ran out of bags.	Notified homeowner of City Code 1145.86. Asked homeowner to finish the leaf cleanup. SMOC will be out to clean the inlet.
12/6/2016	Valero Gas Station 1360 Karl Road, Columbus, OH 43224	Impaired driver ran into a gas pump with an automobile, causing gasoline to spill onto the ground which then caught fire.	Directed maintenance to shut down all pumps until needed repairs were made on the leaking fuel system. Checked outfall, no fuel noted in the stream.
12/9/2016	Skip's Service Center 2162 McKinley Avenue, Columbus, OH 43204	A small overflow of 1-2 gallons of heating oil spilled out onto the parking lot in the gravel.	Business owner was informed of City Code 1145.86 and had already started the cleanup before our arrival. No entry to MS4, no violation.
12/14/2016	Unknown 810 Miranova Place, Columbus, OH 43215	Bag that was in 0002T0601 (8" Storm from the west) was deflated causing sheen to get out to river. Notified Mike Foster on 12/14/2016 to have bag reinfated.	Checked CSO58 and 0002T0601 where expansion bag is in 8" storm from the west. Bag was inflated on 12/15/2016. No discharge from line. Checked banks of Scioto, no sheen found.

2016 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
12/19/2016	Unknown 1195 Michigan Avenue, Columbus, OH 43201	Leaves were in the curb line on both Michigan Avenue and West 4th Avenue, all up and down the road.	Called Street Maintenance to have them come out to investigate if the streets should be swept. Sewer Maintenance will clean the inlets at the intersection.
12/21/2016	Team Fishel 1366 Dublin Road, Columbus, OH 43215	A contractor was doing directional boring and hit a natural gas main, causing a large gas leak which was ignited and caused an explosion when the gas went into the building at 2845 West Broad.	Checked outfall 0046T0439 where the discharge occurred and found 8.4 pH and turbid water, but little debris or other evidence.
12/21/2016	Division of Water 910 Dublin Road, Columbus, OH 43215	Emergency water line break in front of 370 Weisheimer causing muddy water to enter into the MS4.	Division of Water was finishing repair when we arrived. Discharge had stopped.
12/23/2016	Mr. Marat Zhuravel 1712 Striebel Road, Columbus, OH 43227	Blocked or collapsed sanitary lateral at the house caused sewage overflows from a front yard cleanout. Sewage reached the street and inlet after flowing through the yard.	Owner called a contractor who fixed the lateral. Contacted the Health Department and the Sewer Permits office because of unauthorized repairs to the lateral.
12/28/2016	Danniel McQuirt 1735 Dyer Road, Grove City, OH 43123	Septic tank is not functioning properly; overflow has occurred from a clean out at the rear building.	Asked homeowner to cap the cleanout. Notified Health Department about the violation and they informed us that the property is in court currently to be connected to the sanitary sewer.
12/30/2016	NY Fried Chicken and Pizza 2057 Morse Road, Columbus, OH 43229	A clogged sewer lateral caused an overflow from cleanout. This in turn caused sewage to enter the MS4.	Gave them copy of City Code 1145.86 and Small Business Guidelines. Business capped cleanout. Follow up on 01/03/2017, CPR Drains jetted and cleaned lateral and the MS4.

Failure: YASSTAGNCY	Repair: YHNDCLND	Further Action: _____
Comments: YBO1 - The 8 inch sanitary sewer serving the problem location was open and flowing when checked. Checked manhole # 0056S0466 and manhole # 0056S0467. Also, we located storm inlet # 0056T0471 underneath debris and removed all blockage from inlet grate and window opening. Water drained, storm sewer is open and flowing. E-mailed picture of storm inlet and culvert pipe to R. Ellinger and P. Fannin II. Bad odor was coming from creek / ditch line. Storm Water came out and informed us that the smell and sheen from on water is due to decaying leaves, etc. No further work needed, per R. Ellinger.

<p>Comments: YSSO5 – The upflow at 1380 Dublin rd was due to the private service connection being broke dow n.. The 30 inch City sanitary sewer was open between upstream manhole # 0048s0157 and downstream manhole # 0048s0154. The sewage entered the storm system at inlet/catch basin/ditch number 0048t0399. Mike Foster was notified by Harold davis. We did a dye test at and dye came out of the 4 inch forced main service line but did not enter the 30 inch sanitary sewer. Storm water was called to test storm inlet and water from the upflow. Storm water crew notified the all agencies and ordered tenant at 1380 dublin rd to cease the pump runnint the 4 inch forced main. Clean up will be done by the private sewer cleaning company doing the repair.</p>

Comments: There was no evidence of an upflow occurring at problem location. 8 inch sanitary sewer open and flowing when checked at manhole # 0233S0289, # 0233S0287, and # 0233S0285. We noticed a rust red sediment combined with an oily sheen floating in the stream at rear of problem location. Notified pre-treatment of our findings and requested they take some samples to determine type and source of product. Notified Mike Foster, Bob Ellinger of our findings as well.

Comments: At the rear of 1624 CLARA ST, a sizeable amount of grease was spilled on the ground from a business at 1593 SHAWNEE AVE. Pretreatment was notified, and were on scene to do their investigation. The EPA was also notified by an unknown person and information was passed on to them as well. The grease did enter a private inlet at the rear of 1624 CLARA ST. We did have another job to run, we did hear on the radio that power cleaning was called by stormwater.

Problem Description: OK TO CLOSE 06/09/16. MR. TODD'S NEIGHBOR'S SUMP PUMP HAS BEEN RUNNING NON STOP FOR TWO MONTHS AND THE WATER IS COLLECTING IN FRONT OF MR. TODD'S HOUSE. MR. TODD THINKS THAT IT IS A HEALTH HAZARD. PLEASE CHECK THE STORM DRAIN NEARBY TO SEE IF IT IS CLEAN. MR. TODD WANTS SMOC TO TELL THE NEIGHBOR TO STOP PUMPING WATER. I INFORMED MR. TODD THAT SMOC COULD NOT TELL THE NEIGHBOR TO STOP PUMPING BUT I COULD TRANSFER HIM TO 311 TO MAKE A REPORT / REQUEST TO CODE ENFORCEMENT. I TRANSFERED CALL TO 311. THE NEIGHBORS HOUSE IS 1678 DUXBERRY RD.

Comments: Two B Excavating was installing a new water tap and the old main split. Water filled the trench and washed silt into the curb line. No silt or debris reached an inlet. I called Stormwater at 10:10 AM to report this and we met them on site. The contractor was cleaning up the curb line and Bob Lamb spoke with the job superintendent. No further work needed.

Comments: SPILL - We checked the CoC outfalls north and south of the affected area and they were running clear, no contaminants. A contractor painting the tennis courts south of the athletic fields spilled about 20 gallons of polymeric resin into the school's private drains. CFD was on site. The contractor was told that he was responsible for the cleanup. The dispatcher will try to contact the school's owners and CBE. No further work is needed. Notified Jeff Vesco Monday 7/18/2016 by phone at 7:30 AM.

Problem Code: YOTHP - Other problem not in codes.	

Problem Description: DO NOT RELEASE THE CALLERS NAME TO THE RENTAL MANAGEMENT STAFF. THE CALLER REPORTED THAT DURING THE SUMMER THE UNIVERSITY VILLAGE APARTMENT COMPLEX WASHES THEIR BUSES AND THE OIL AND FLUIDS FROM THE BUSES WASH INTO THE STORM DRAINS. CALLER CALLED THE EPA AND WAS INFORMED TO CONTACT SMOC. THE CALLER IS UNSURE IF DETERGENT IS USED. THE BUSES ARE WASHED BETWEEN 2 AND 4PM DAILY DURING THE SUMMER BUT DURING COOLER MONTHS IT IS LESS OFTEN.

Comments: At location we checked the sanitary sewer and found it to be open and flowing. The water standing did not appear to be from any pumping of sanitary sewage. We informed storm water of our findings and to have them to get a sample of the water to find out if there is any oil or solvents that could be coming from an auto repair/ car lot where the water could be draining from. Stormwater informed us that there was no oil, and that it is ground water

Comments: Fishel hit a gas line while boring a fiber cable which caused an explosion. CFD called SMOC for assistance. After speaking with Columbia gas, I was notified that the sanitary sewer was holding gas. MH# 0077s0334 in particular was recorded at 100% gas concentration. We replaced 3 MH lids with open grates to allow the sanitary system to purge, 1 upstream and 1 downstream of MH# 0077s0334. These lids will be replaced in Friday. Also noticed a large amount of contaminated runoff from the fire fighting efforts. I called J. Vesco and notified him of the situation. He then stated that he would call his own crew in to investigate the stormwater runoff.

**ANNUAL
REPORT**

**2016 NPDES Stormwater
Sampling Summary**

City of Columbus, Ohio

February 16, 2017

2016 NPDES Stormwater Sampling Summary

Three City–Owned Outfalls

Introduction

The report titled *2016 NPDES Stormwater Sampling Summary – Three City-Owned Outfalls* is being prepared in fulfillment of requirements set forth in the City of Columbus’ MS4 Permit, OEPA Permit No. 4PI00000*CD. The permit requires implementation of a Wet Weather Monitoring Program (the program), including annual reporting and evaluations of the program through the five-year permit cycle. This annual report provides an evaluation of the data collected in 2016 in comparison with national stormwater data and the City of Columbus wet weather sampling data from 2007 – 2014.

This report summarizes monitoring and water quality sampling activities for 2016, which is the tenth program year (year five of the second permit cycle.) Results from each of the last eight program years have been incorporated into the various summary tables throughout this report. **Table 1**, below, represents a summary of the previous reports submitted under permit Nos. 4PI00000*BD and 4PI00000*CD.

Table 1 Summary of Program Reports

Permit No.	Calendar Year	Permit Year	Report Date
4PI00000*BD	2007-2011	1-5 (4PI00000*BD)	March 7, 2012 (final report)
4PI00000*CD	2012	1 (4PI00000*CD)	February 18, 2013
4PI00000*CD	2013	2	February 25, 2014
4PI00000*CD	2014	3	January 30, 2015
4PI00000*CD	2015	4	March 21, 2016
4PI00000*CD	2016	5	February 2017

The City’s consulting engineer was able to collect samples during all four quarters of 2016. Analyses of all samples were performed by MASI Environmental Laboratories and the Columbus Surveillance Laboratory. Each laboratory analyzed the samples with regard to the parameters summarized in **Table 2**.

Table 2 Summary of Laboratory Parameter Responsibility

MASI Environmental Laboratory		
Parameter	Abbreviation	Unit of Measure
Fecal Coliform	-	# / 100 ml
E. Coli	-	# / 100 ml
Nitrite	NO ₂	mg / l
Total Phosphorous	-	mg / l
Orthophosphate	-	mg / l
Carbonaceous Biochemical Oxygen Demand	CBOD ₅	mg / l
Biochemical Oxygen Demand	BOD ₅	mg / l
Chemical Oxygen Demand	COD	mg / l
Columbus Surveillance Laboratory		
Parameter	Abbreviation	Unit of Measure
Total Suspended Solids	TSS	mg / l
Ammonia	NH ₃	mg / l
Alkalinity	-	mg / l
Oil and Grease	-	mg / l
Total Cyanide	-	µg / l
Hardness	-	mg / l
Total Recoverable Cadmium	Cd	µg / l
Total Recoverable Chromium	Cr	µg / l
Total Recoverable Copper	Cu	µg / l
Total Recoverable Lead	Pb	µg / l
Total Recoverable Nickel	Ni	µg / l
Total Recoverable Zinc	Zn	µg / l

Stormwater Pollutant Sources

Stormwater pollutants monitored for the Columbus program are often released by materials or products used in construction, transportation, manufacturing, and in residential areas. For example:

- Galvanized roofs and gutters, paint, and tires are common sources of zinc;
- Brake pads, antifreeze, and pesticides are possible sources of copper;
- Burning fuels and batteries are common sources of cadmium;
- Fertilizers, detergents, and organic matter are common sources of nitrogen; and
- Pets, wildlife, and failing home septic systems are common sources of bacteria.

It is important to note that there can be many different sources that contribute to the level of pollutants in stormwater.

Sampling Locations

During program years 1-6, five sampling locations throughout the City representing medium density residential, high density residential, multi-family residential, commercial, and industrial land uses were used in the program. The wet-weather water quality data from these sites were thoroughly analyzed and reviewed. In an effort to further characterize overall water quality of the City's MS4, the City requested (and received approval) that Ohio EPA allow establishment of three new sampling locations representing **residential, commercial, and industrial** land uses. In 2013 the City began using these newly established sampling locations in lieu of the previous five locations reported in years past. **Table 3**, below, presents a summary of the land use, tributary acreage, and location of these three outfalls sampled.

Table 3 Summary of City Sampling Locations

Site	Land Use	Tributary Area (ac)	Location	Manhole (Structure) ID
OF-01-CD	Industrial	15	Dearborn Drive	0744T0035
OF-02-CD	Commercial	16	Scarborough Boulevard	0394T1216
OF-03-CD	Residential	16	Creighton Place & Arrowsmith Drive	0477T0395

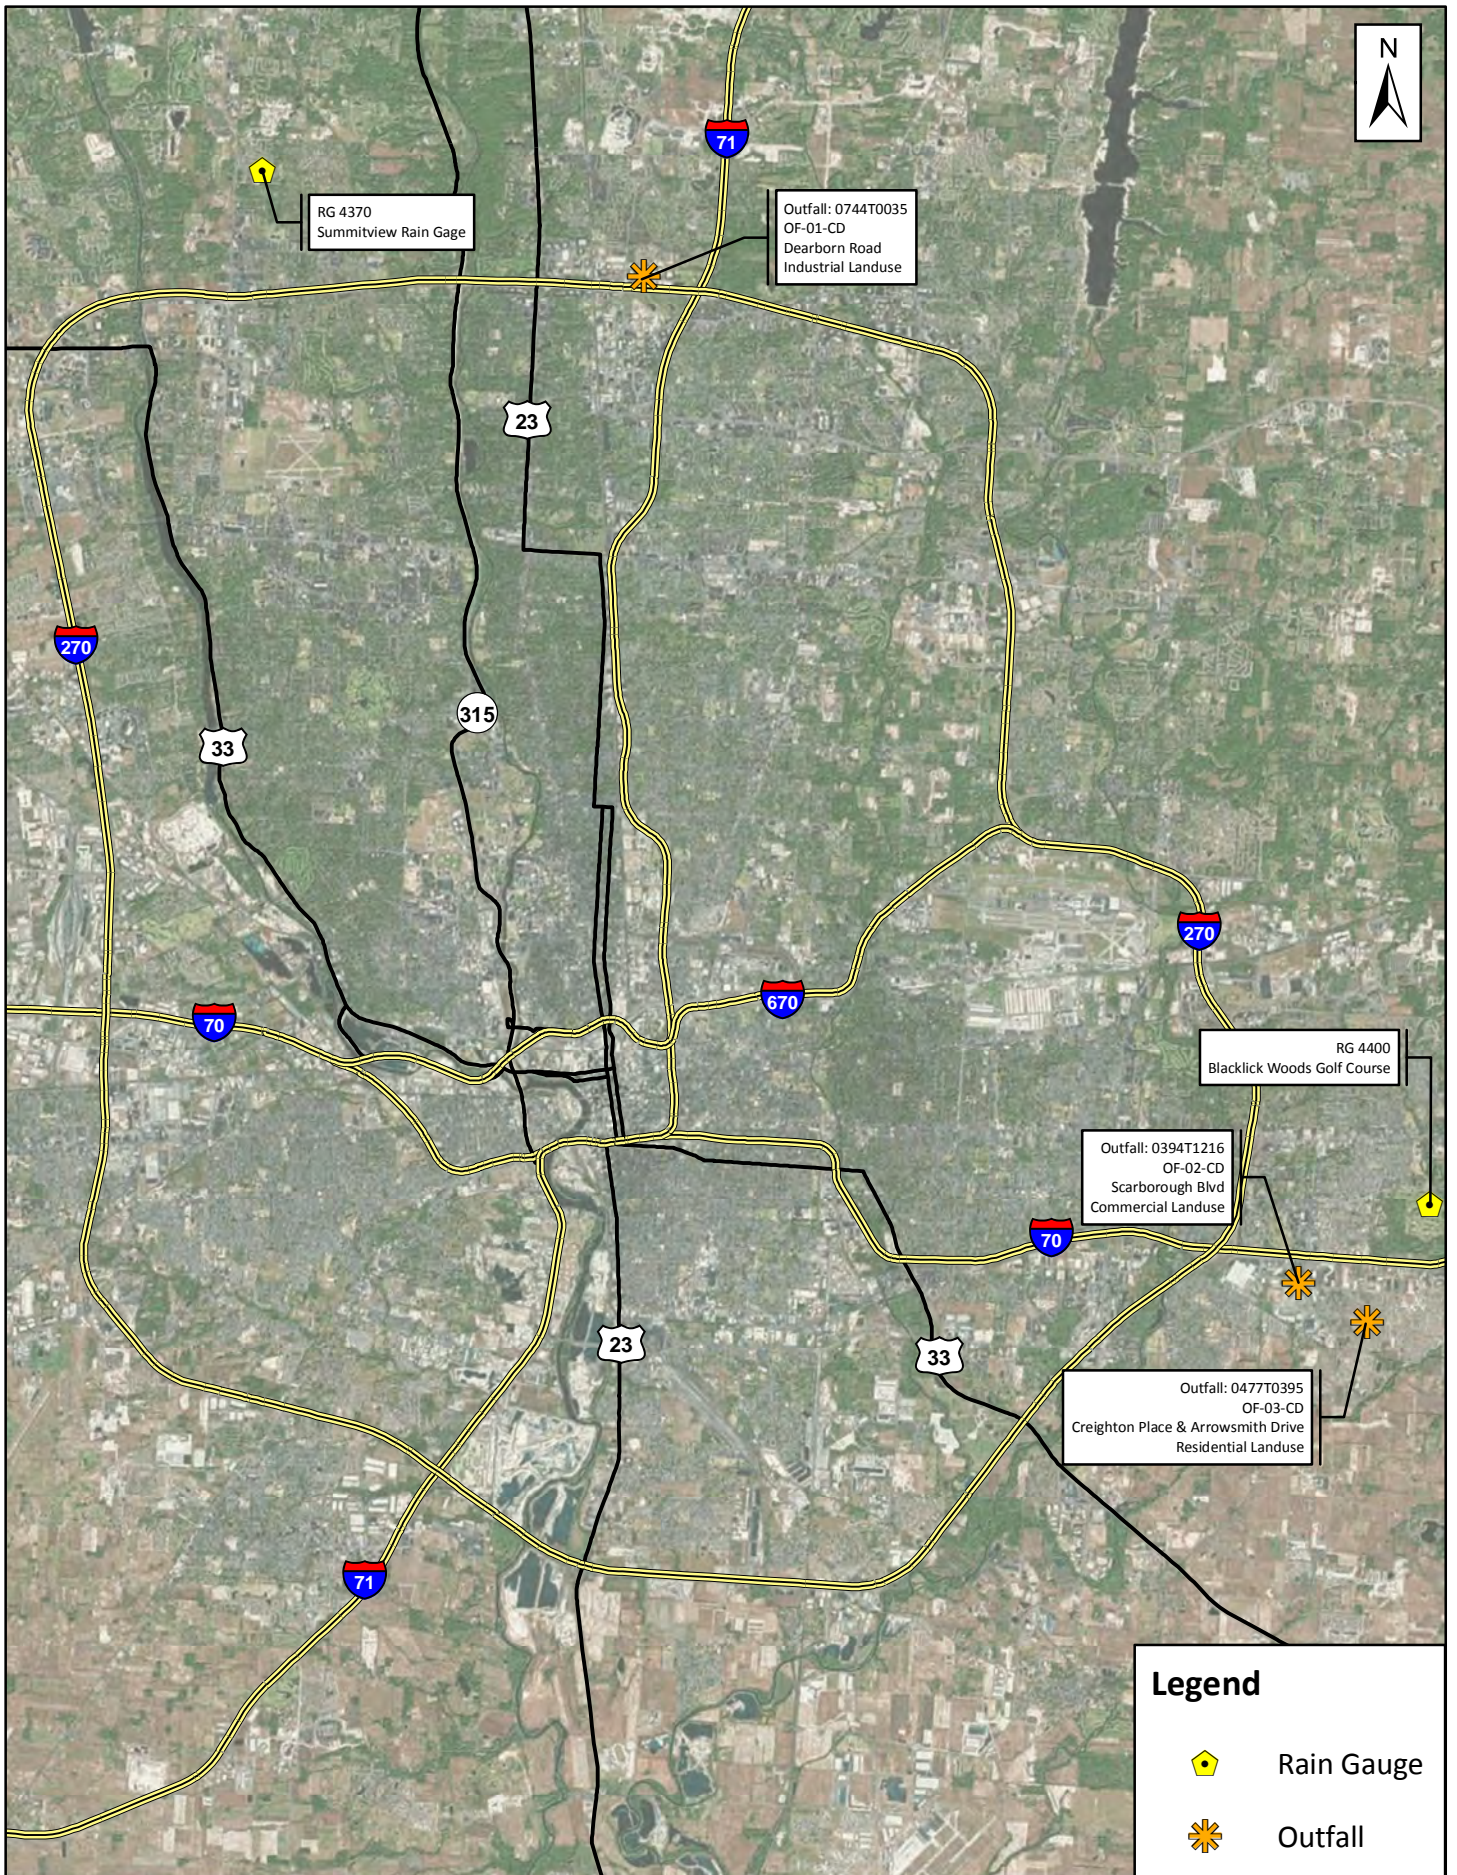

Description of Sampling Locations

Figure 1 illustrates the location of each sampling site as well as the nearest rain gauge. Each sampling site is described in further detail below:

OF-01-CD: This sampling point is located near Dearborn Drive approximately 550-feet southeast of Worthington Galena Road. The stormwater monitored at this location comes from a tributary area of approximately 15 acres of industrial land use. Photos and a site map of this sample location are presented on **Figure 2**.

OF-02-CD: This sampling point is located off Scarborough Boulevard approximately 1000-feet south of Alshire Road. The stormwater monitored at this location comes from a tributary area of approximately 16 acres of commercial land use. Photos and a site map of this sample location are presented on **Figure 3**.

OF-03-CD: This sampling point is located near the northwest corner of the intersection of Creighton Place and Arrowsmith Drive. The stormwater monitored at this location comes from a tributary area of approximately 16 acres of residential land use. Photos and a site map of this sample location are presented on **Figure 4**.

Sampling Events and Rainfall Data

Rainfall event characteristics for each sampling event in 2016 were obtained from rain gauges located throughout the City. Rain gauges used for this program were selected based on their proximity to the established program sampling sites and are illustrated in Figure 1. **Table 4** provides a summary of the dates when sampling occurred at each location during Quarters 1 through 4.

Table 4 Summary of Sampling Events (by location)

Location	Quarter 1	Quarter 2	Quarter 3	Quarter 4
OF-01-CD	03/10/2016	06/15/2016	09/09/2016	11/08/2016
OF-02-CD	03/24/2016	06/15/2016	09/09/2016	11/08/2016
OF-03-CD	03/10/2016	06/15/2016	08/31/2016	11/08/2016

Rain events were selected based on the requirements outlined in the City of Columbus NPDES Stormwater Monitoring Project Quality Assurance Project Plan. **Table 5** provides a summary of the rain events during which sampling was performed. Hydrographs for these rain events are included in **Appendix A**.

Table 5 Summary of Rainfall Data (by event date)

Location	Rain Gauge	Total Rain Volume (in)	Antecedent Period (day)	Duration (hr)
Quarter 1				
OF-01-CD	RG 4370	1.00	2.0	10.7
OF-02-CD	RG 4400	0.40	9.5	3.1
OF-03-CD	RG 4400	1.00	2.5	9.5
Quarter 2				
OF-01-CD	RG 4370	1.00	4.5	8.9
OF-02-CD	RG 4400	0.56	15.9	9.1
OF-03-CD	RG 4400	0.56	15.9	9.1
Quarter 3				
OF-01-CD	RG 4370	0.48	14.4	3.0
OF-02-CD	RG 4400	0.60	12.0	2.9
OF-03-CD	RG 4400	No Rain Event Recorded		
Quarter 4				
OF-01-CD	RG 4370	0.12	17.9	1.0
OF-02-CD	RG 4400	0.20	17.9	1.5
OF-03-CD	RG 4400	0.20	17.9	1.5

For third quarter data, RG 4400 near site OF-03-CD did not record a rain event. RG 4370 also did not record a rain event on 08/31/2016, so no data was available for use on this date.

As shown in Table 5, it is important to note that the antecedent periods for Q2, Q3, and Q4 are significantly higher than the past three years.

NPDES Wet Weather Sampling Results

This section presents data for each sampled quarter in 2016 as analyzed by MASI Environmental Laboratory and the Columbus Surveillance Laboratory. These values are reported for each location in **Tables 6 through 9** found in **Appendix B**. The quarterly event mean concentrations (EMC) for each sampling location were averaged to determine the annual mean for each of the sampled parameters.

The EMC of a pollutant is defined as the total pollutant mass discharged during a runoff event divided by the total runoff volume. An estimate of the EMC is typically obtained from the analytical results of flow-weighted composite samples collected during a runoff event. Discrete grab water samples are collected throughout the duration of the runoff event and combined into a single composite sample based on the proportion of the total flow volume represented by each sample. The composite sample is sent to the laboratories for analysis with the results representing the EMC. In cases where no flow data is available, for example due to equipment malfunction, the event composite sample is prepared and analyzed with time-weighted compositing, and EMC concentrations are estimated from that sample. The flow-weighted/time-weighted composite calculations for each site and sampling event are included in **Appendix C**.

Each discrete grab sample is analyzed individually. The results are mathematically combined into a single value representing the EMC based on the proportion of the total flow volume represented by each grab sample. Individual results of the grab samples and calculations of the flow weighted bacteria EMC values based on the grab samples are included in **Appendix D**.

A few of the analytical results indicate that measurements were less than the value which can be routinely detected and reported by a laboratory. These “non-detected” results are indicated with a “less than” (<) symbol preceding the number. This value is known as the practical quantification limit (PQL). When a result is below the PQL, the PQL is used to determine the average value. For example, samples were collected from OF-01-CD (Dearborn Road) during Quarters 1 through 4 (Table 6). The orthophosphate values determined from the flow-weighted composite samples were <0.05 mg/L, 0.09 mg/L, <0.05 mg/L and 0.11 mg/L, respectively. These values are considered to be an EMC for orthophosphate for each event. The annual average (mean) of these values was determined by averaging 0.05, 0.09, 0.05 and 0.11 to obtain 0.08 mg/L, which is the annual mean orthophosphate EMC for OF-01-CD (Dearborn Road) in 2016.

Comparison of 2016 Wet Weather Monitoring Data

Evaluation of 2016 Columbus Monitoring Data

Table 9 compares the average quarterly values of EMCs generated in 2016. Comparison of the 2016 data and average EMCs reveal the following observations:

- Concentrations of individual parameters varied by site and event as found in the results from previous years.
- Bacteria concentrations are significantly higher in the residential areas.
- Zinc levels are significantly higher in industrial and commercial areas.
- Phosphorus and orthophosphate levels were significantly higher in residential areas

Evaluation of 2007-2015 Columbus Monitoring Data

Table 10, also found in Appendix B, compares the Program’s average annual EMC values for each parameter at each sampling location with that of past years of the program (note these are separated by land-use; however, as previously discussed, sampling locations from 2007-2012 are different than 2013-2016. Evaluation of this data reveals the following observations:

- The comparisons of 2016 data to 2015 data indicate that the mean values for the commercial and industrial sites are very similar for most parameters
- Comparison of bacteria concentrations in industrial and residential areas for 2016 are significantly higher than previous years. However, as Table 5 indicates, the antecedent rainfall period in 2016 for Q2, Q3, and Q4 sampling events was significantly higher (15 to 20 days in 2016) compared with less than 10 days in the previous three years. The theory is that more bacteria and microorganisms will accumulate in the basins from animal waste (birds, dogs, etc.). This anomaly has been documented in numerous technical papers and studies over the past 15 years.
- Residential areas exhibit higher levels of CBOD₅ and BOD₅ in 2016 than previous years
- The mean concentrations of all parameters for the (2013-2016) industrial and residential data is generally lower than the mean concentrations for the (2007-2012) industrial and residential data. This may be largely because the sites were relocated to new basins.

Comparison of Columbus Monitoring Data to NSQD Values

National Stormwater Quality Database (NSQD) Version 3 was compared to the sampling results obtained from the three City of Columbus sampling locations to identify similarities and differences. NSQD includes a total of 8,602 rain events from 104 cities throughout the continental United States. A copy of the Version 3 database can be found at:

<http://rpitt.eng.ua.edu/Research/ms4/mainms4.shtml>

The comparison between the City’s data and NSQD was performed by creating box and whisker plots of the NSQD records. Box and whisker plots provide a graphical representation of data distribution by displaying the minimum, median, maximum, 25th percentile, and 75th percentile values for a given set of data. **Figure 5**, below, illustrates how to interpret the elements shown in box and whisker plots.

Box and whisker plots of the NSQD records were created for 17 parameters of interest, which included: ammonia, BOD₅, COD, total suspended solids (TSS), total phosphorus, fecal coliform, E. coli, hardness, oil & grease, orthophosphate, cadmium, chromium, copper, cyanide, lead, nickel, and zinc. Added to each plot were the City’s quarterly EMC 2016 sampling data, along with the mean values of the City’s combined 2007 through 2012 data and the mean value of the combined 2013 to 2014 data.

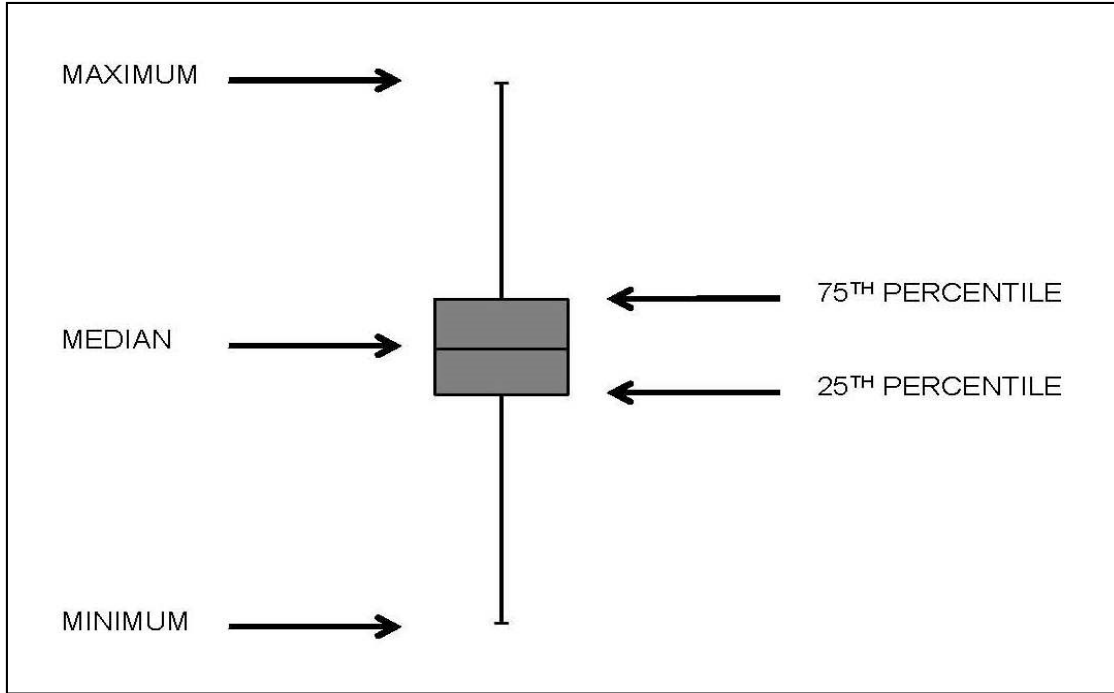

Figure 5 – Box and Whisker Plot Interpretation

Each of the three sampling locations was matched to a subset of the NSQD record set representing the same land use category. Each sampling location has been classified by land use, as described previously, and again summarized in **Table 11**, below.

Table 11 Land Use Designation of Sampling Sites

Sampling Site	Land Use
OF-01-CD	Industrial
OF-02-CD	Commercial
OF-03-CD	Residential

The 2016 City sampling values, and ten-year program means at all sampling locations are generally consistent with the NSQD data ranges represented by the box and whisker plots in **Appendix E**. There are a few exceptions:

- Fourth quarter ammonia levels were higher than NSQD 75th percentile for all sites sampled.
- BOD levels in residential areas were significantly higher than the NSQD 75th percentile.
- Analyte values for lead and nickel are consistently lower than the median and 25th percentile values of the NSQD data for each sampling site.
- Bacteria levels were significantly higher than the NSQD 75th percentile during the second, third, and fourth quarters at each sampling location, especially residential and industrial areas. The most logical explanation for this is the longer antecedent rainfall period that occurred in 2016, as compared to previous years.

Not all parameters are represented in the box and whisker plots shown in Appendix D. CBOD₅, alkalinity, and nitrite are not included in the comparisons because less than 100 events were available within the NSQD.

Conclusions

Samples were collected and evaluated in a manner consistent with the QAPP established for this program, indicating that the program is yielding quality data useful in establishing a dependable database of stormwater measurements for future interpretation. On an annual basis, the reported lab data are evaluated with regard to plausibility, significant digits, and practical quantification limits. Each record is validated to assure that any laboratory, analytical, or field collection errors have been identified. Any records that are questionable have been reviewed prior to development of this report. Additionally, any records found to be inaccurate or false have been flagged (with explanation) or removed from the report.

The comparisons of 2016 data to 2015 data indicate that the mean values for bacteria, both fecal coliform and E. coli, as well as BOD₅ and COD, are significantly higher than previous years for industrial and residential land use.

The overall stormwater quality, as characterized in the 2016 NPDES Stormwater Sampling Summary, varies from event to event, site to site and year to year as demonstrated by the variation in mean values. This is a common trend in stormwater due to range of outside and local factors that can impact water quality such as temperature, precipitation, volume and intensity, air quality, street cleaning programs, and variation in antecedent precipitation conditions between storms.

The largest and most significant observation of the 2016 data is the bacteria levels in the residential and industrial basins. This appears to be driven primarily from the antecedent days without significant rainfall as discussed previously in this section

Appendix E

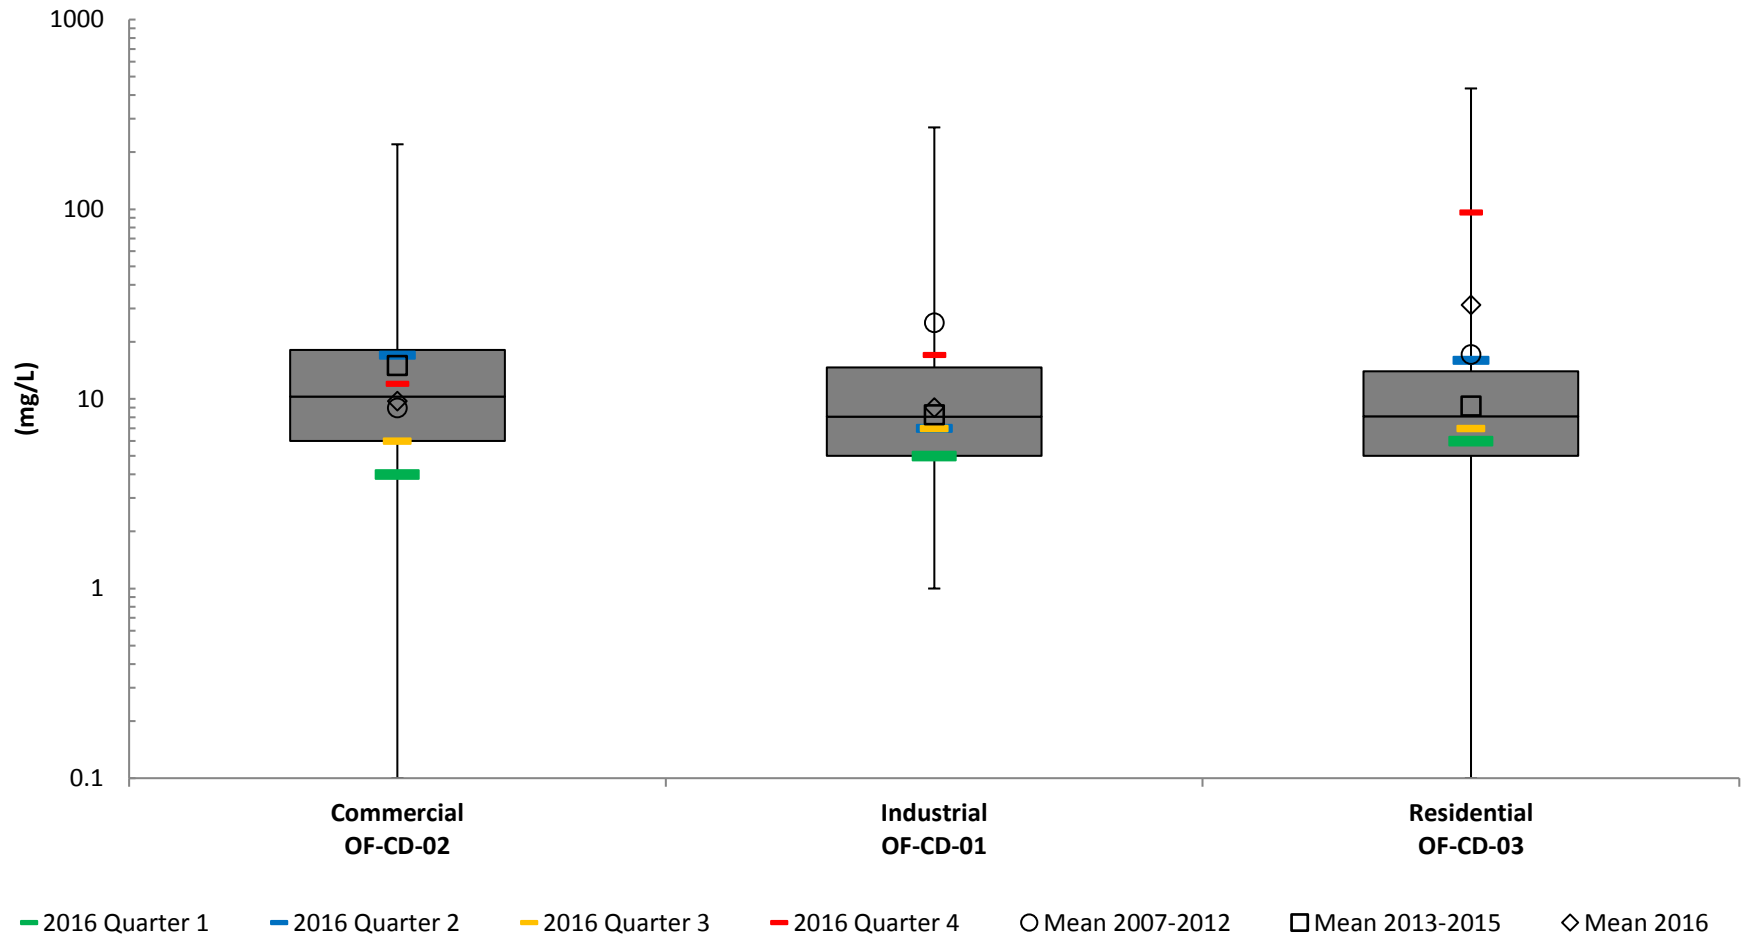

Box and Whisker Plots for the National Stormwater Quality Database Version 3

Ammonia
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots

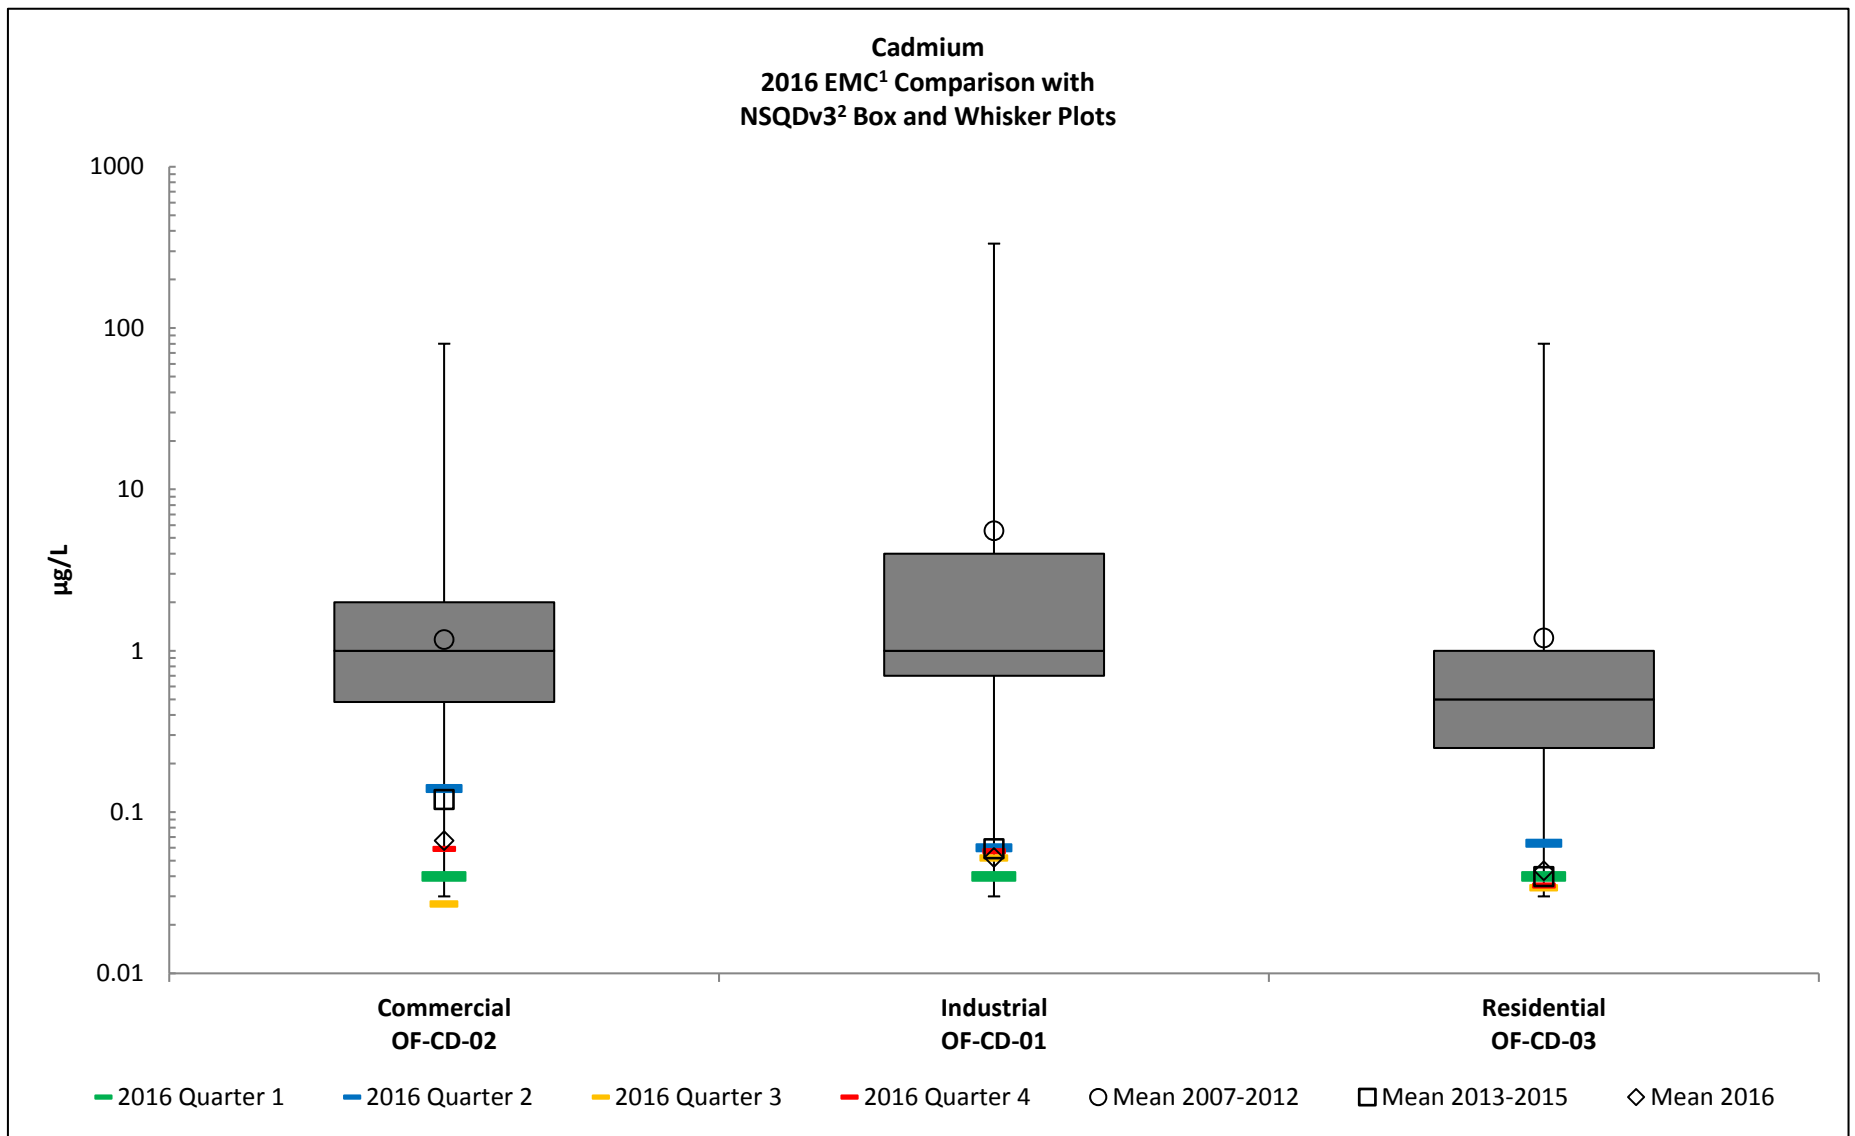

1. Event Mean Concentration
 2. National Stormwater Quality Database, Version 3

BOD₅
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots

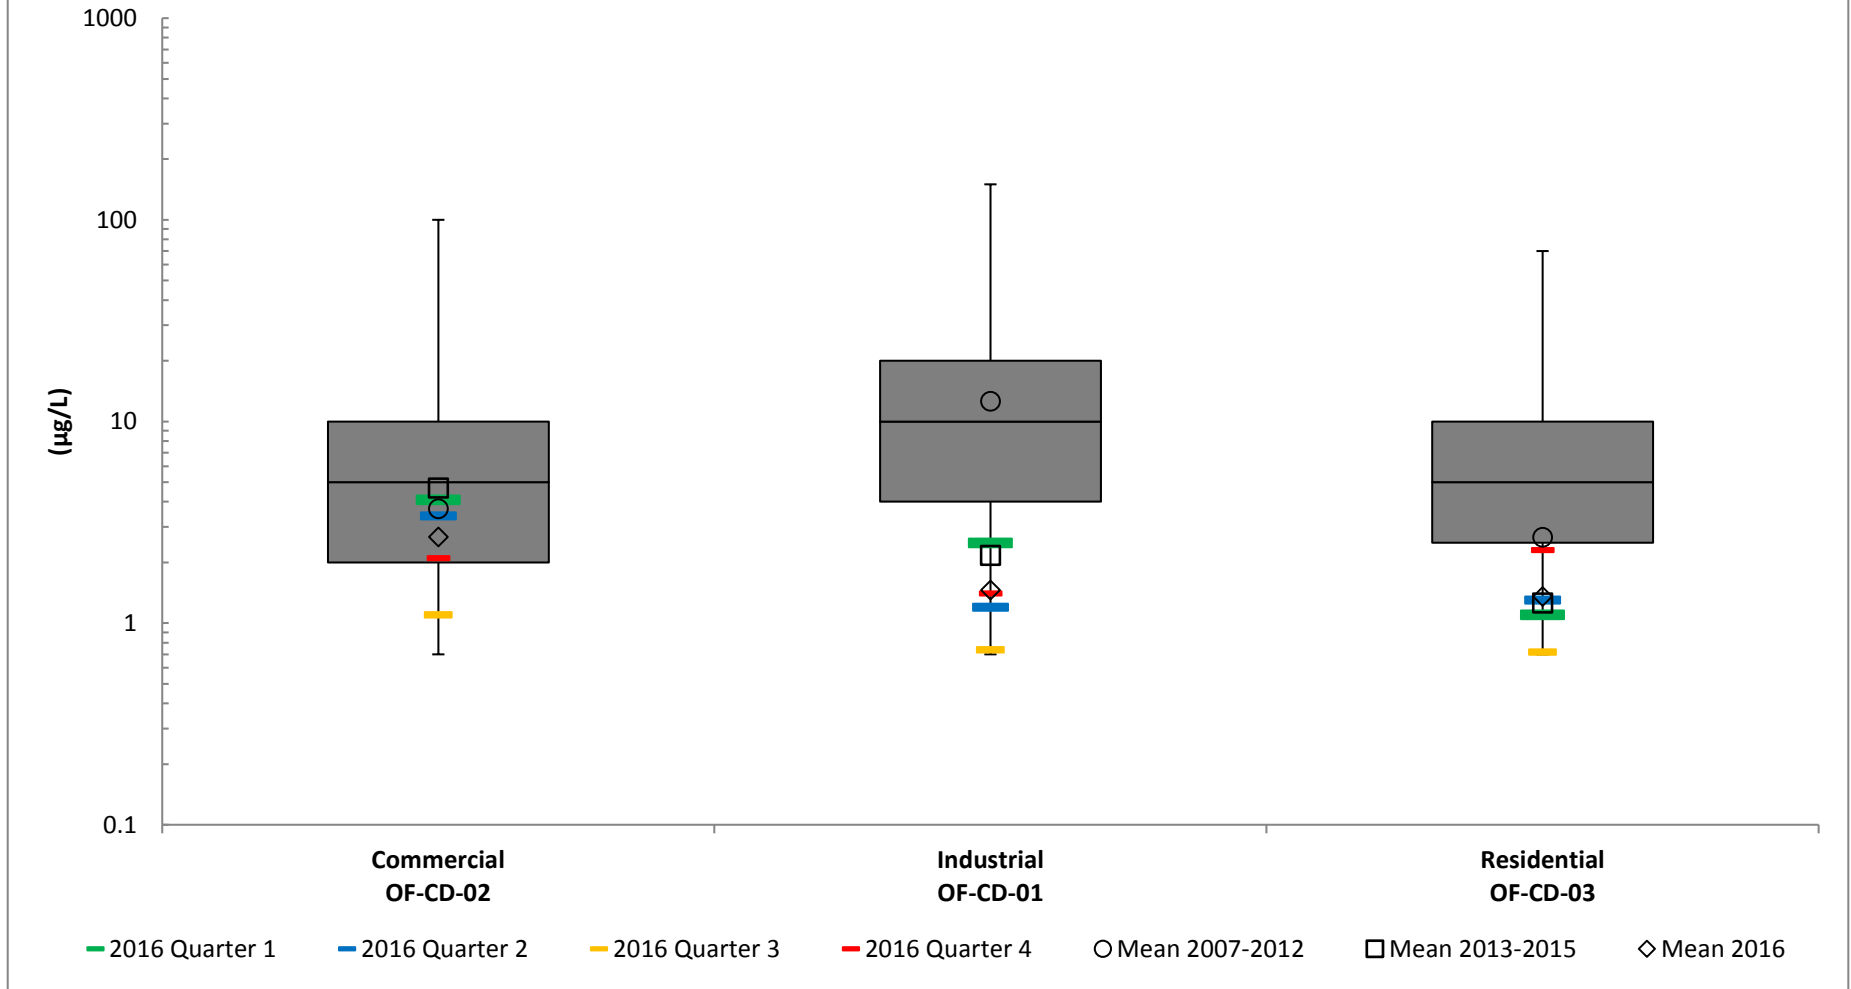

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

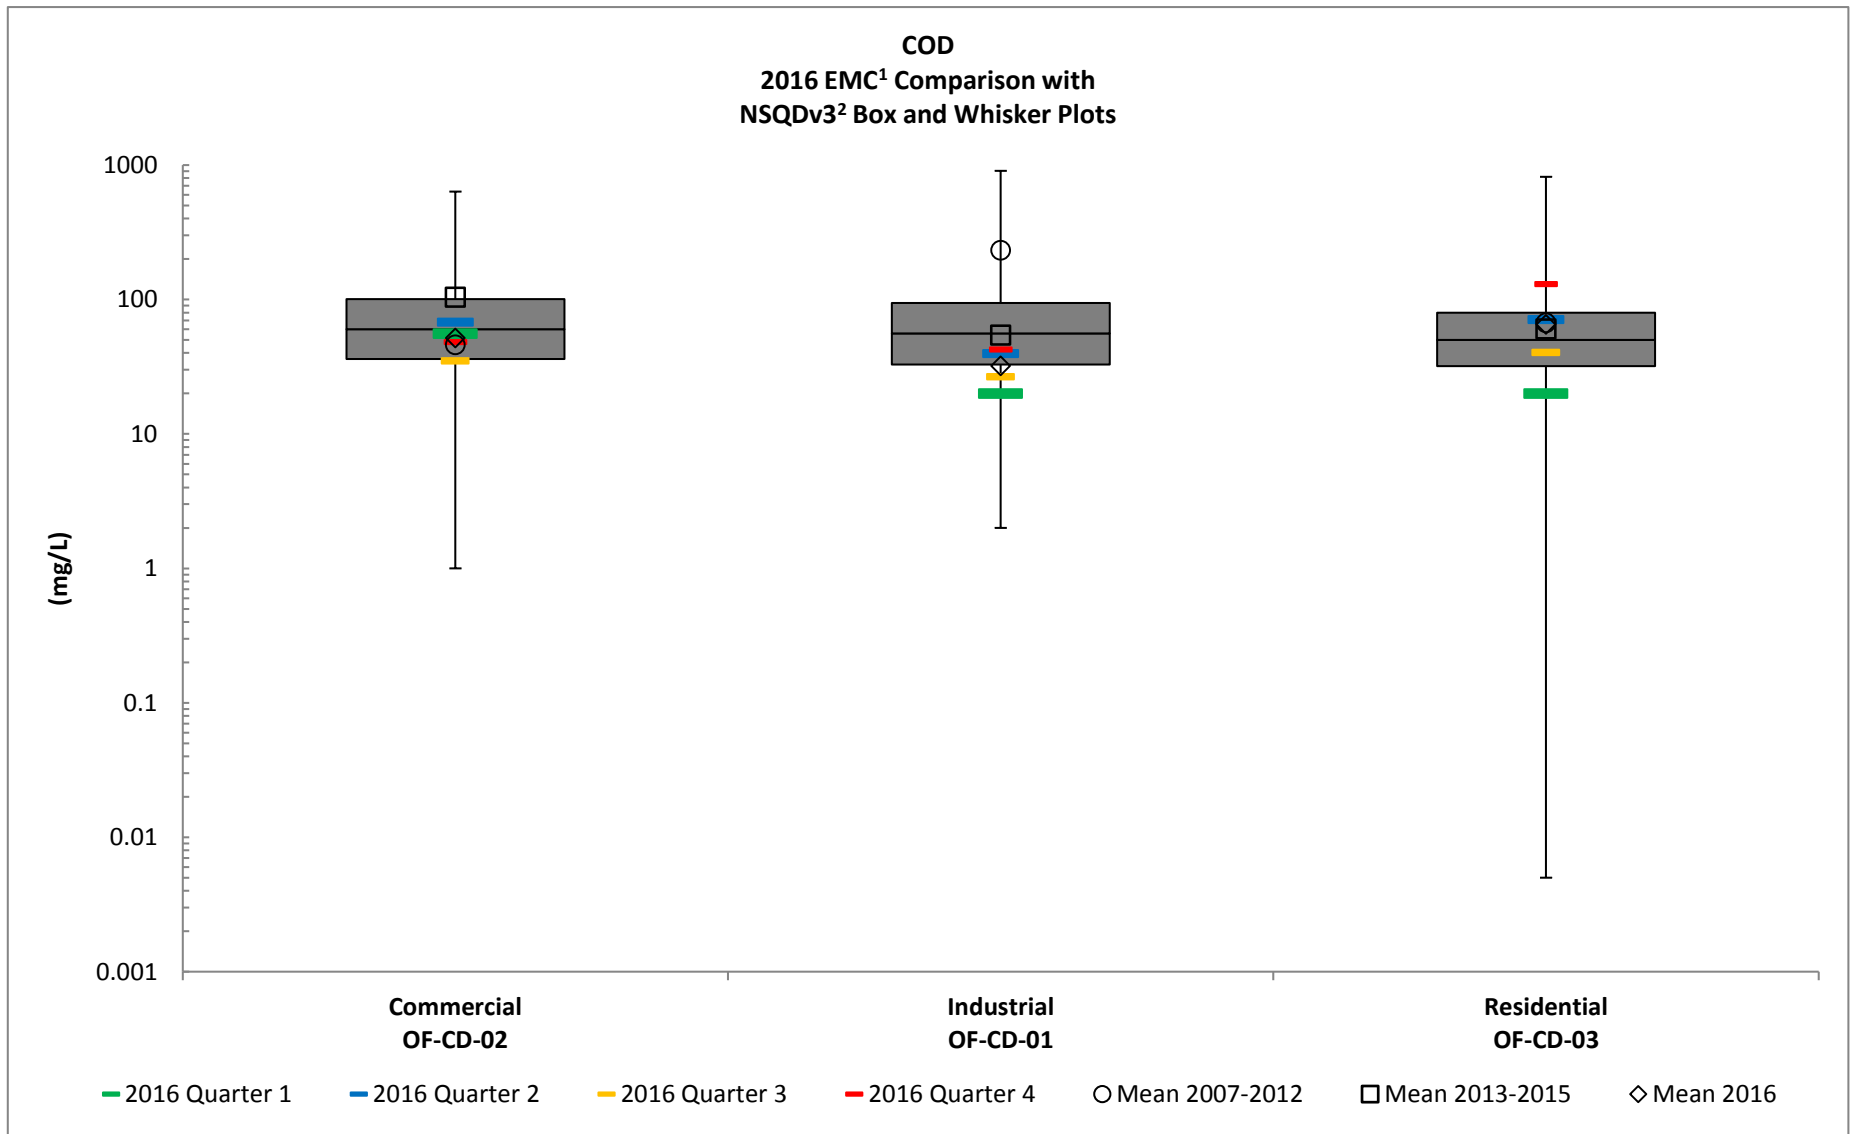

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

Chromium
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots

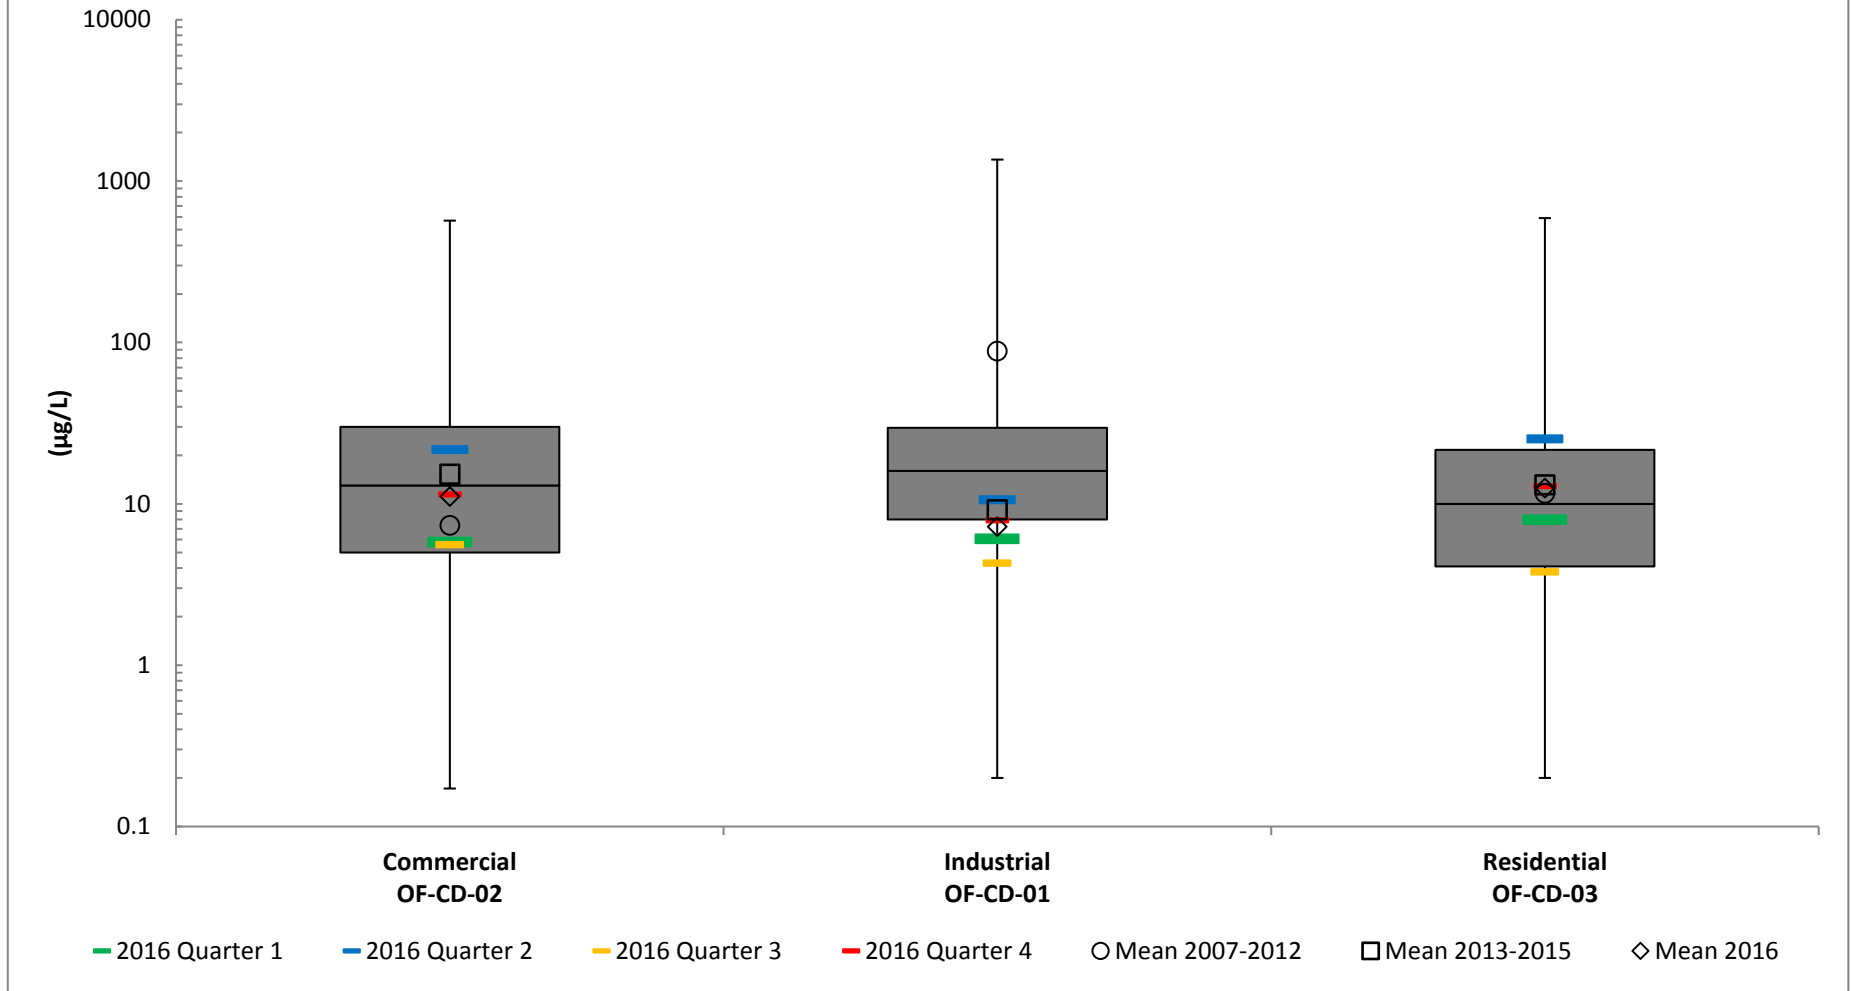

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

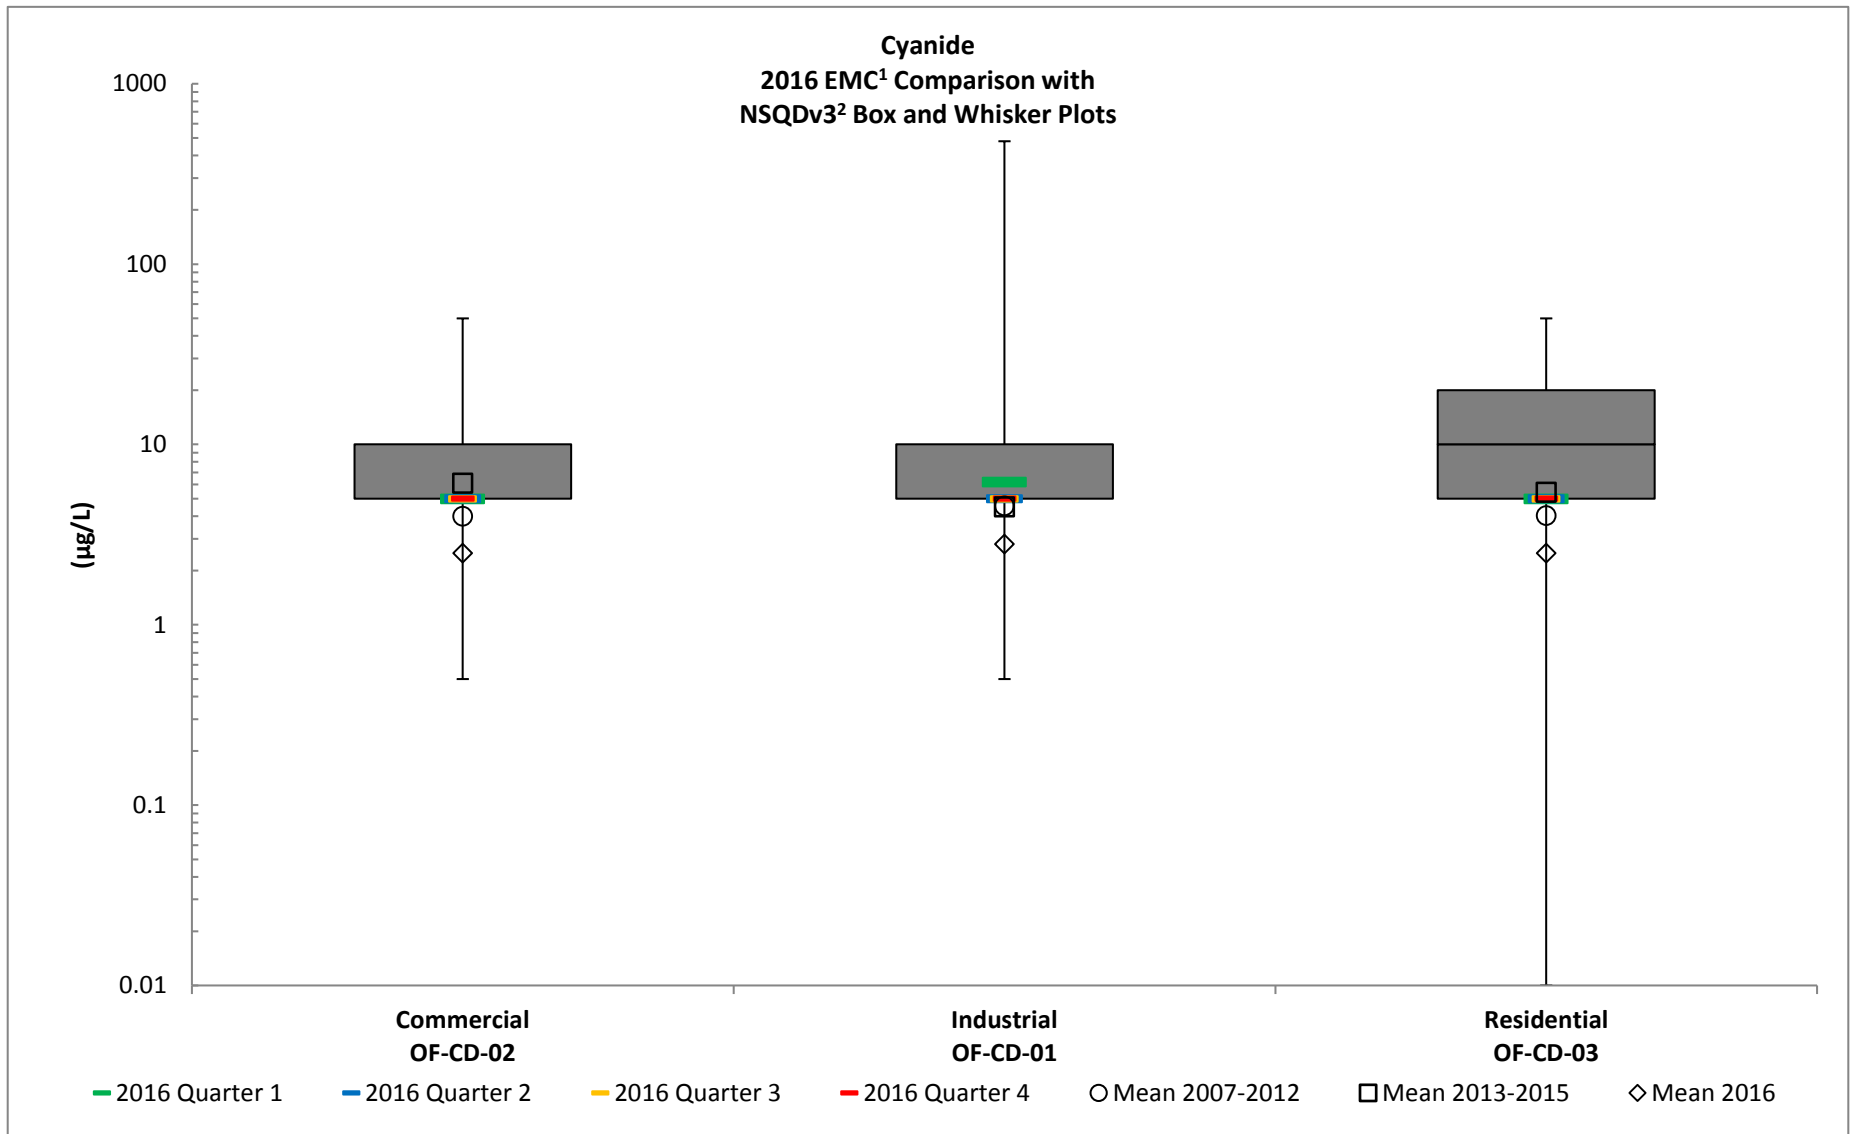

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

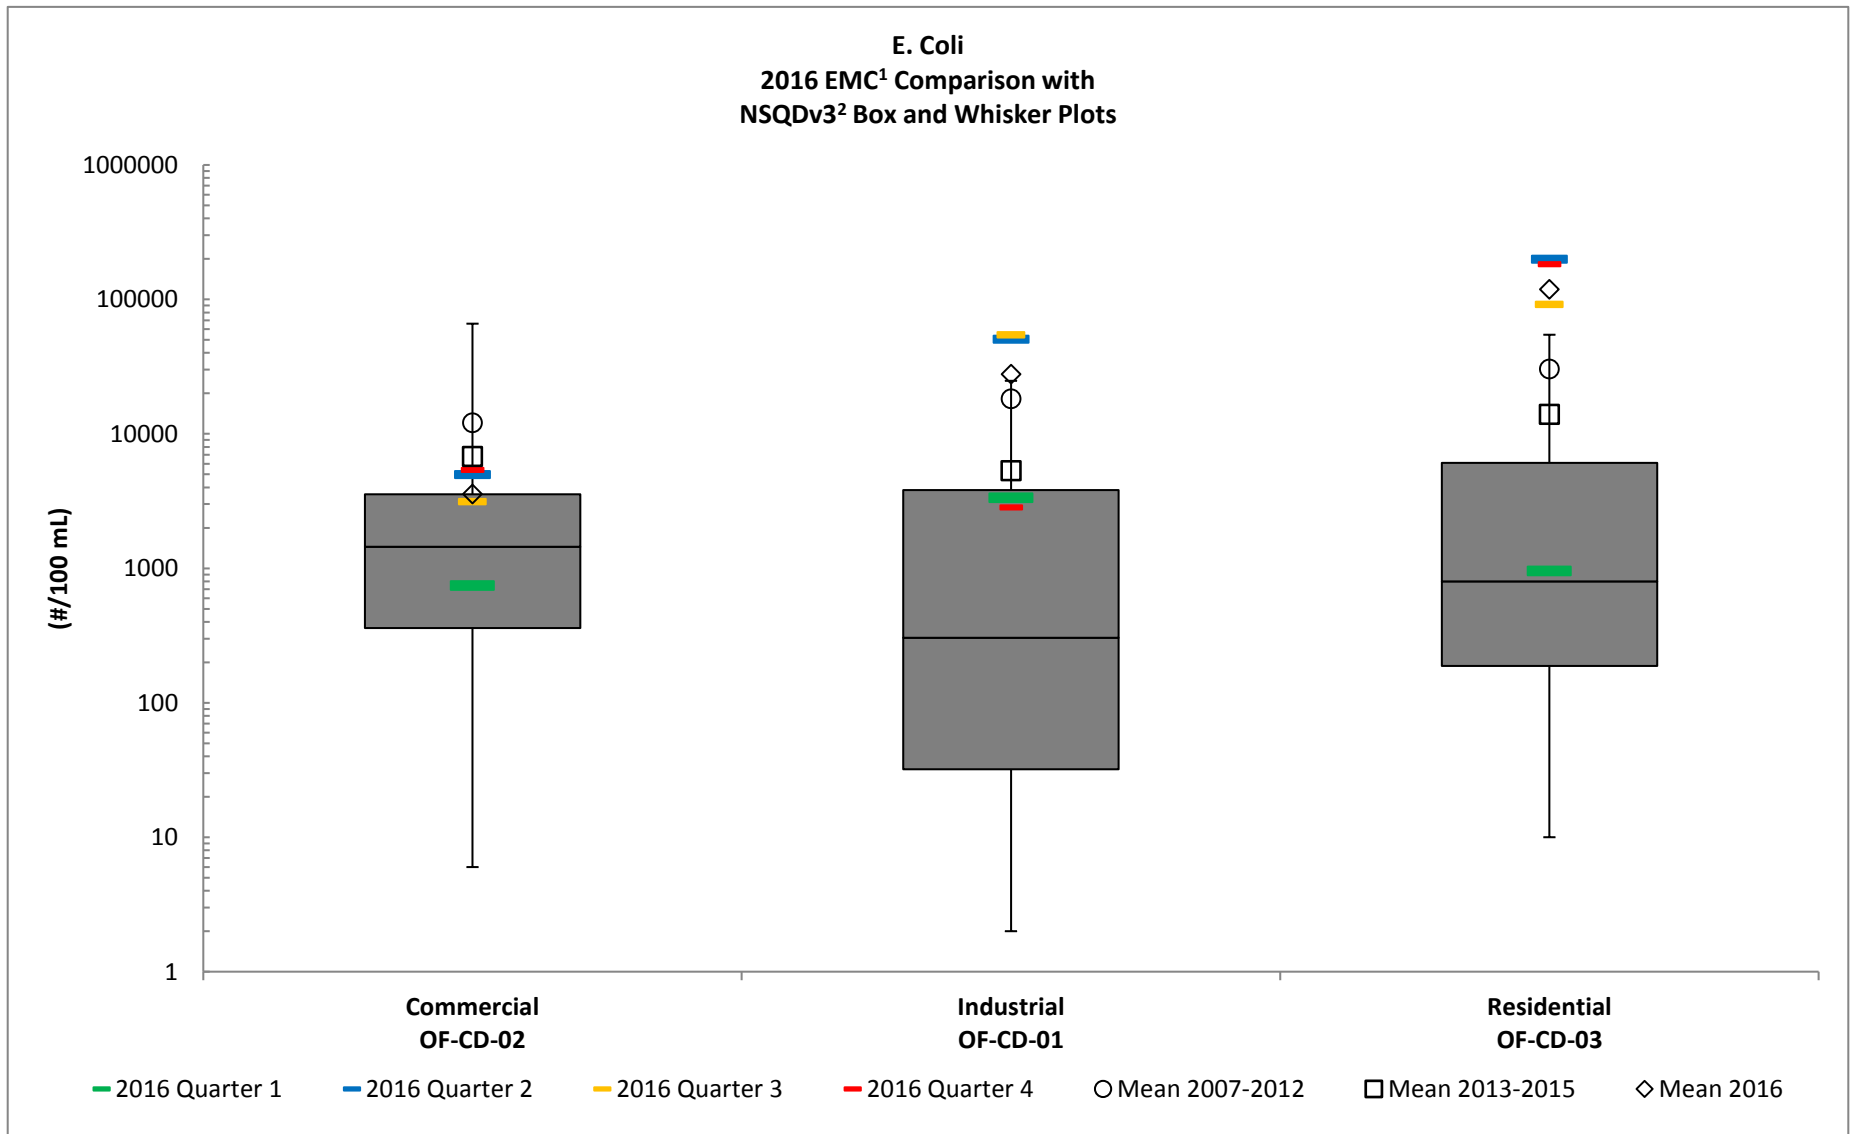

Copper
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots

1. Event Mean Concentration
 2. National Stormwater Quality Database, Version 3

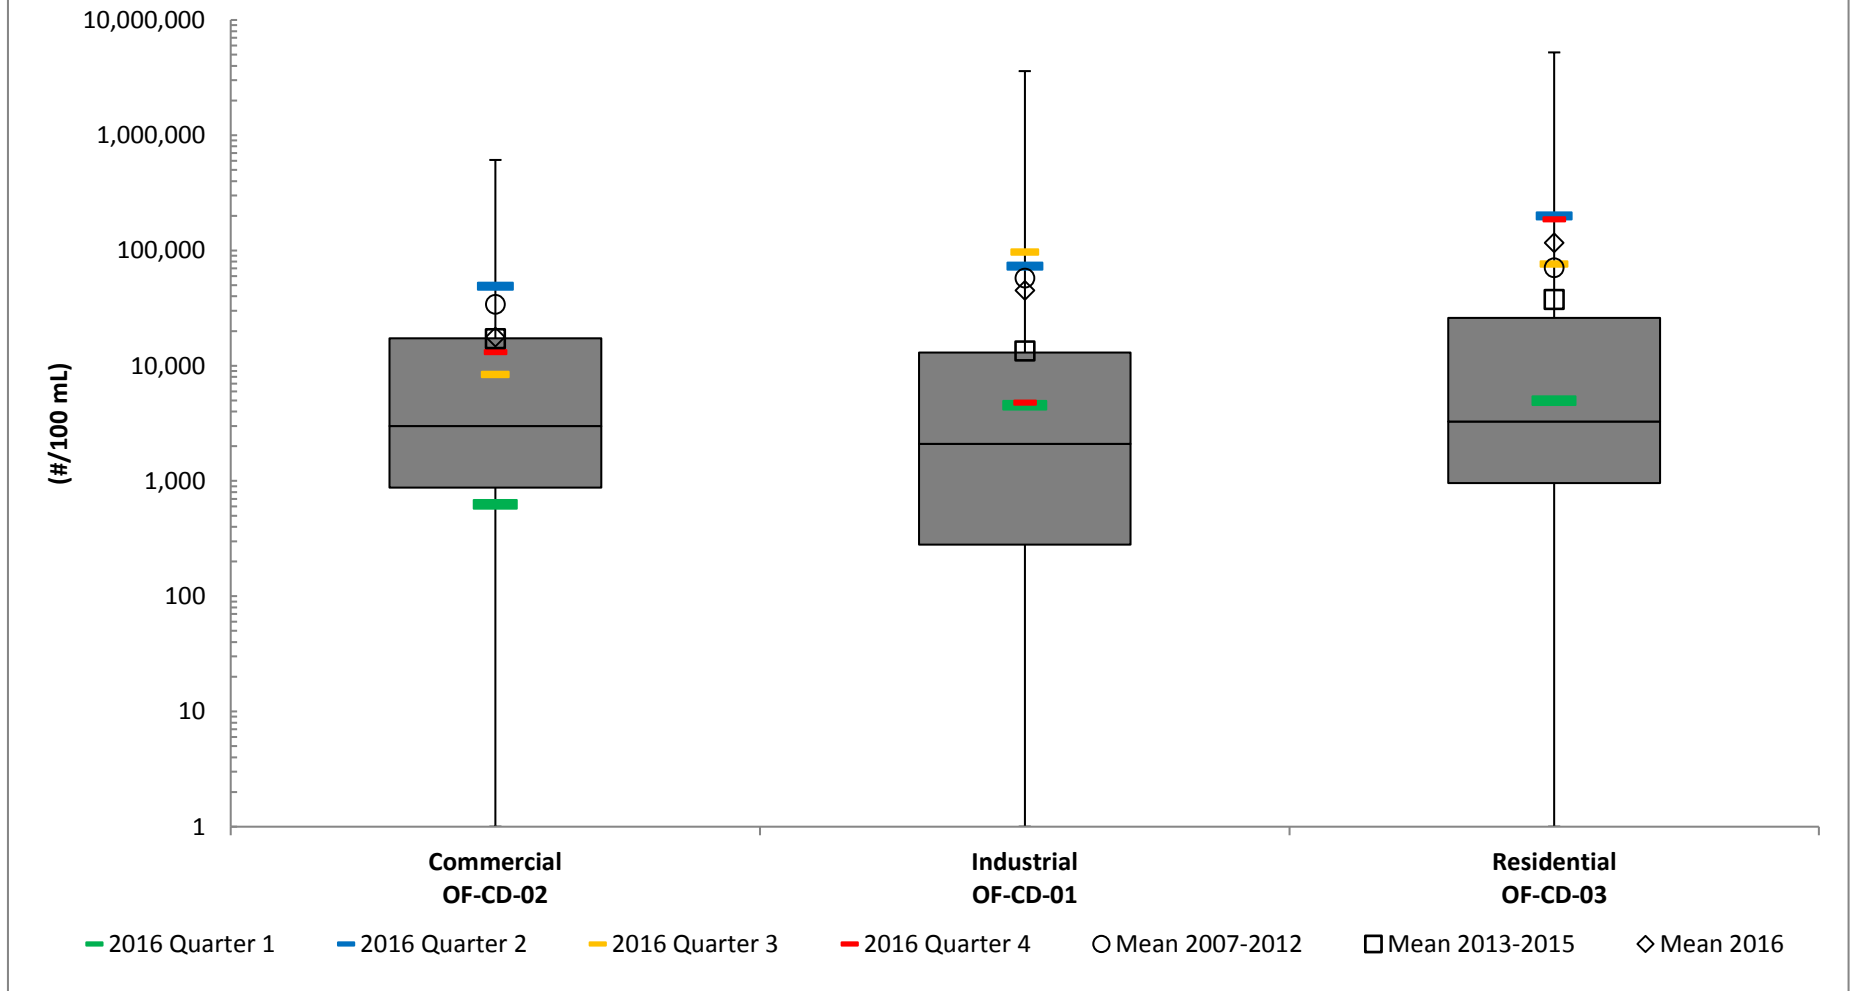

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

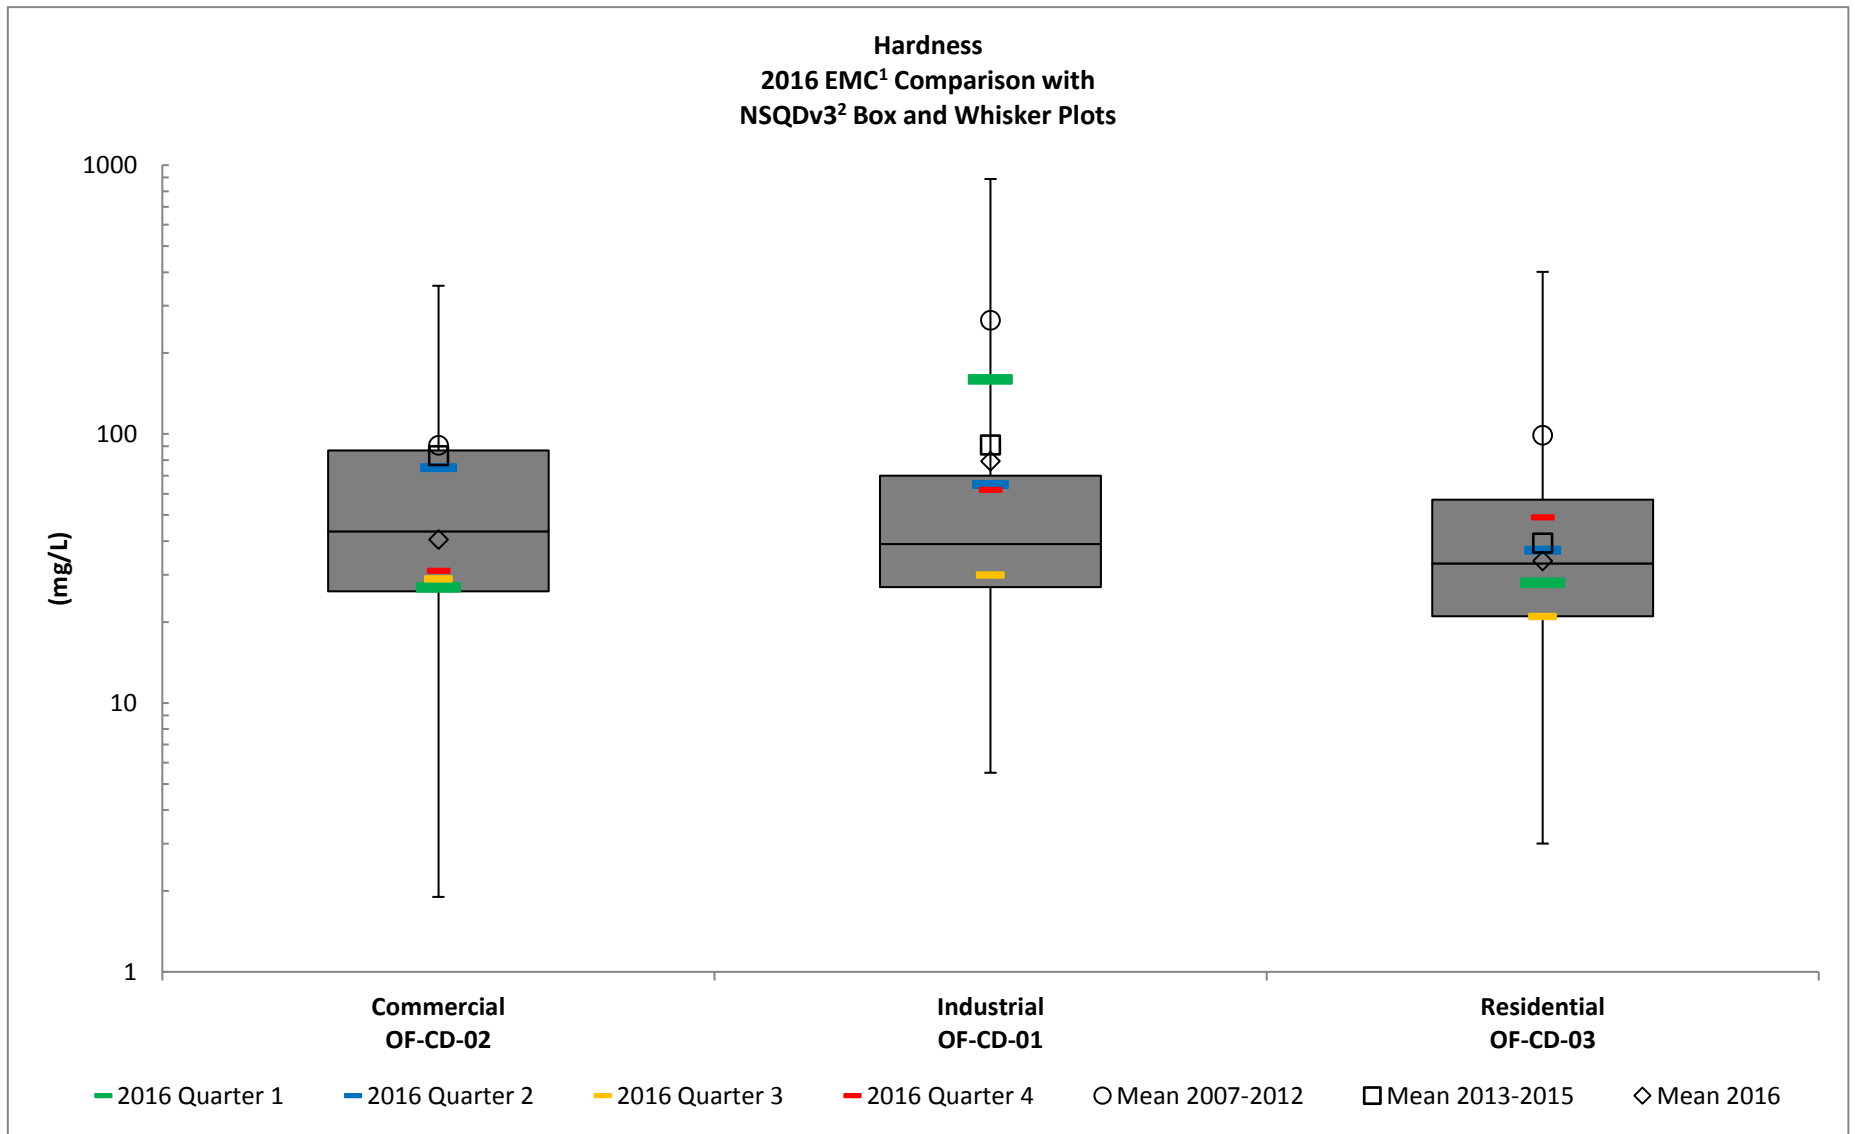

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

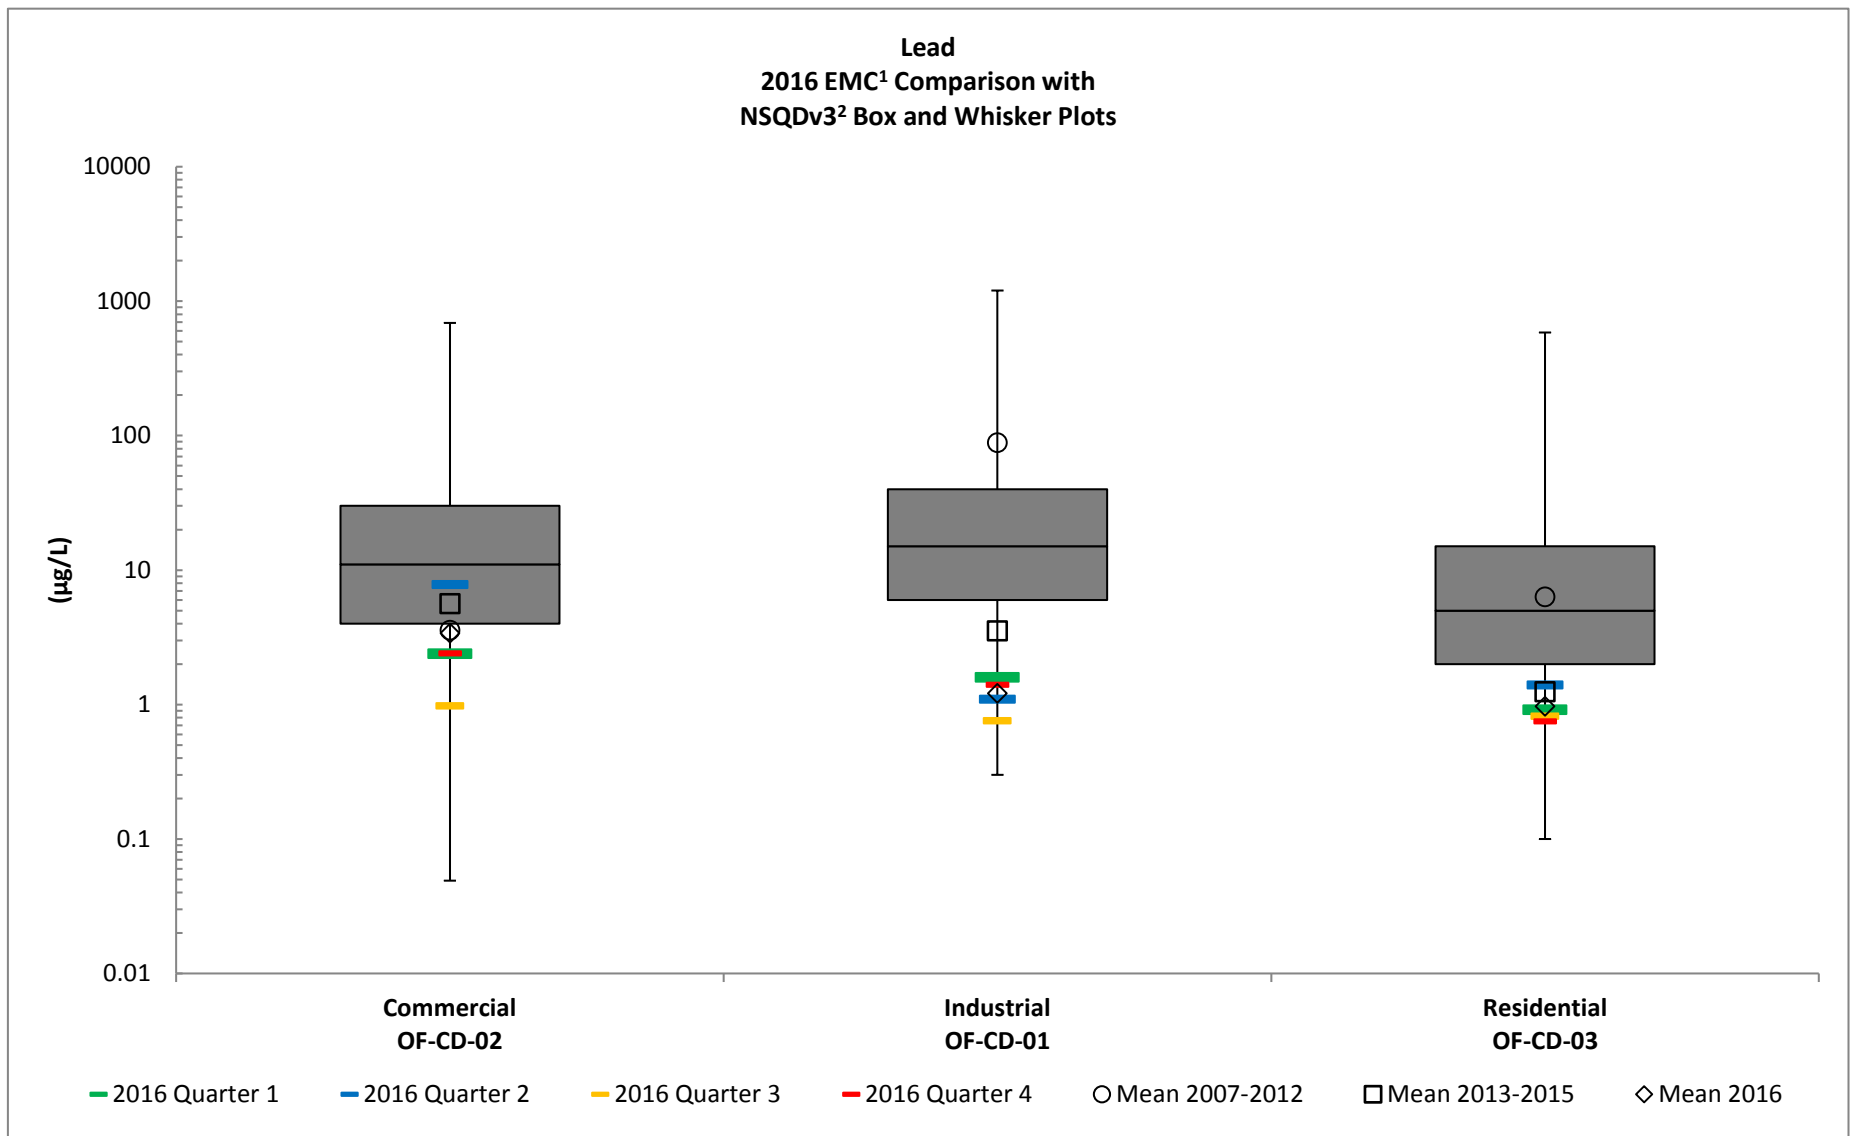

**Fecal Coliform
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots**

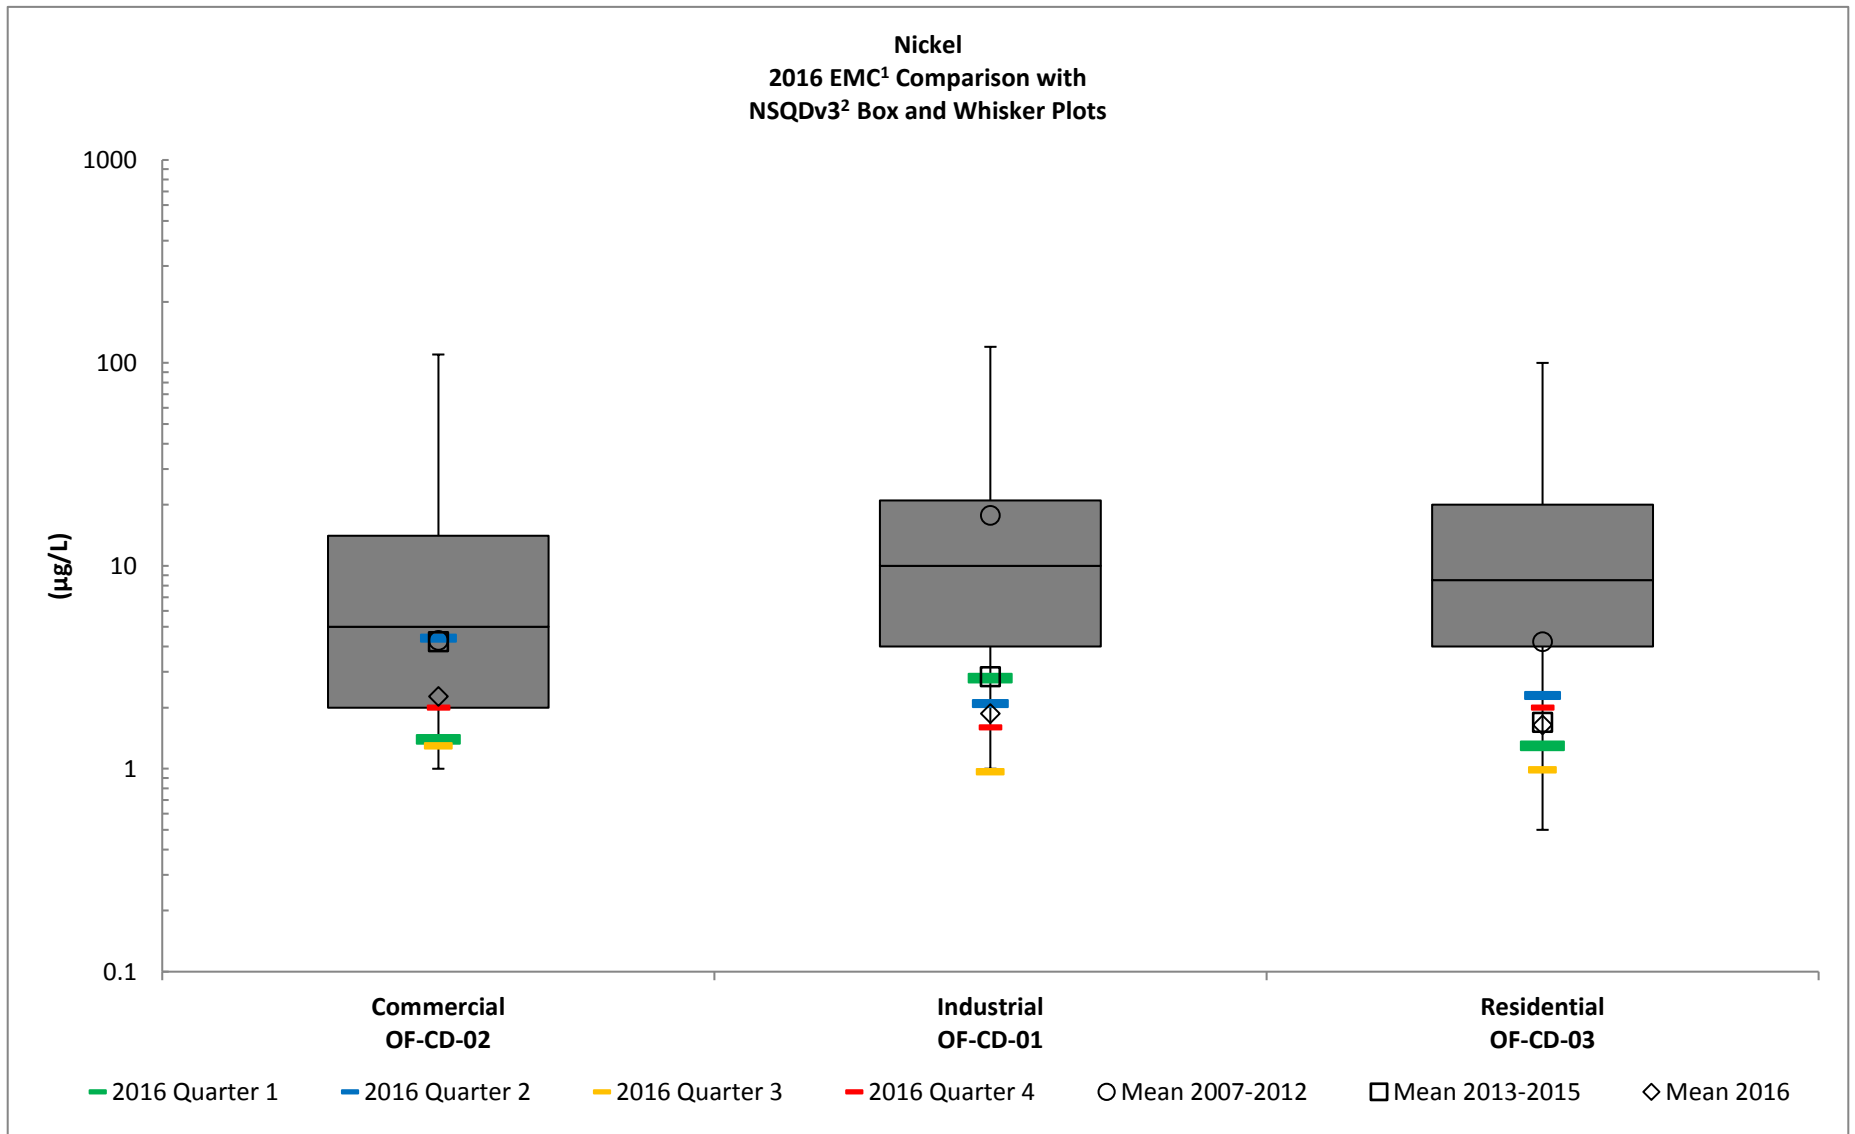

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

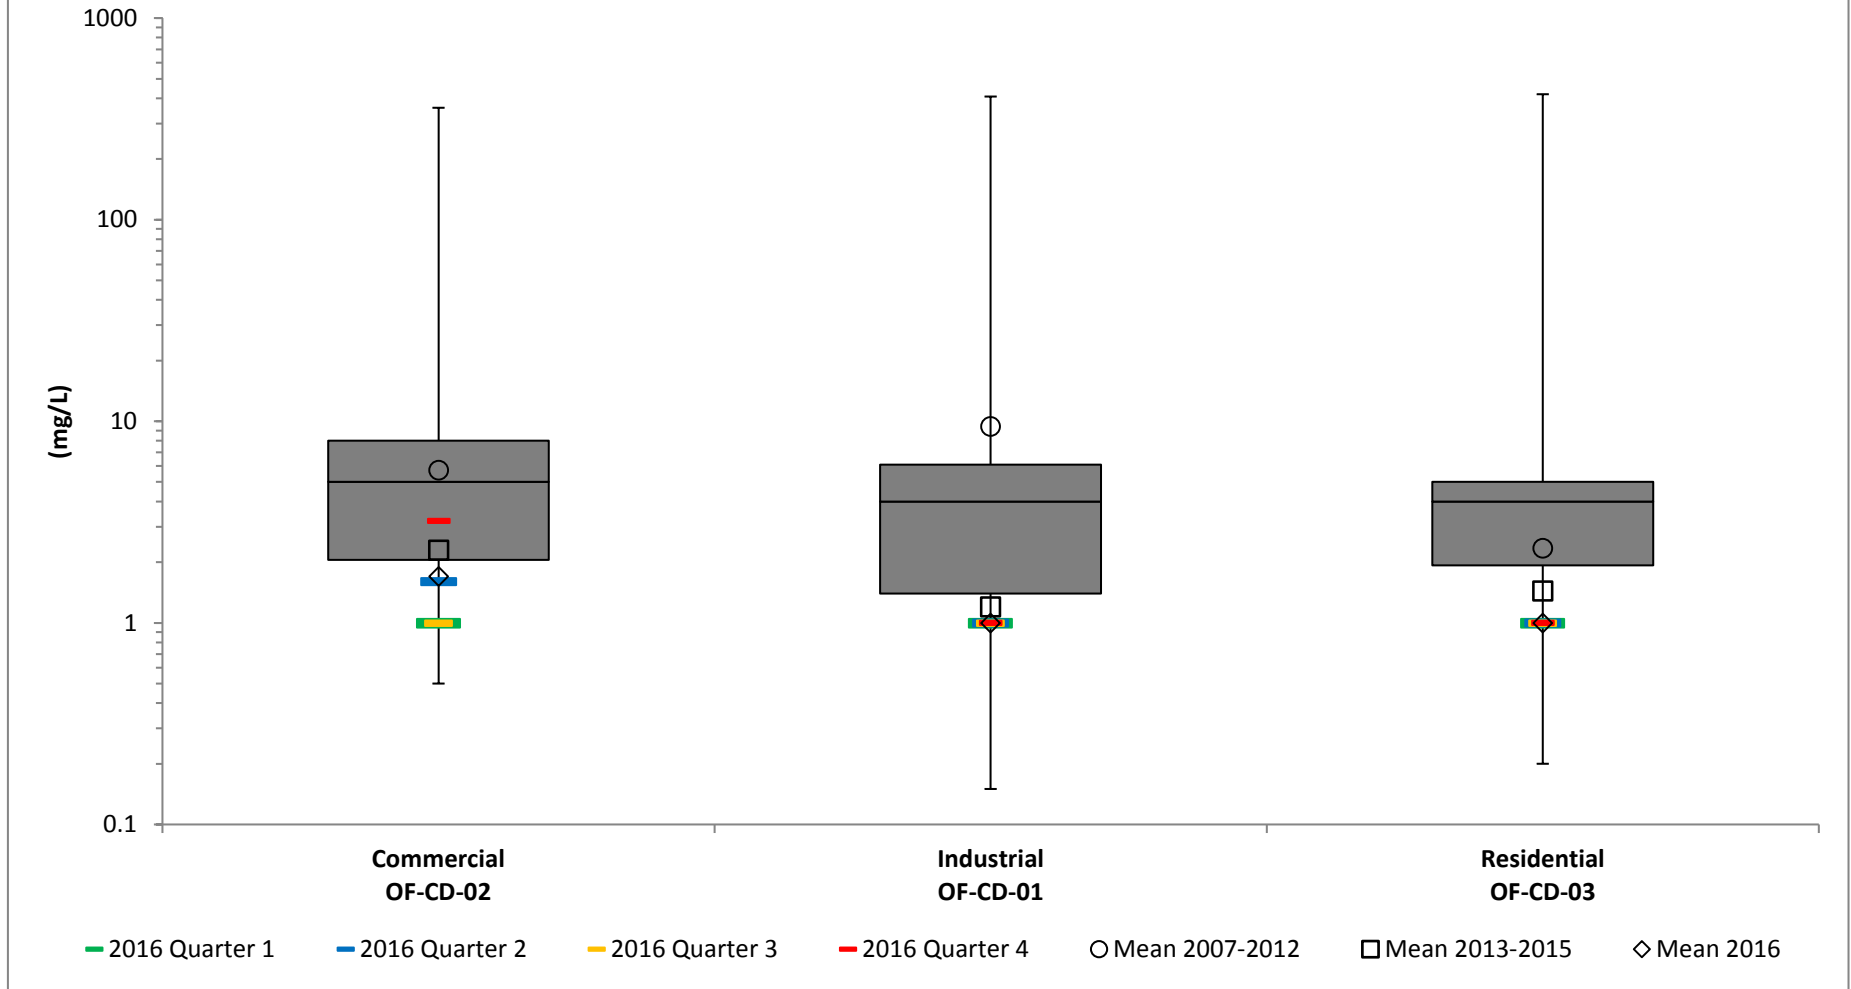

1. Event Mean Concentration
 2. National Stormwater Quality Database, Version 3

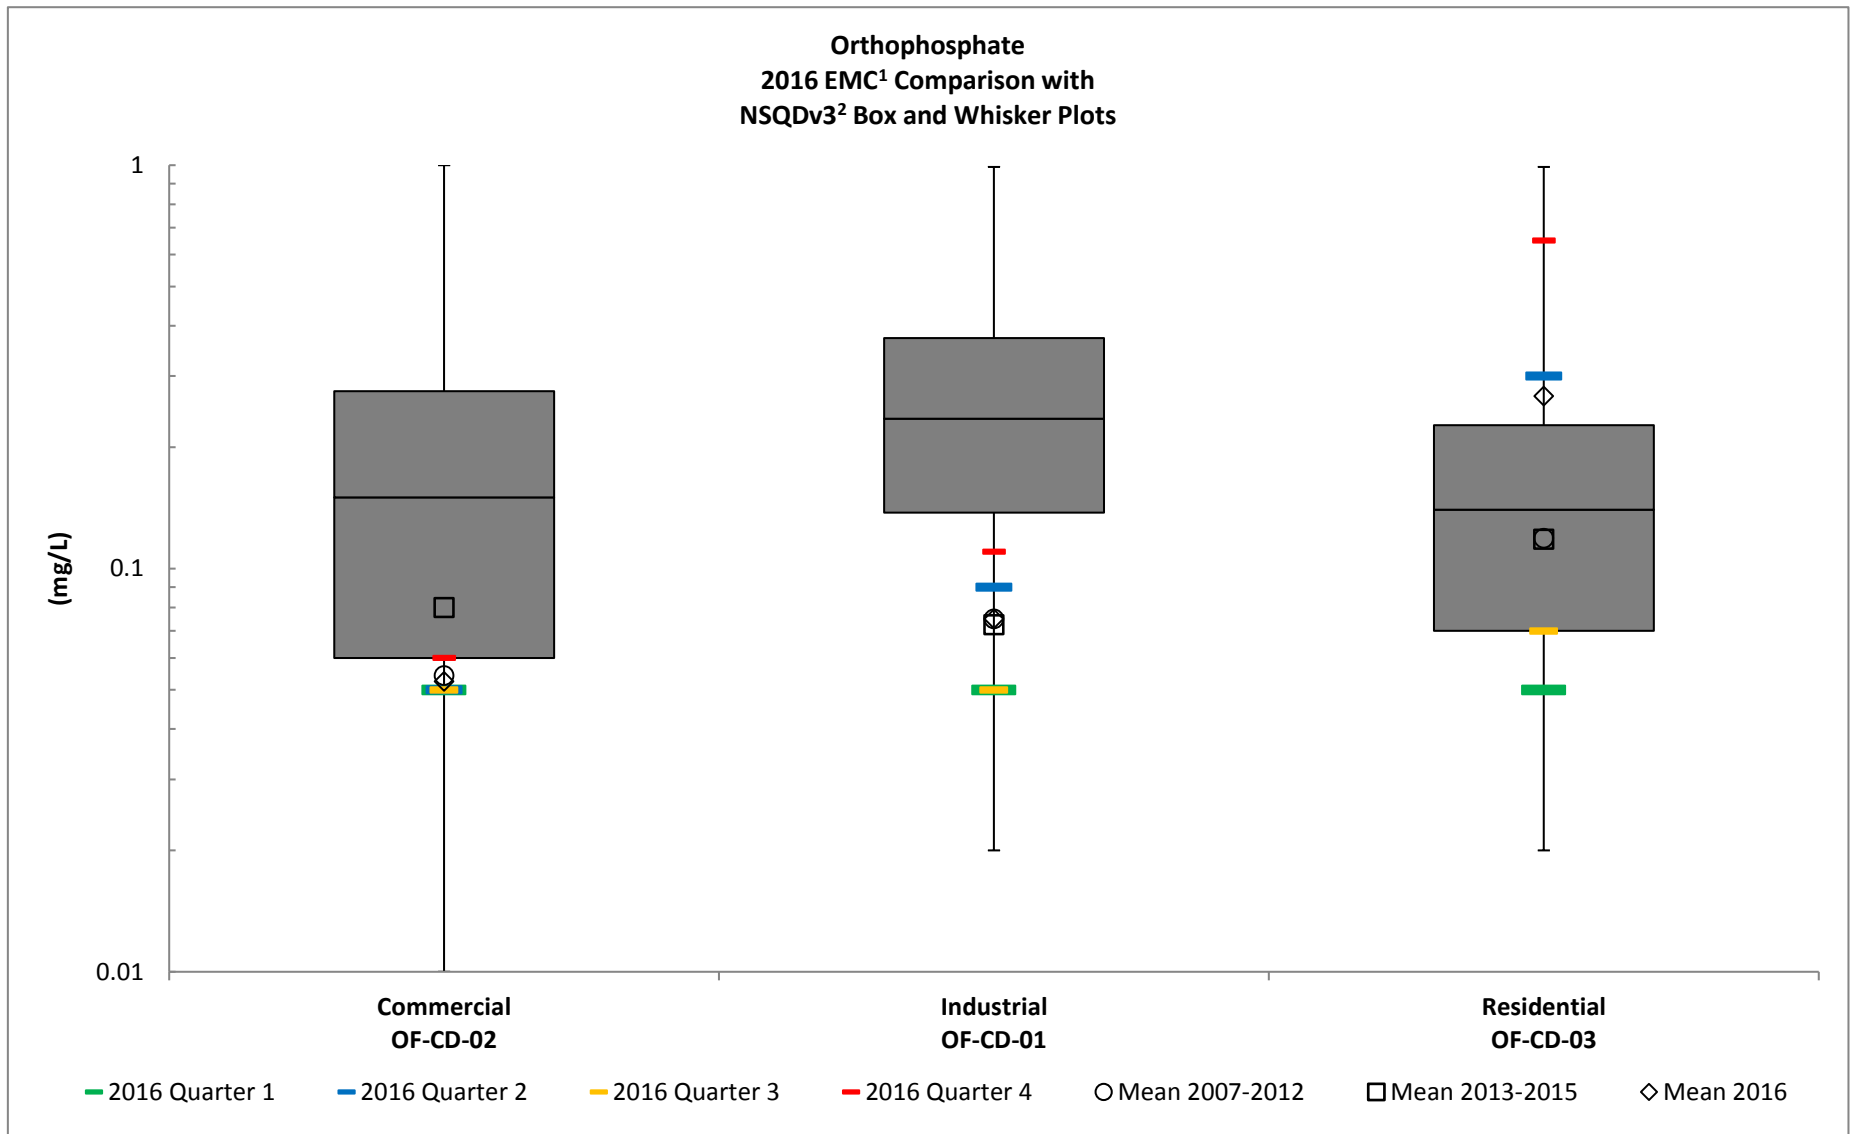

1. Event Mean Concentration
 2. National Stormwater Quality Database, Version 3

**Oil & Grease
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots**

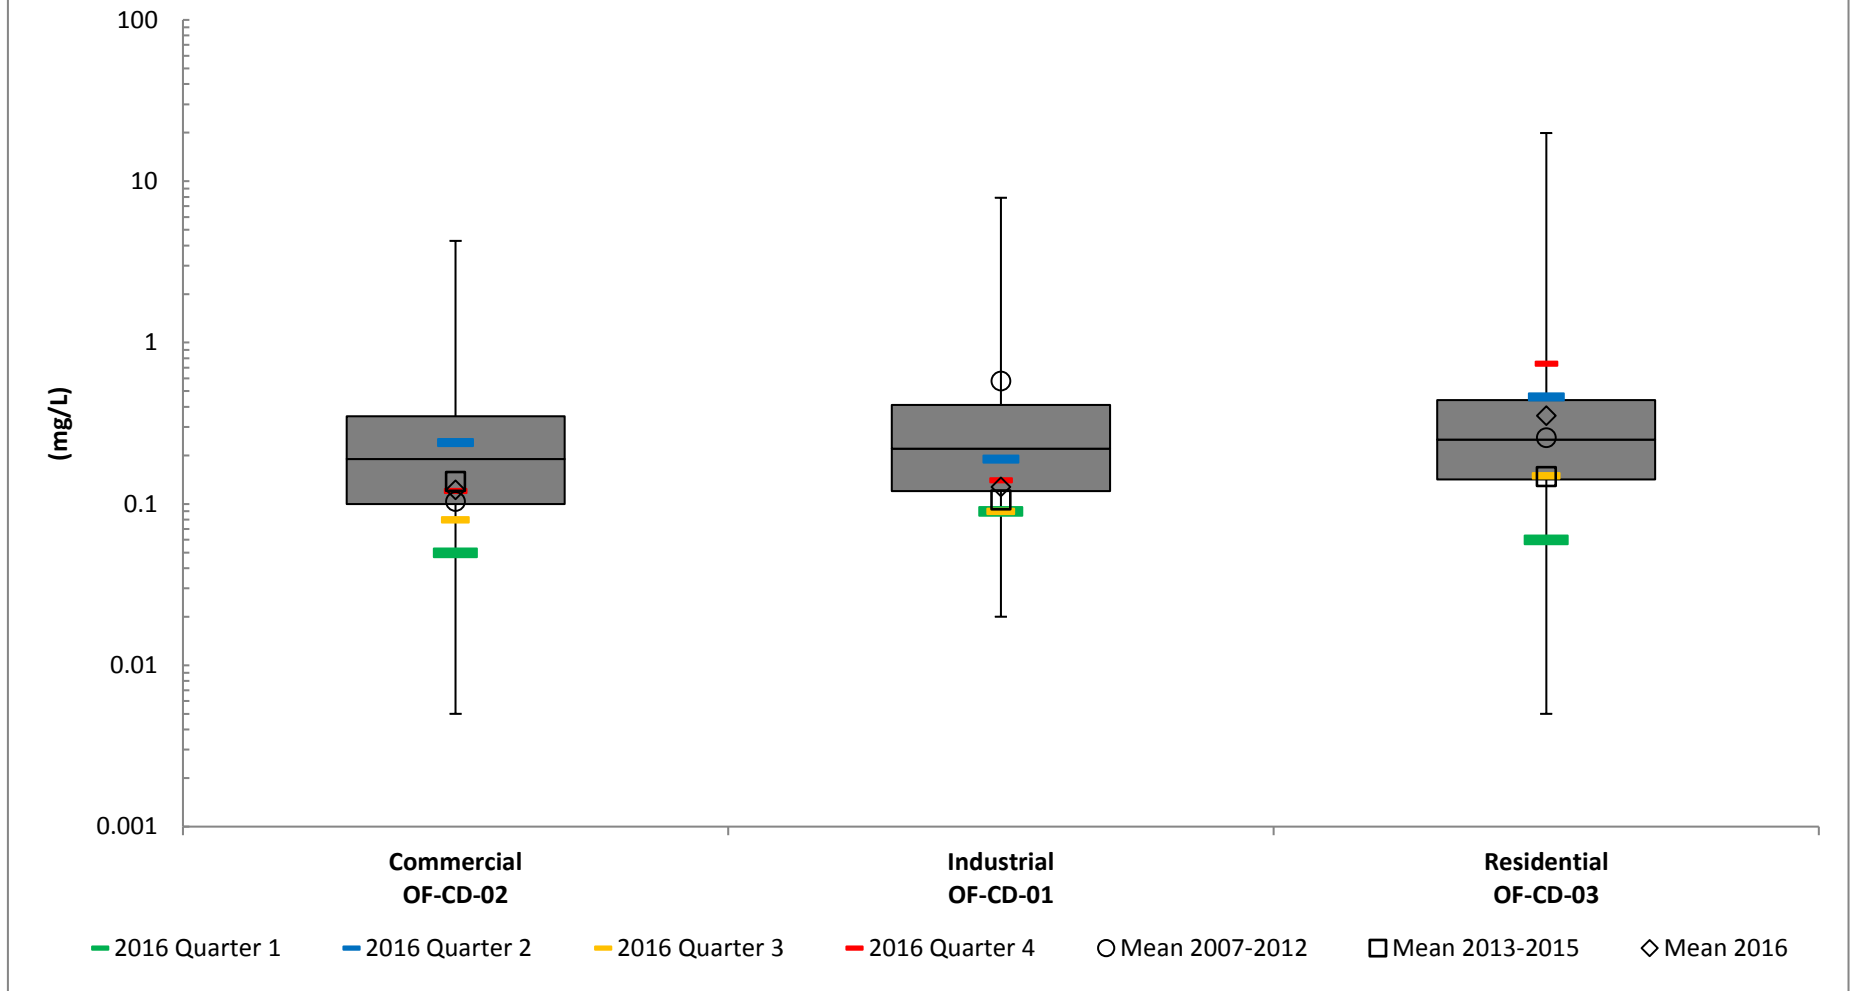

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

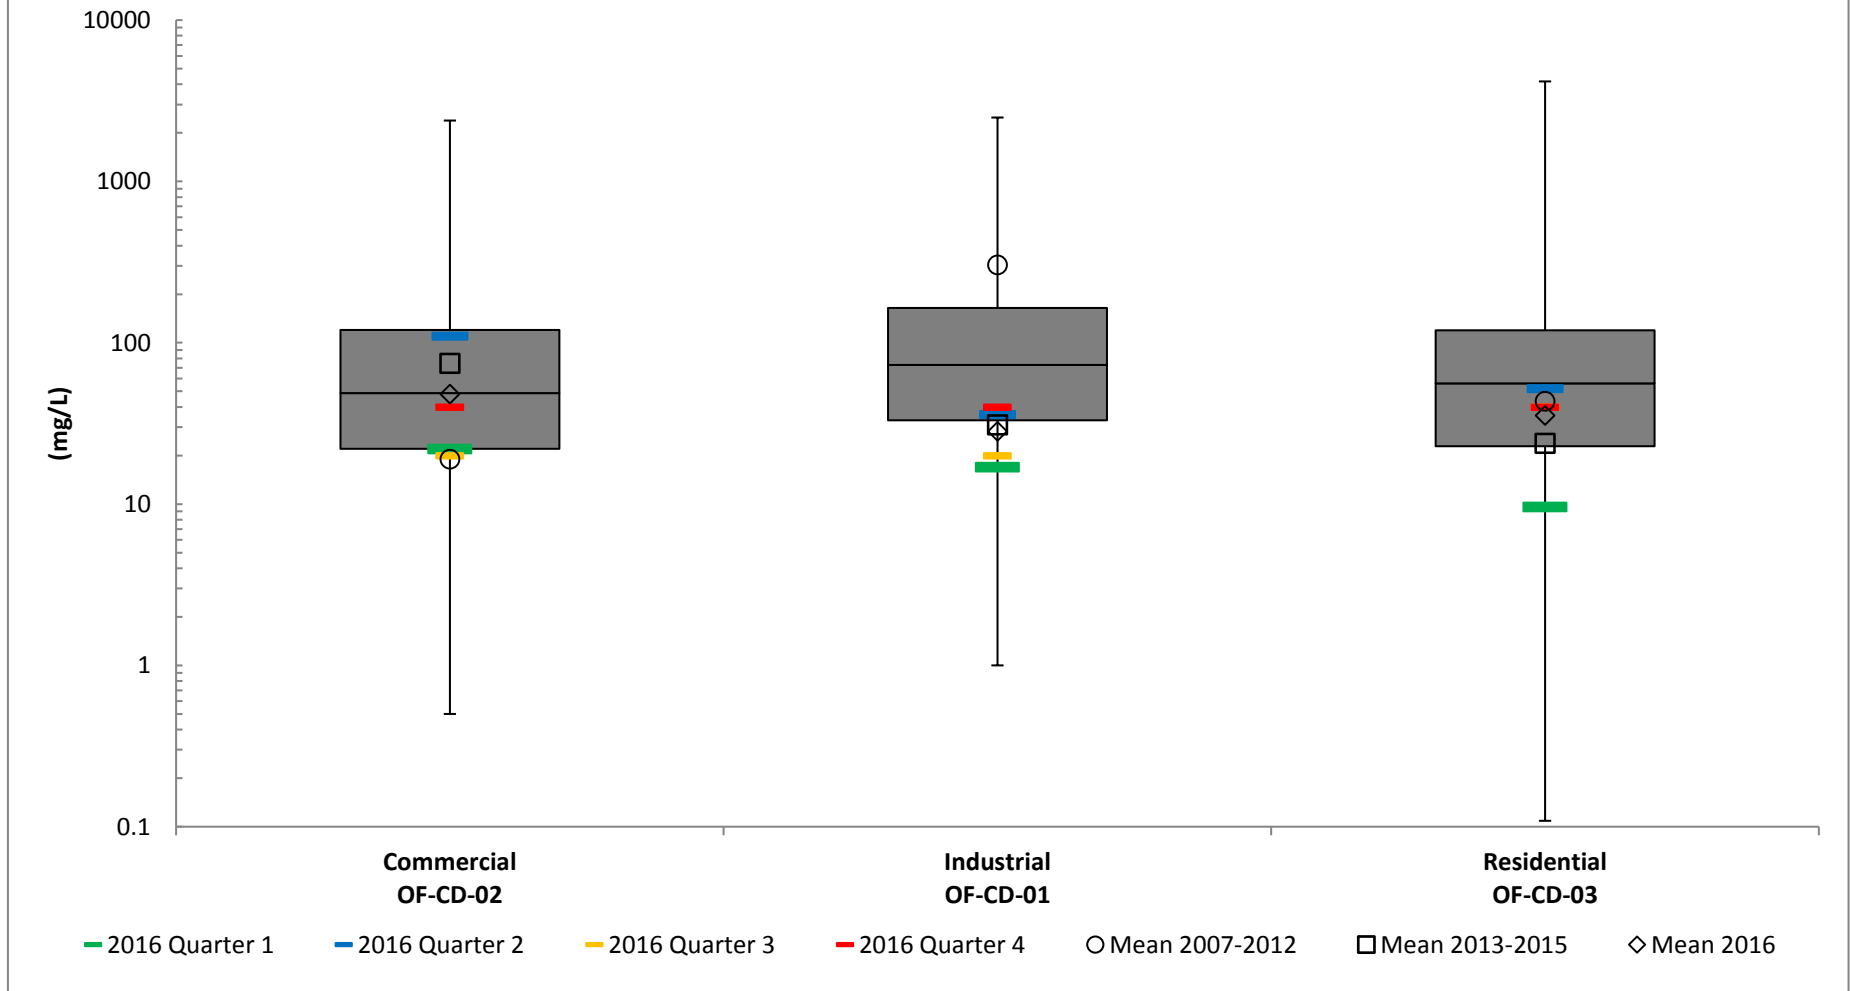

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

**Phosphorus
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots**

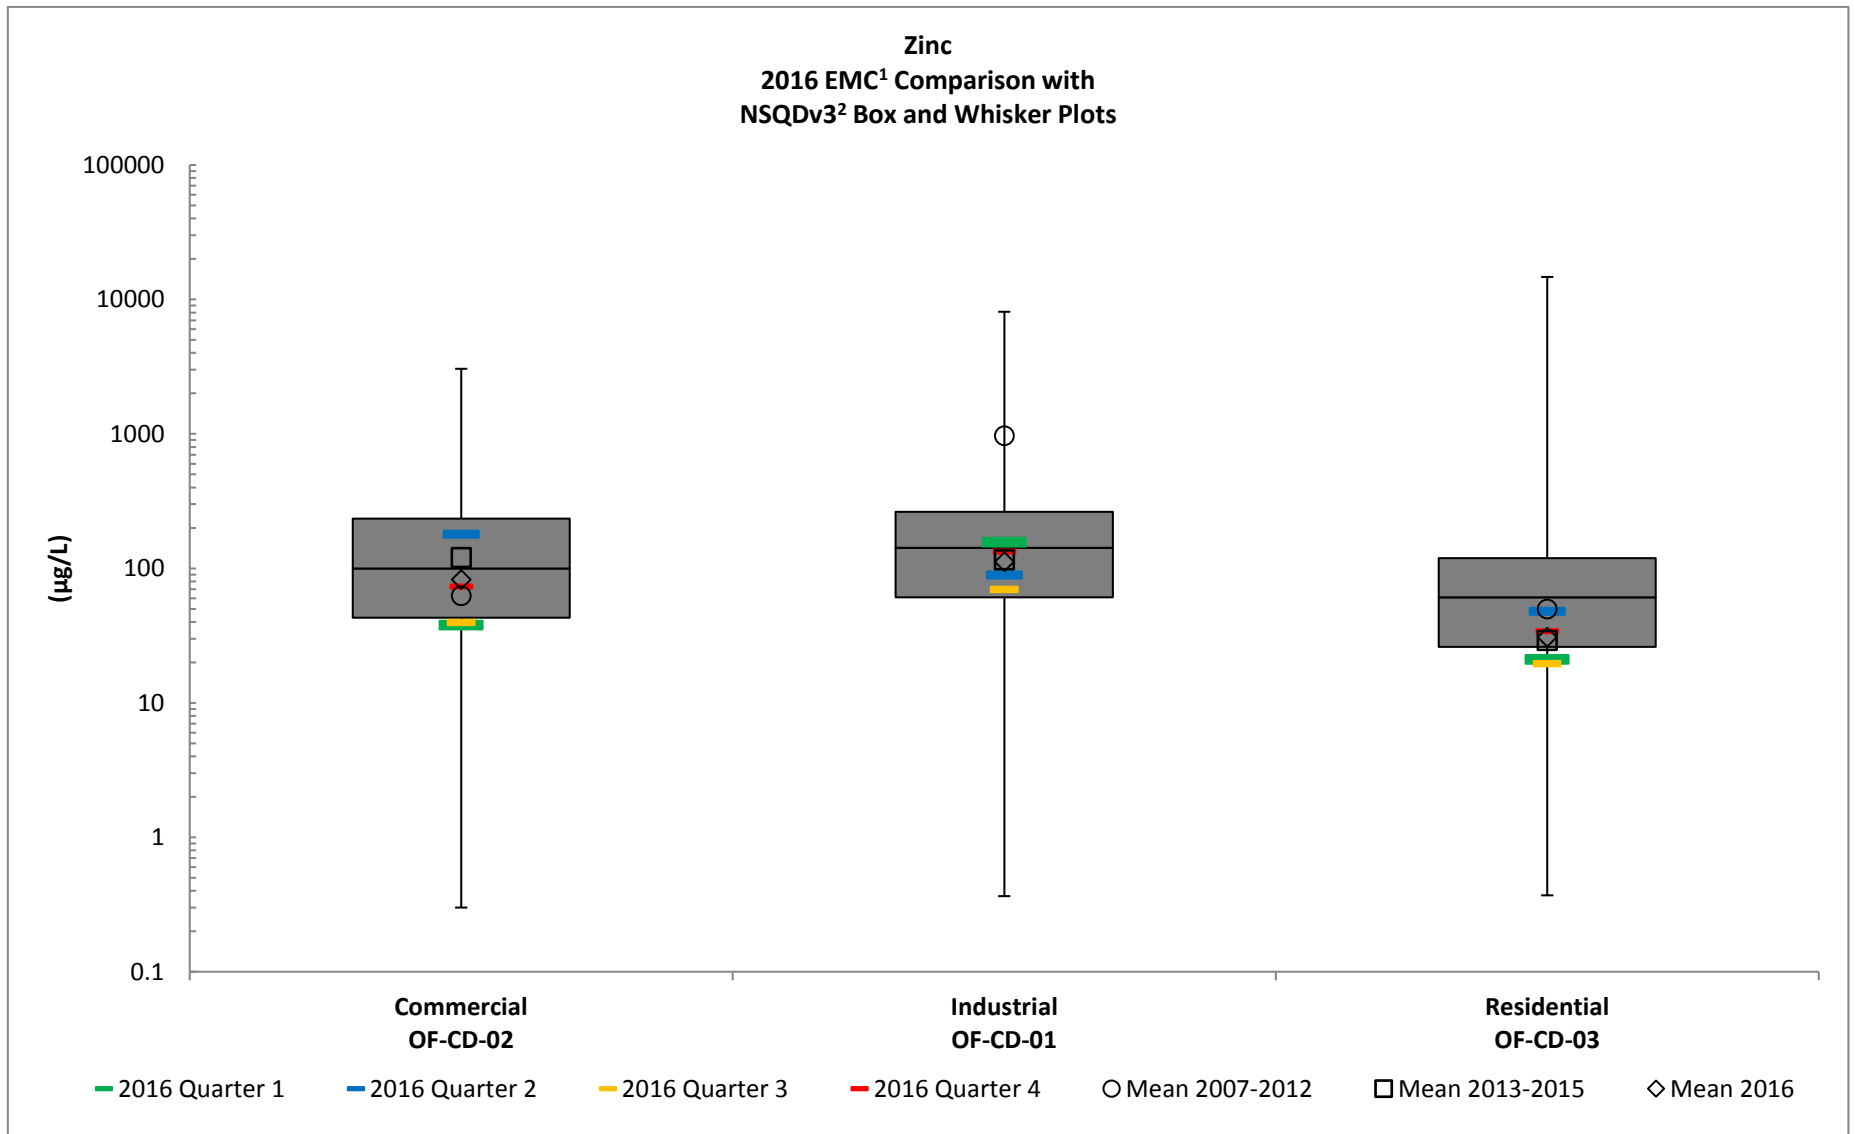

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

**Total Suspended Solids
2016 EMC¹ Comparison with
NSQDv3² Box and Whisker Plots**

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3

1. Event Mean Concentration
2. National Stormwater Quality Database, Version 3
